Emotions are what turn a place into a unique space.

Creating nuances and different sensations is vital for us to not only inhabit the space, but also to feel it, to live it.

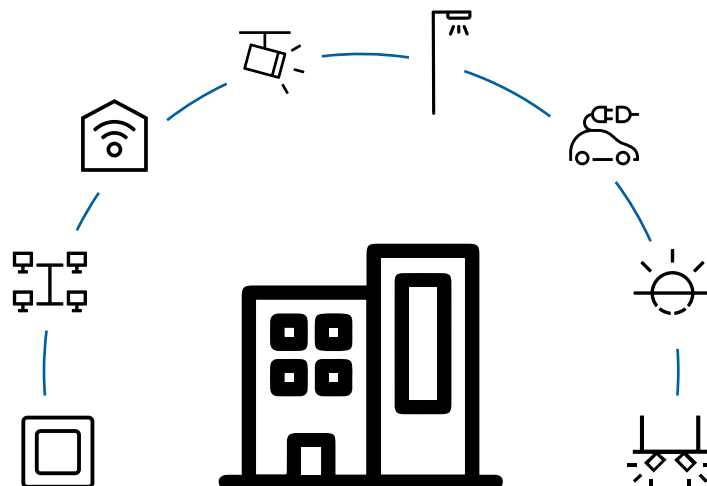

SIMON's solutions humanise technology and they are integrated into the architecture to create unique spaces adapted to different people's needs. Only in this way can their emotions be aroused.

Light up emotions.

Integrate holistic solutions into your projects, creating combinations that complement each other, where lighting, connectivity or natural lighting, as well as USB charging and electric vehicle recharging facilities create bespoke 'outfits' for every workplace.

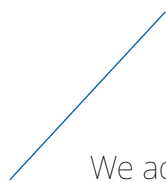

Digital control to orchestrate light in space and time. Decorate and create environments capable of conveying the right atmosphere for the context and the moment, creating ambiances that promote sustainability, well-being, safety and comfort, which all influence our health and state of mind.

Holistic solutions.

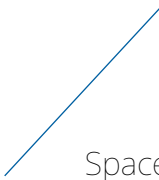

We adapt to the requirements of new, increasingly dynamic and flexible workspaces, transforming ourselves to suit peoples' needs at all times.

We create wellness environments for both individual and collaborative work, designed to allow concentration and which are healthy and stimulating as well as functional. We also create spaces for meetings and creativity that provide the comfort required by modern workplaces.

Living the space.

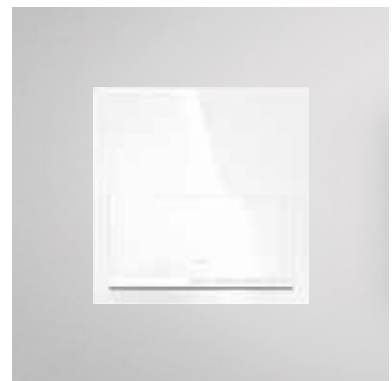

Spaces must evolve with new ways of working. The traditional office has become a flexible multi-purpose space that adapts to different profiles in an instant.

Adjustable switches, thermostats, blind control, USB charging solutions, multimedia connections, experience control panels, etc. Everything to create lively and dynamic spaces.

In addition, electric vehicle recharging points are incorporated for a more sustainable mobility towards a sustainable future.

Flexible spaces.

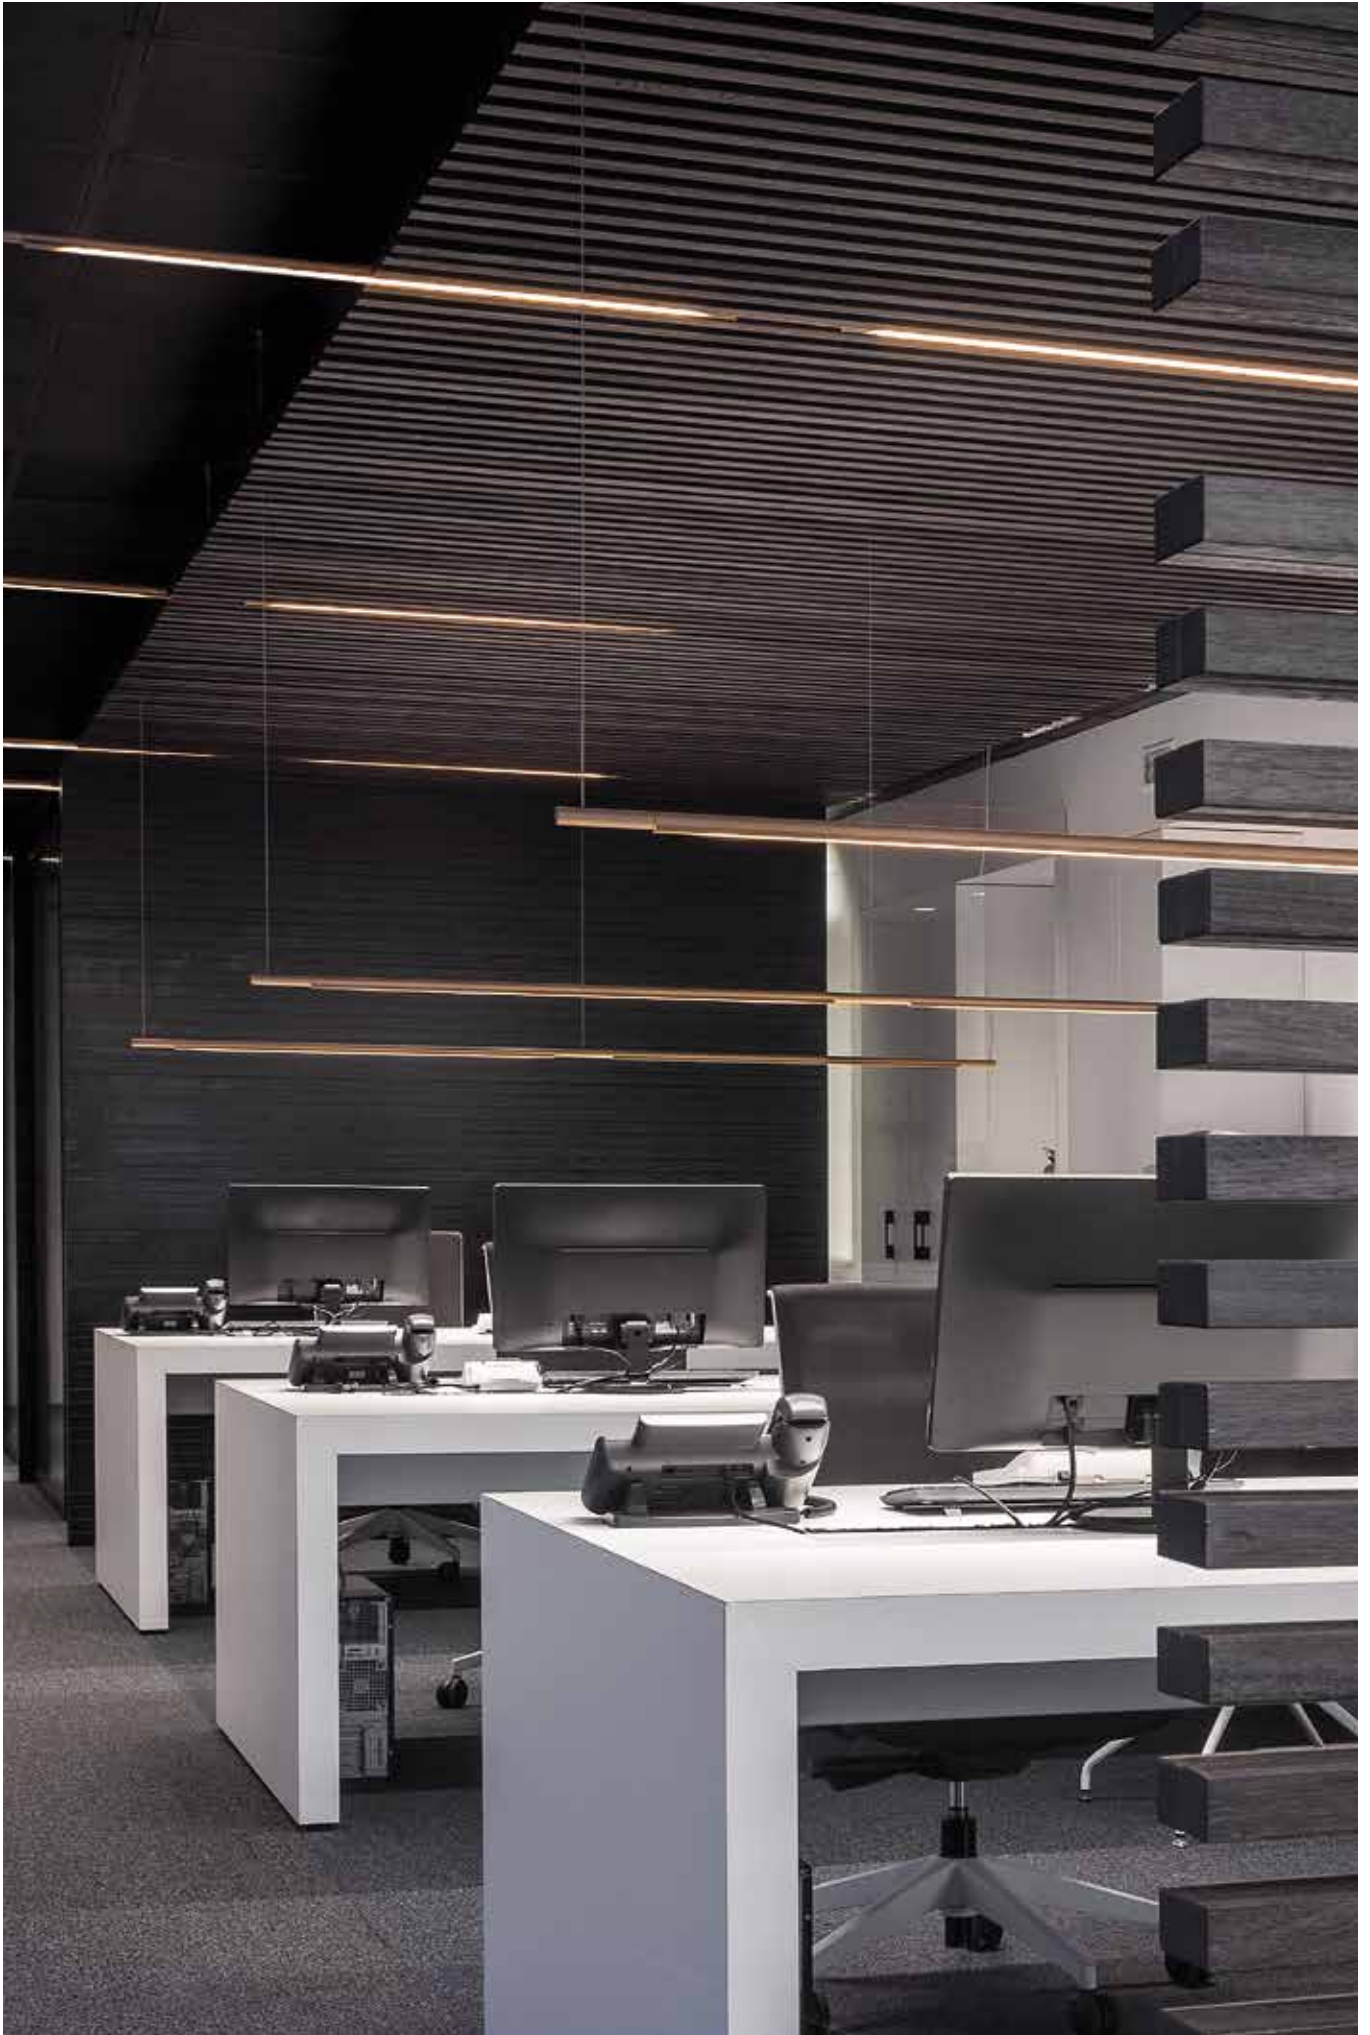

Our solutions blend in with architecture, furniture and all types of structural elements, participating in interior design and enhancing the attractiveness of workspaces.

Choose from a variety of lighting and decorative options to find concepts that match the aesthetics and atmosphere of your projects.

Architectural integration.

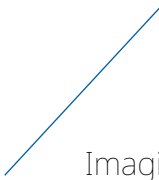

The lighting in spaces not only causes changes in our emotions, it also affects our bodies, influencing our overall well-being, both physical and psychological.

People react to changes in the tone and intensity of light, its colour temperature is directly related to circadian rhythms: physical, mental and behavioural changes that follow the natural 24-hour cycle of sunlight.

We recreate the natural daylight cycle with solutions that improve mood, vision, performance and health.

Wellness.

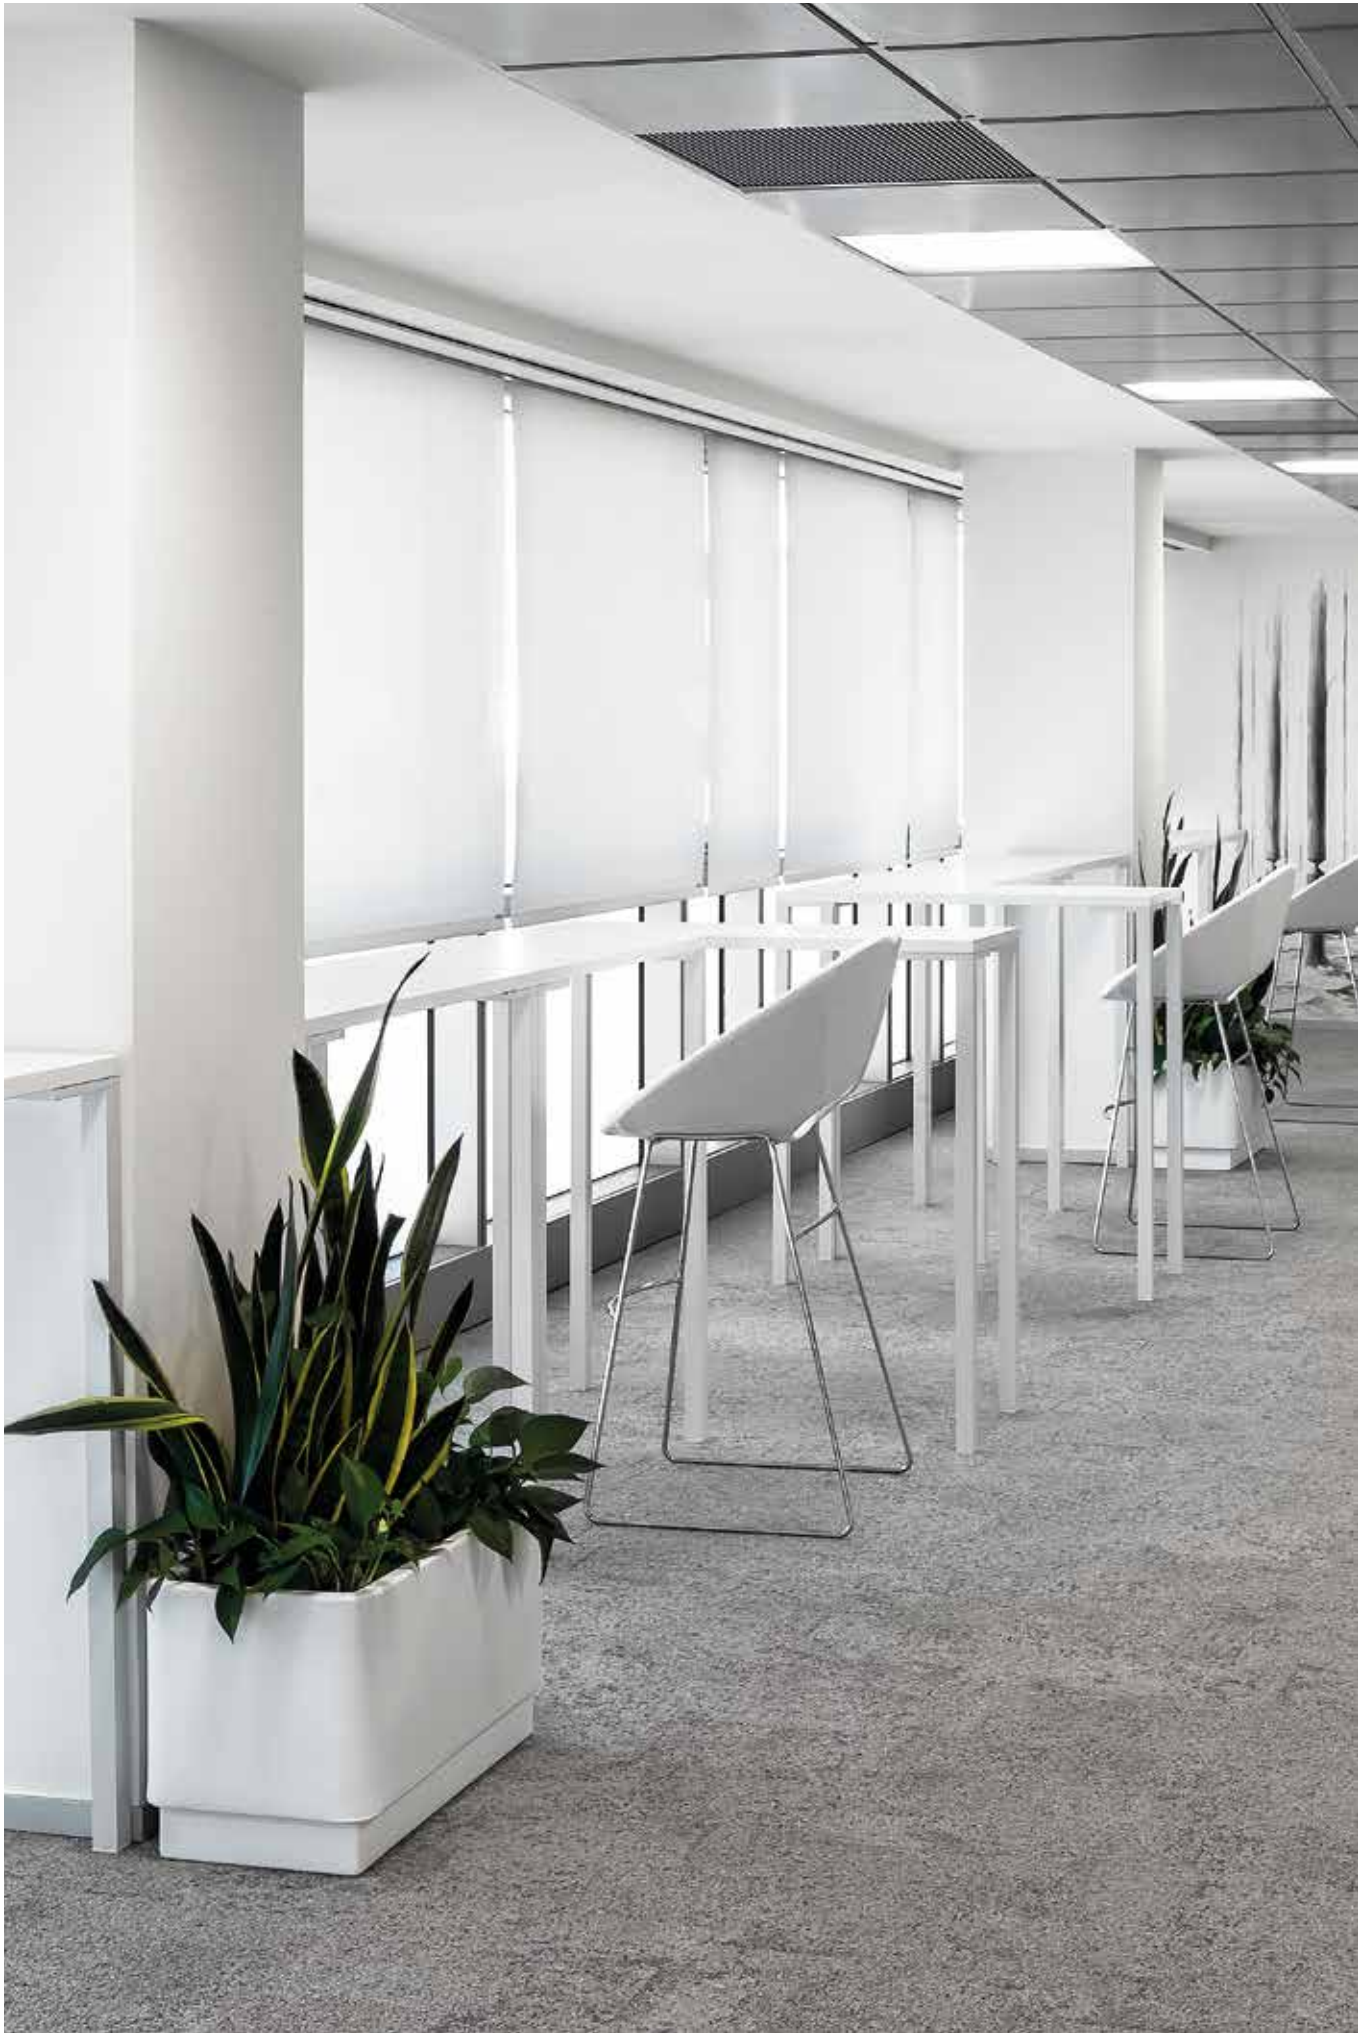

Imagine a workspace that adapts to the working day, where lighting control, natural light and temperature can be adjusted to the needs of its users, the time of day, the amount of light and the sensations to be transmitted; and manage energy efficiently, using only the amount of light needed.

We offer solutions for all types of workplaces, from small premises to large projects, compatible with building management systems and providing intuitive interaction through a variety of interfaces.

Smart control.

Define and configure all the nuances of light, adapting them to the ambience and atmosphere you envision.

Dimming: Adjust the intensity of lighting by adapting the lighting levels to the real needs at any given moment.

Colour temperature: Select different tones of light, from warm to cool, depending on the context and type of space.

Biodynamics: Synchronise artificial light with the natural daylight cycle to make interior spaces more human, adapting them to the different times of the day to generate areas of well-being.

Compatibility: Universal solutions, compatible with standard control technologies (1-10V, DALI, PWM, KNX...).

Customised lighting.

We collaborate with all parties involved in refurbishment and new construction projects, offering personalised advice to each professional at all stages of the process, from the creative and design phase to installation and commissioning.

Our sales team and project department will support you in bringing your ideas to life and integrate all of the solutions: mechanisms, iO ecosystem, indoor and outdoor lighting, control systems, connectivity and electric vehicle charging, providing all the after-sales and technical assistance services you need.

Simon has 4,000 professionals around the world, and we are ready to be by your side in over 90 countries with 9 production centres.

We support you.
Before, during and
after the project.

WORKPLACES

OPEN WORK SPACES

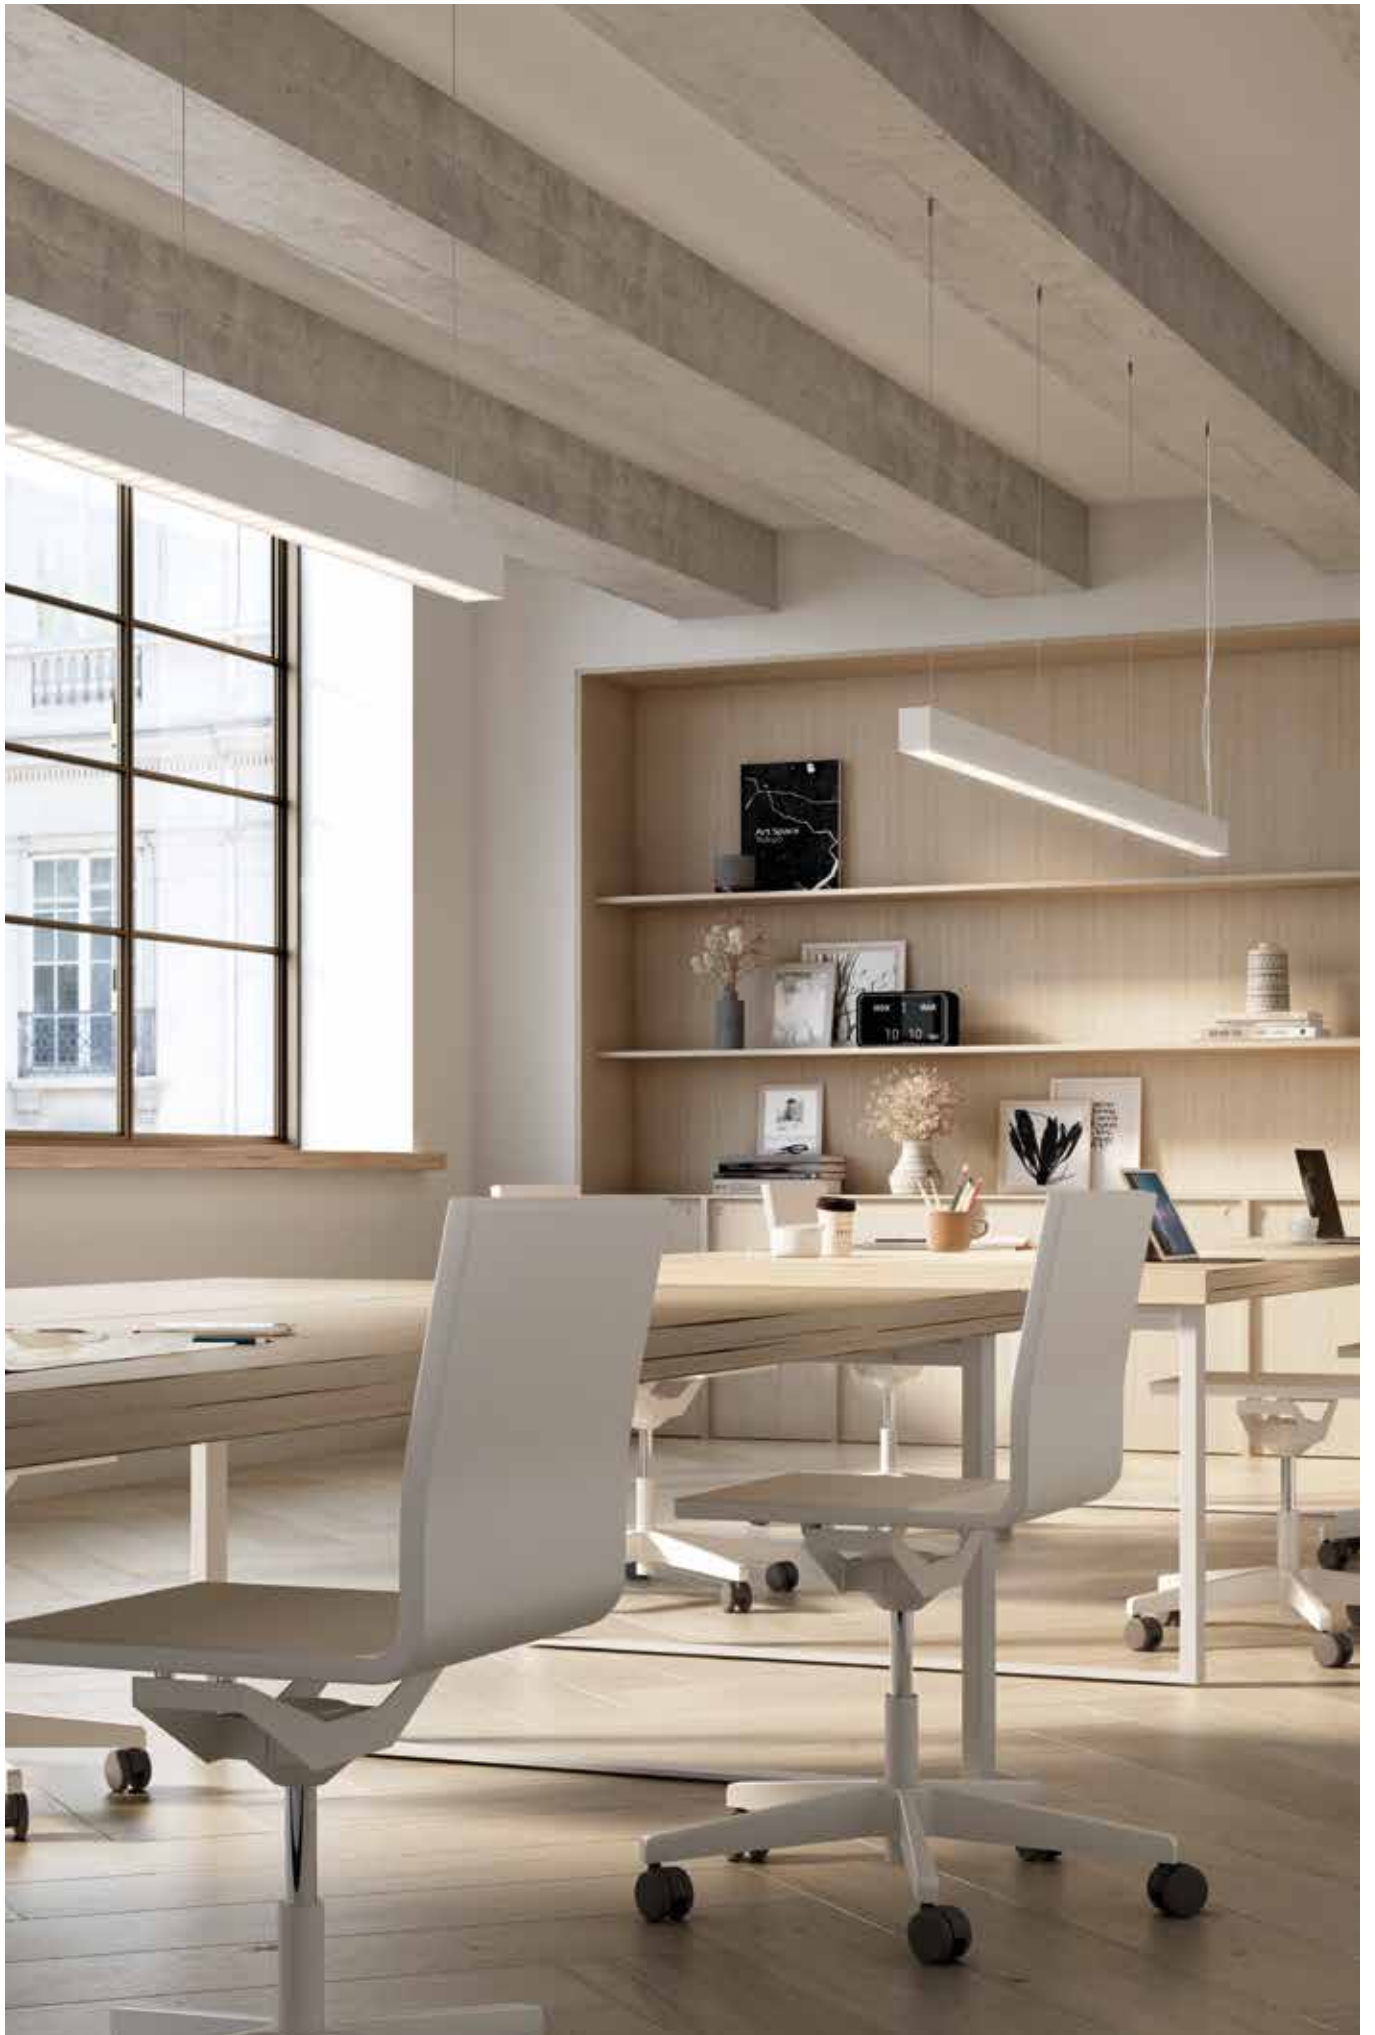

REST AND SOCIAL AREAS

MEETING ROOMS

OFFICES/STUDIOS

RECEPTION AND TRANSIT AREAS

OUTDOOR AND PARKING

1
Simon 720 Biodynamic

Synchronise the lighting of the space with the natural light in the environment, and create an inspiring, healthy and optimistic atmosphere.

2
Simon Slim & Drop

Create customised designs adapted to the space, where light is used when needed.

3
Simon 500 Cima Floor

Kits configured with the most common combinations for each application, including high speed voice and data, charging, sockets, etc.

4
Simon Hub Pro iO

The gateway to the Simon iO universe. Store all the information about your installation, connect mechanisms, configure experiences and schedules.

5
Simon Scena

Control everything conveniently from a single point by centralising the management of all features.

OPEN WORK SPACES

6
Simon 100 experience control panel

Configure up to 4 different scenes automatically by controlling several iO elements simultaneously.

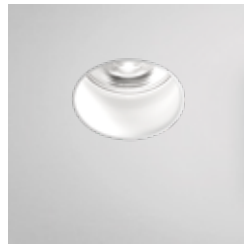

7
Linear lighting

Avoid direct lighting and balance the flow of light to ensure maximum visual comfort.

8
Simon 100 switch

A convenient and simple product line that pays attention to every detail, in a matt or glossy finish to highlight its elegant aesthetics.

9
Simon Hole

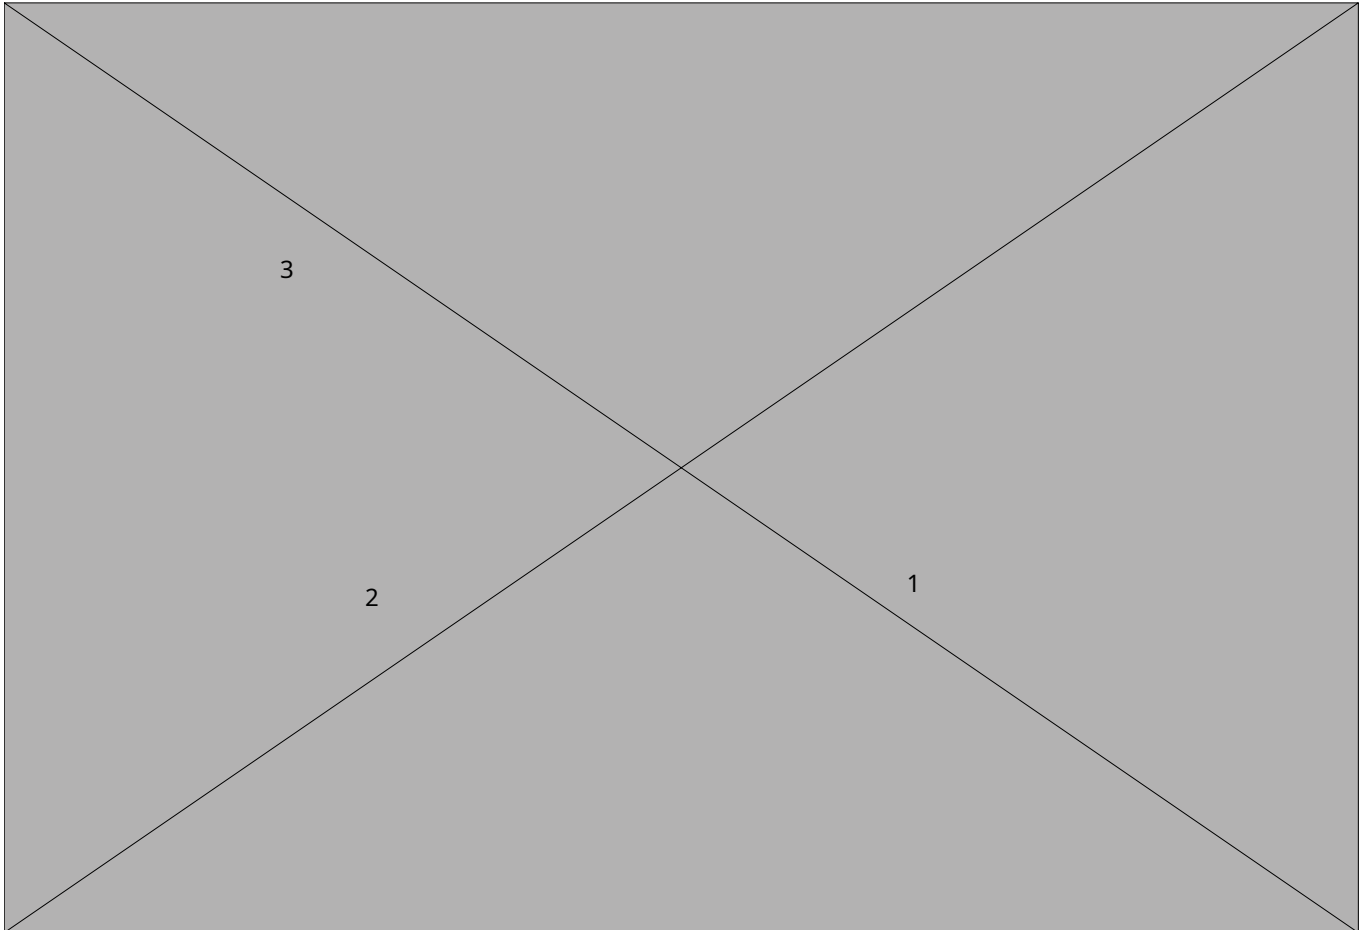

Tiny gaps of light perfectly integrated into the ceiling, creating a pleasant lighting.

10
Simon 810 linear lighting

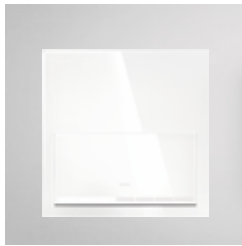

Light turns into a pattern that blends seamlessly into the space, becoming part of walls, ceilings, furniture and structural elements.

Open work spaces have become the heart of workplaces; they are the busiest areas, where both collaborative and individual work come together. Flexible spaces capable of adapting the lighting and all the necessary functions to achieve well-being, comfort and energy savings.

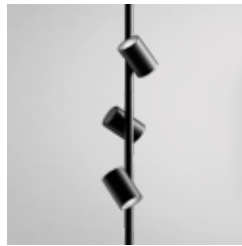

1
Simon 400

Integrated in the desk, it takes up as little space as possible in order to optimise the useful work area to the maximum.

2
**Dimmer switch
Simon 100**

Control and adjust the intensity of light. The LED indicator lights are activated progressively as you gently slide your finger across the touch surface.

3
Simon Slim & Drop

Structural lines and focal points arranged freely and projecting over the working area.

OPEN WORK SPACES

Open-plan spaces accommodate multiple desks where all connectivity and charging resources need to be optimised. Even with a communal general lighting concept, users must be provided with individual lighting to suit their needs.

4
Simon 400 double

Multiplies the options and makes it easy to use from either side of the desk, perfect for shared work areas.

5
Linear lighting

Linking linear sections together creates infinite lines of light to suit custom requirements.

6
**Simon 500 Cima
Metallic**

For a subtle look, the stainless steel finish creates a neutral effect in the room.

7
**Thermostat *
Simon 100**

Automatically maintain a cosy temperature in the room. Or if you prefer, you can manually adjust the temperature to your liking at any time.

The multi-purpose desks in shared spaces are flexible elements that can be used as improvised meeting rooms or dynamic workstations to connect to when necessary.

* Decentralised system. Suitable for private or small offices that do not require a centralised control system.

OPEN WORK SPACES

Spaces are powerful means of communication that contribute to the experience of whoever enters these physical locations. The right combination of lighting and natural light can convey the sensations that define who and what a brand is like.

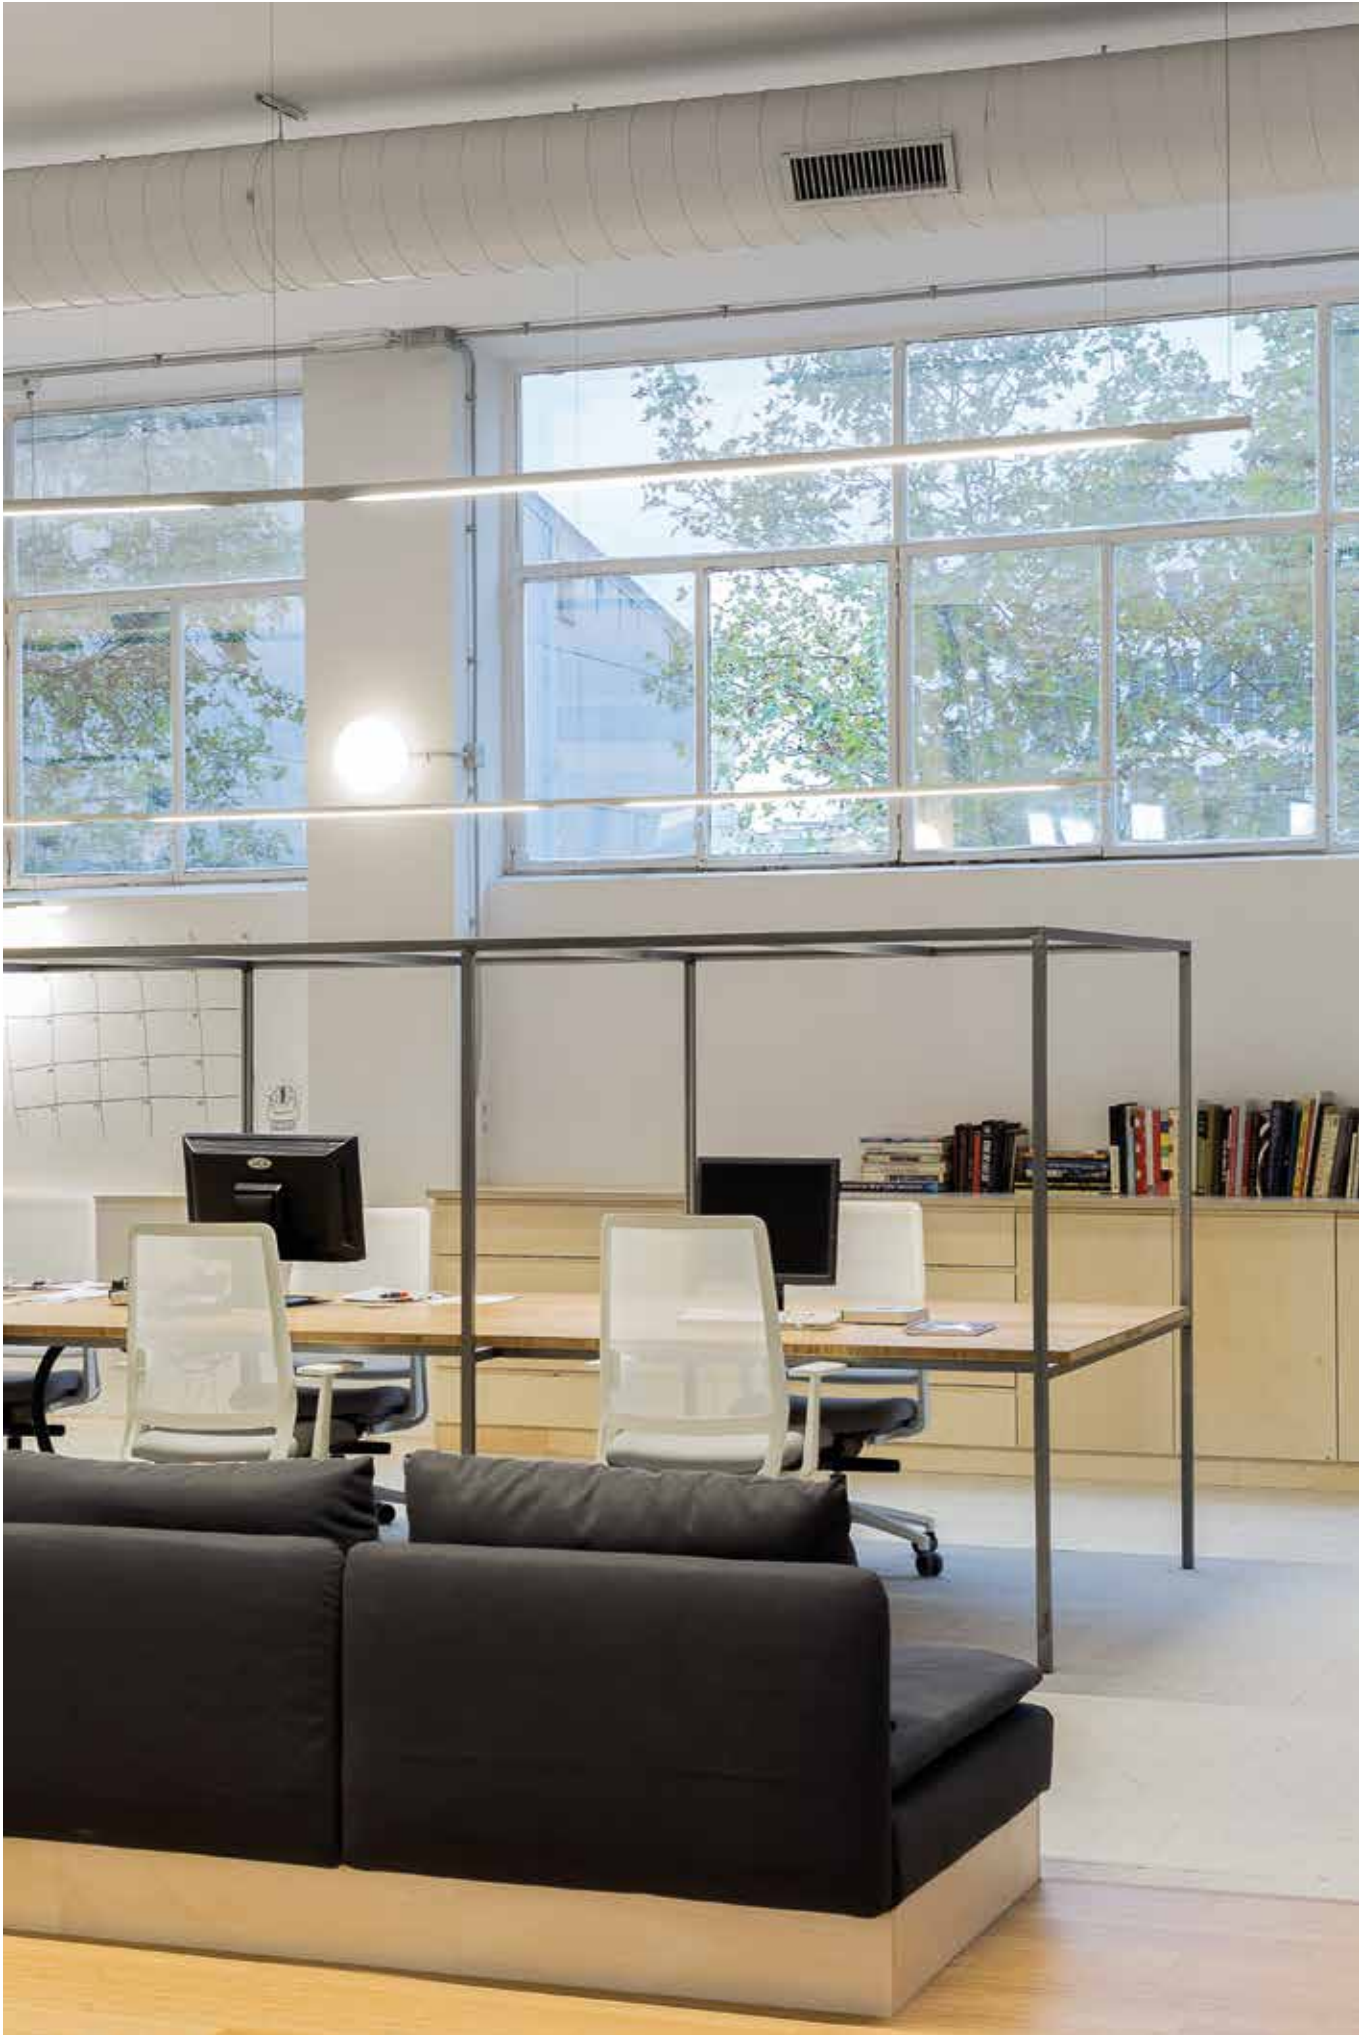

OPEN WORK SPACES

The key to sustainability lies in finding a balance between all the different factors that go into designing a project according to the individual needs and characteristics of the space and its surroundings. In this way, energy loss is minimised through sensible energy consumption.

The well-being of employees is essential for good productivity. Therefore, it is necessary to provide equipment that offers the greatest comfort, such as systems and lighting that respect the circadian cycles.

OPEN WORK SPACES

Slim System makes it possible to create bespoke configurations with an infinite number of options to perfectly adapt to the space. Suspended or recessed structures that illuminate in a linear and minimalist way.

Warm ambiances in large areas for a more personalised and human attention, preserving the brand identity in corporate offices.

OPEN WORK SPACES

All Simon products can be combined with each other to satisfy different needs and thus offer complete, personalised and specific solutions for each type of workstation.

A versatile space, where manual control is combined with programmed control, with the utmost respect for natural light.

OPEN WORK SPACES

The connective experience control panels that are part of the Simon 100 and Simon 270 mechanism ranges allow scenes to be created that achieve the desired ambience.

In a large corporate space, it is important to know how to translate a comprehensive idea of the different work areas. The control systems allow the light intensity to be adjusted across different spaces: open areas, offices, lounge areas, meeting rooms or reception areas.

OPEN WORK SPACES

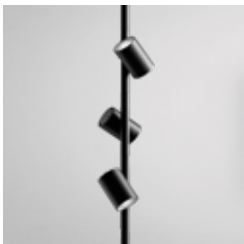

Our connectivity solutions enable seamless connectivity regardless of the format of the space. We adapt to you.

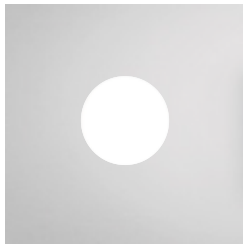

Open-plan areas that perfectly integrate different Simon solutions, remaining focusing on a single objective: the well-being of people.

1
Simon Slim & Drop

Design and functionality always go hand in hand with Slim & Drop. Create your own configuration and adapt the intensity and direction of lighting to suit the occasion.

2
Simon Mood 25

Points of light that guide you and envelope you with every step, making isolated areas feel more integrated.

3
Downlight Simon 640 suspended

Suspended lighting is the ideal addition for spaces where the balance between functionality and decoration is paramount.

4
Simon 400 surface

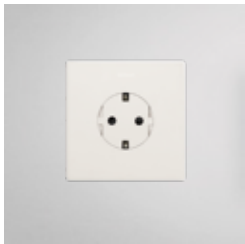

Comfort in the workspace is essential. That is why S400 puts everything you need in your day-to-day life in easy reach without obstructing your work area.

5
Simon 270 icon dimmer switch

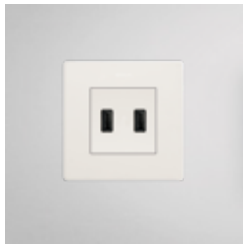

Adjust the intensity of each light manually or use iO technology to control it effortlessly and easily via the Simon iO app or voice assistants.

REST AND SOCIAL AREAS

6
Clean schuko
Simon 270

CLEAN schuko reinvents the traditional socket format, incorporating a flat surface flush with the wall to make it fully integrated and neat.

7
Simon 270 USB Quick & Smart Charge
USB Charger

Quickly charge your devices thanks to QuickCharge and SmartCharge technologies which allow you to stay connected at all times.

8
Downlight Simon 704

With its compact and minimalist aesthetics, the Simon 704 can be combined with various frames and lenses for general lighting or accent lighting.

9
Downlight Simon 725
Comfort

They provide pleasant, homogeneous ambient lighting, ideal for use in rooms where uniform light and visual comfort are required. Essential for a pleasant working environment.

10
Linear lighting. Surface-mounted profile
Simon 810 USB Quick & Smart Charge
USB Charger

They go unnoticed due to their small size, enhancing the lighting.

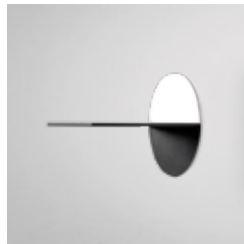

Rest and social areas are informal meeting points for workers; spaces for brainstorming and relaxing, for chatting or taking a break in a stimulating atmosphere, or even sharing a coffee with colleagues or customers. Create an oasis to escape the monotony and build up a rapport with the whole team.

1
Simon 400 surface
 Sockets, USB chargers and multimedia connectors. Convenient and ready to use at any time.

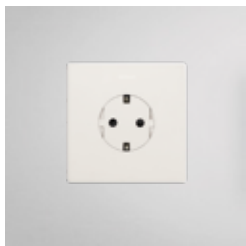

2
Simon 270 blinds switch (without HUB)
 Adjust the amount of natural light you want to let in.

3
Simon Loop
 Configurations and customisable sets that combine light and shadows, playing with the flow of light and the 360° rotation of each independent element, to create authentic working environments.

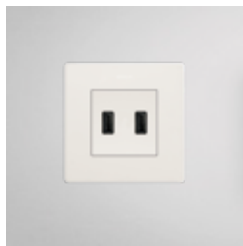

REST AND SOCIAL AREAS

Create an area to rest and take a break, alone or with company, even with clients or collaborators. This type of space generates very positive dynamics for workers, helping to inspire them and promoting creativity and productivity.

4
Simon 270
Clean Schuko

The cover of the auto-cover magnetic system moves automatically, thus preventing the build-up of dirt on the inside, making it easier to clean and extending its durability.

5
Simon 270
Double USB A charger

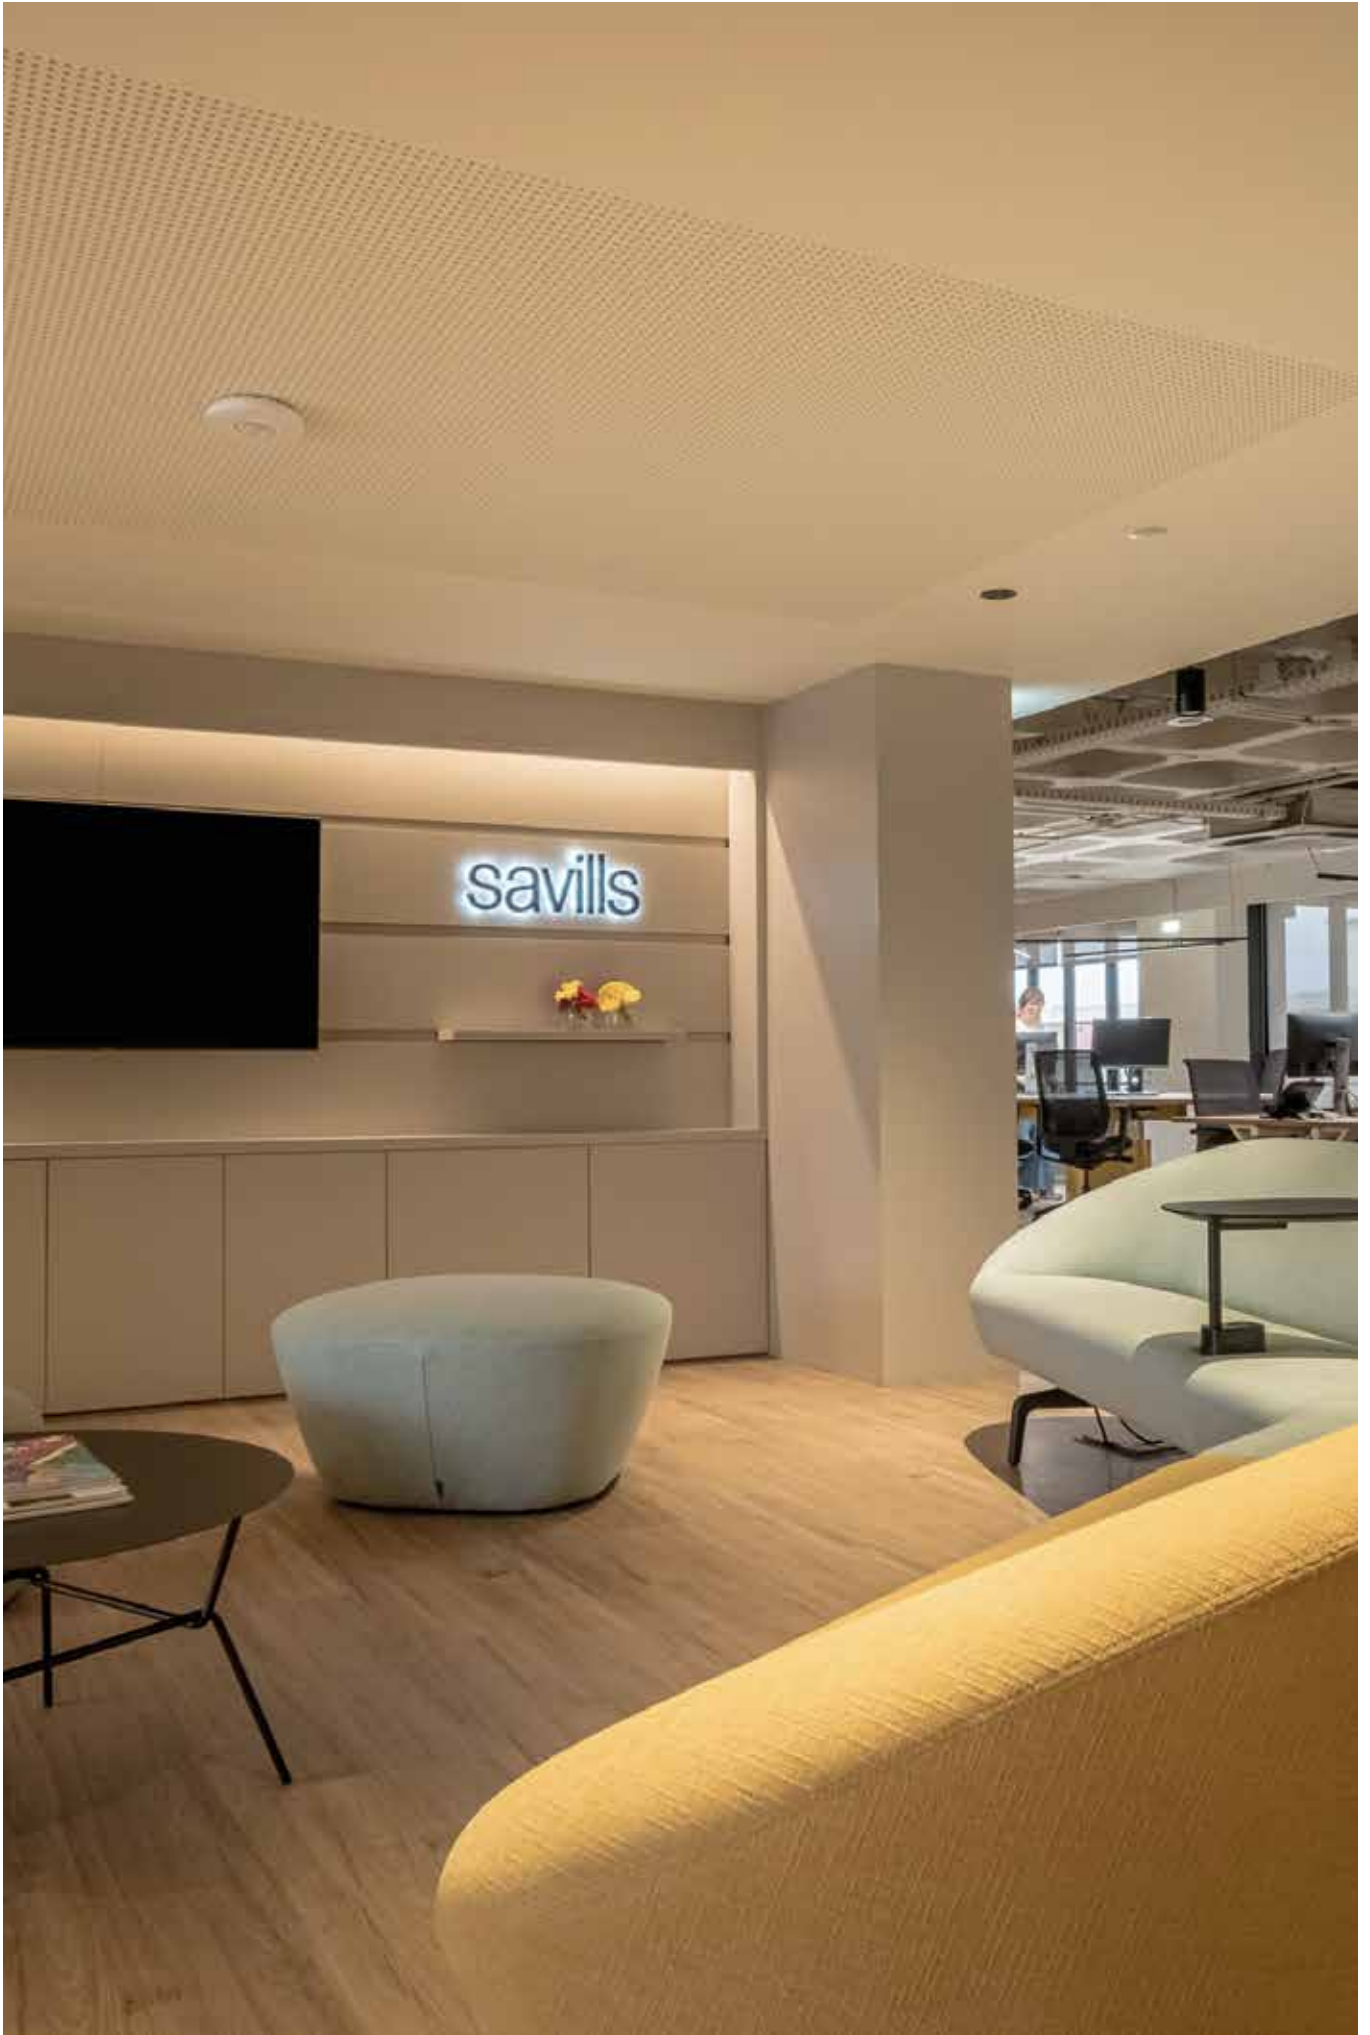

Optimise space by increasing comfort, always paying attention to practicality and the needs of the user.

6
Linear lighting. Angle profile
Simon 810

Specifically designed for installation in corners. They direct the light onto a specific area, illuminating the useful surface. They provide complementary and courtesy lighting.

An extension of this shared social space for changing the atmosphere and break the routine to chat, eat or have a drink. Depending on your workplace project, design a welcoming recreational space equipped with everything you need.

REST AND SOCIAL AREAS

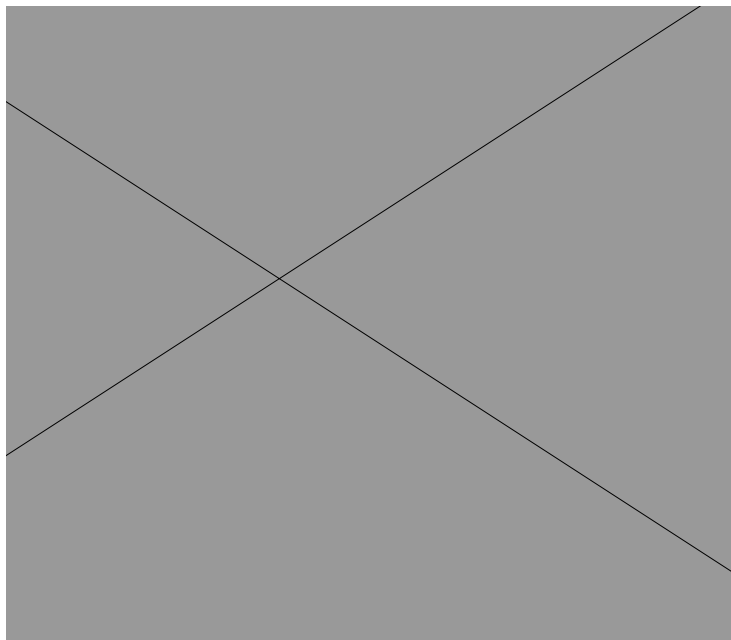

REST AND SOCIAL AREAS

Simon spotlights enhance volumes and highlight details with a crisp beam that casts light on the things that matter most to you.

Linear designs that run along the walls and ceiling filling the space with light and emphasising the dimensions of open areas.

Taking into account the characteristics of the space in order to make the most of each area and add character to them with the appropriate product and light flow.

REST AND SOCIAL AREAS

As many lighting options as there are spaces. Simon has a wide range of products to find what best fits your project according to the particular dimensions, textures and colours.

Corners that become meeting points at different times of the day require practical elements to stay connected, such as the Simon 400, or the integrated functions offered by the various series of Simon mechanisms that include USB chargers.

For those moments when we need privacy for meetings, presentations or collaborative work sessions. Flexible rooms equipped to become different versions of themselves depending on the purpose for which they are to be used.

From small meeting rooms for one-off meetings or individual concentration, to large auditoriums to bring together a whole audience.

Integrate connectivity and USB charging solutions in the furniture and other architectural elements and design lighting capable of adapting to every situation.

Meeting rooms

MEETING ROOMS

MEETING ROOMS

In meeting rooms and offices, simplicity in connectivity and employee comfort reigns supreme.

Neutral solutions adapted to each room and space to achieve the desired atmosphere according to their intended activity and function

MEETING ROOMS

The combination of decorative lighting, equally functional, such as Simon Loop, bring warmth to transform any work environment into an elegant and comfortable space.

Clean surfaces keep the workspace uncluttered so that nothing gets in the way of your creativity.

MEETING ROOMS

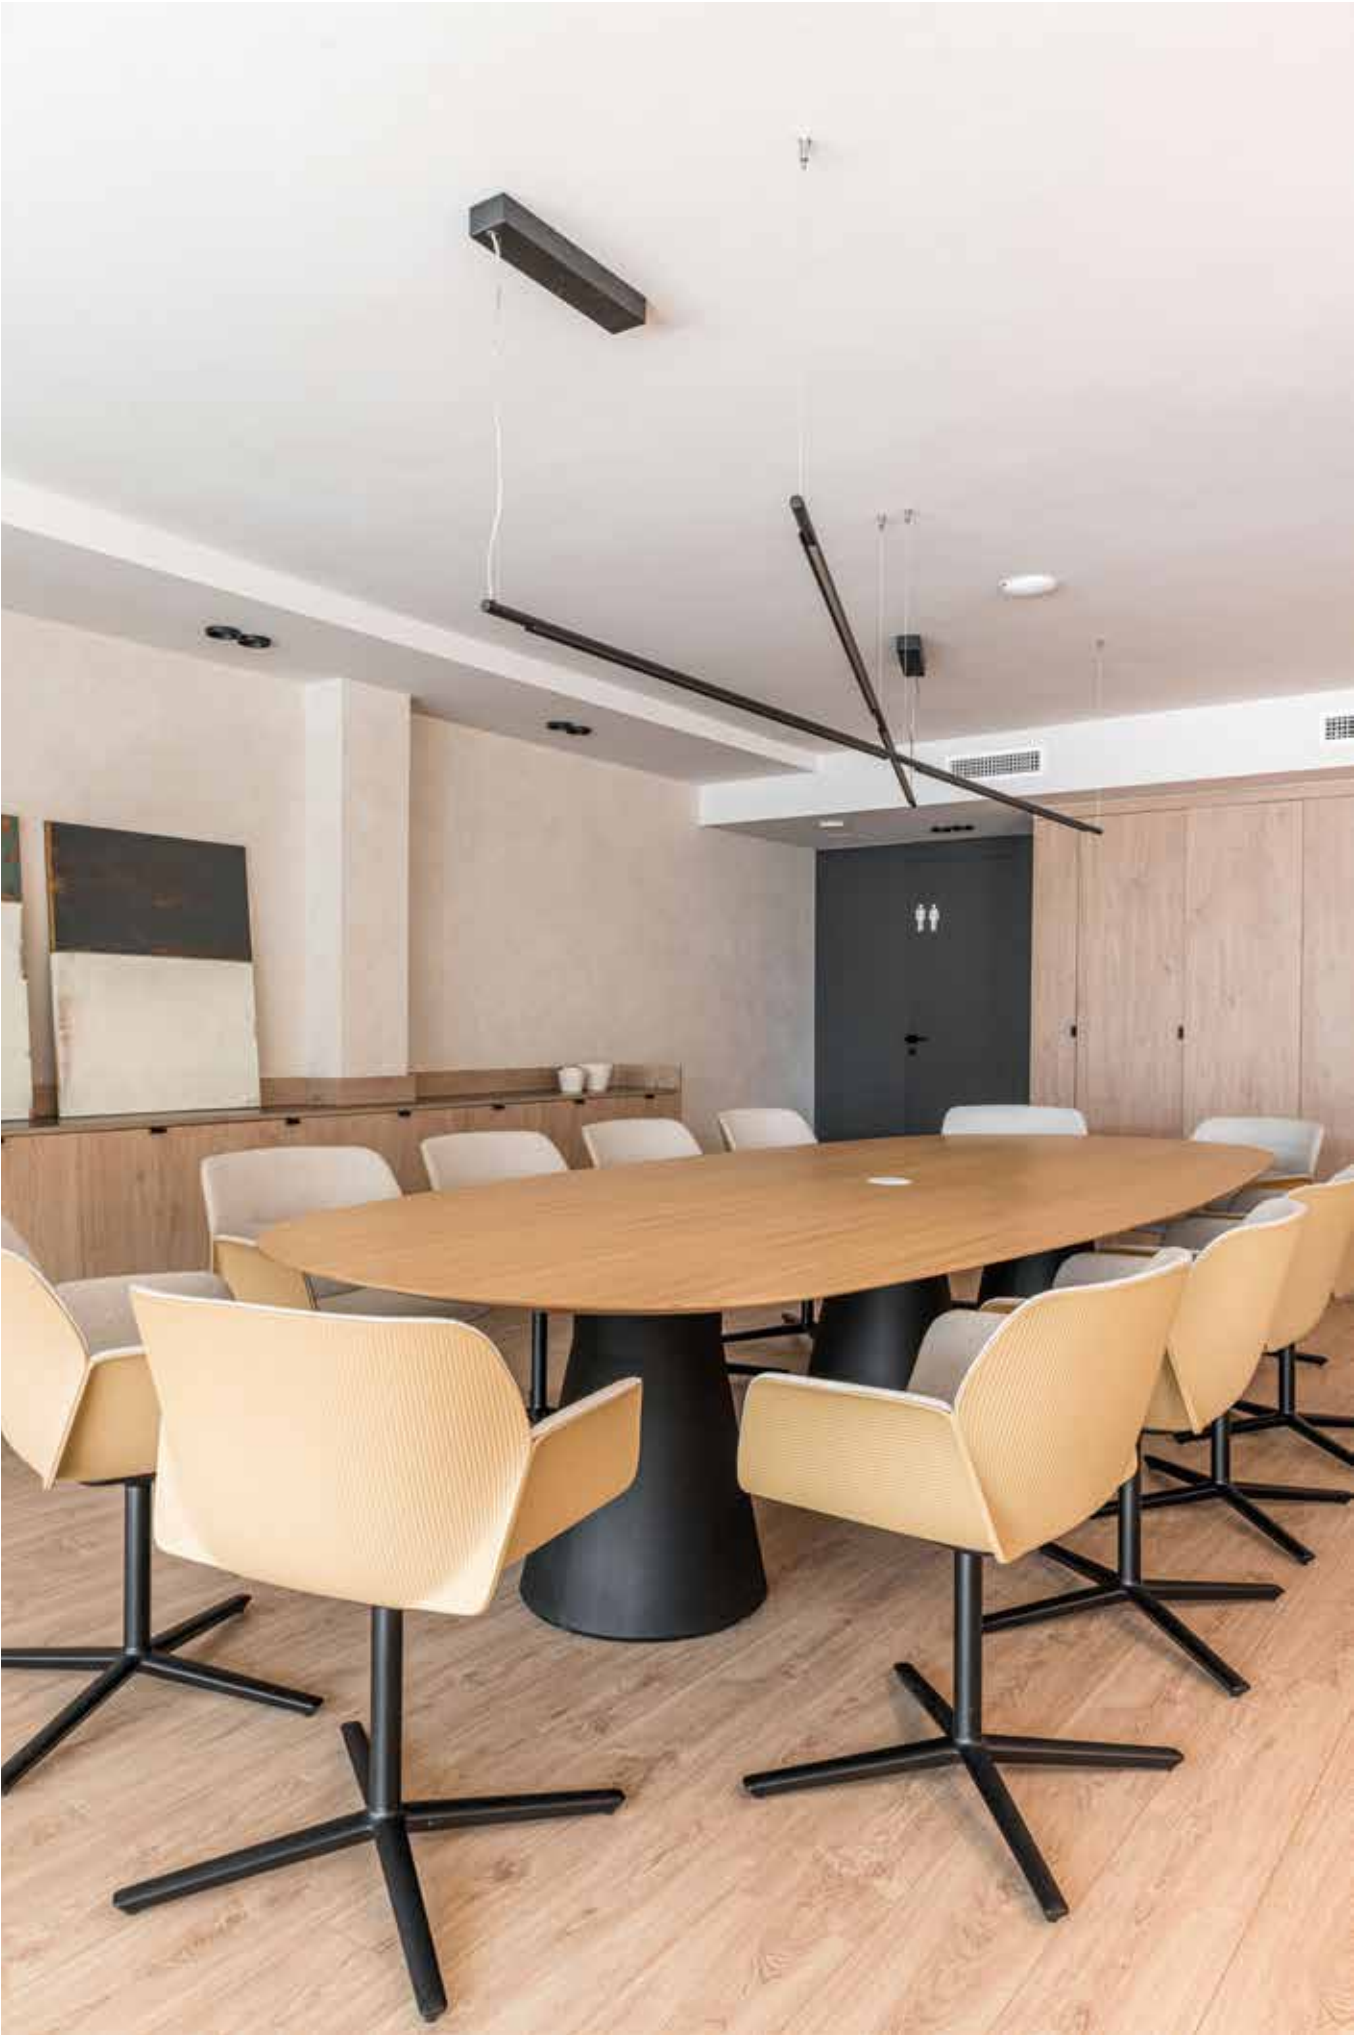

In demanding environments, visual comfort is important. That is why the structural modules of the Slim System allow 360° rotation to direct the flow of light.

Our solutions are configurable, providing a variety of options according to needs and preferences.

MEETING ROOMS

Nowadays, the flexibility of each work area is increasingly important, and this entails new requirements. Simon solutions make reconfiguring spaces and meeting the demands of new working methods under this paradigm shift possible.

The customisation of finishes, shapes and layout of the elements create unique and special environments that help to visually transmit the identity and culture of the company.

MEETING ROOMS

Link different IoT devices with lighting and control systems, such as smartphones or voice assistants, and digitise spaces to create unique experiences.

Suspended lighting provides accent or general lighting, helping to differentiate ambiances.

MEETING ROOMS

With our dynamic lighting solutions, artificial light can be synchronised with the natural light cycle to make interior ambiances more natural and adapted to the needs of the people who use them.

In both large corporate workspaces and small studios, there may be circumstances that require individual offices. Many professionals require an intimate and cosy space where they can find inspiration, concentrate or have a conversation.

Anticipate people's needs, design desks that invite them to create, where solutions are integrated harmoniously without taking up space, while comfortable light inspires, improving productivity and well-being.

Offices and studios

OFFICE/STUDIO

OFFICE/STUDIO

Simon 810 subtly highlights shapes and structures creating spaces with volume and depth. It can be mounted directly on to the wall or integrated into furniture.

OFFICE/STUDIO

Simon Arch provides pleasant, homogeneous general lighting.

OFFICE/STUDIO

The linear lighting balances the concepts of technical performance, quality, design, efficiency and versatility to achieve maximum well-being and comfort in working environments.

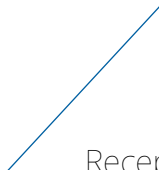

Simon 400 is available in surface-mounted or flush-mounted versions.

OFFICE/STUDIO

Slim System is a configurable system that facilitates light compositions in any direction as well as a combination of vertical and horizontal sections.

Reception areas receive us when we enter a workplace, they are entry points for workers, clients, suppliers, etc. Welcoming environments that invite us to make a first contact or guide us towards the rest of the spaces. Depending on the type of workspace and the values of the company, they are equipped with reception desks, courtesy seats, auxiliary furniture or corporate elements, as well as all the necessary functions: USB charging, centralisations, connectivity... Lighting can help in creating the right atmosphere and guiding people inside.

Reception and transit areas

RECEPTION AND TRANSIT AREAS

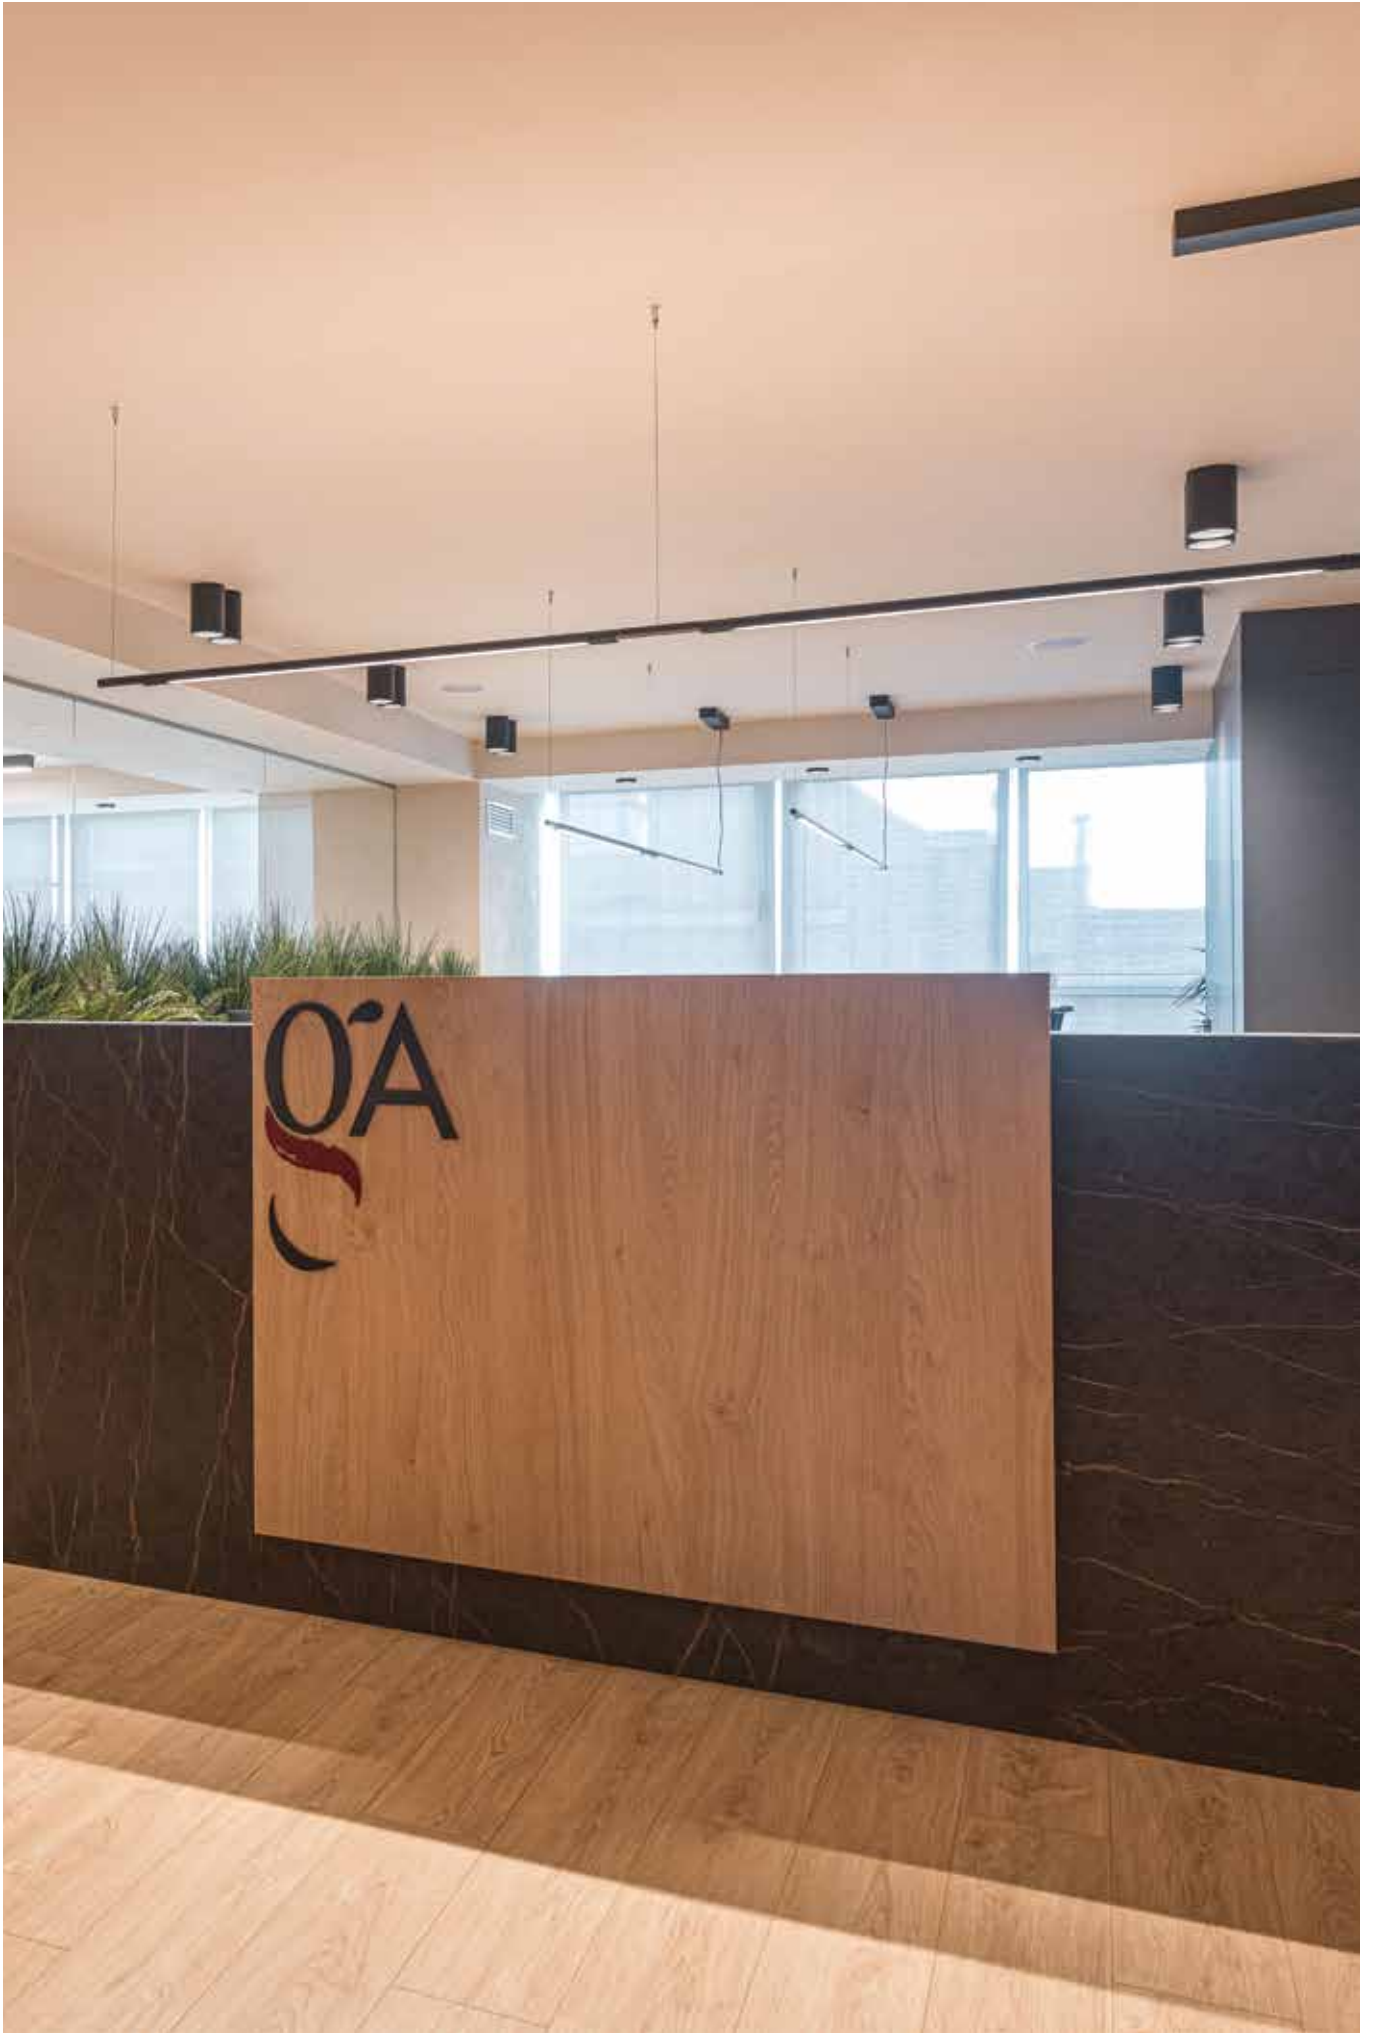

RECEPTION AND TRANSIT AREAS

Downlights offer a wide range of options thanks to their diverse sizes and installation systems.

An environmentally sustainable work area minimises its negative ecological impact, for example, by reducing its energy consumption. Each Simon project is adapted to the specific needs of the space in order to optimise energy use as much as possible.

RECEPTION AND TRANSIT AREAS

Biodynamic lighting emulates natural light to promote a proper circadian rhythm, directly benefiting people's health. During the day, biodynamic lighting automatically self-regulates according to sunlight during the day and night.

Combine different Simon lights that you can control by using the switches from the various mechanism ranges and you can choose from a wide selection of models and finishes.

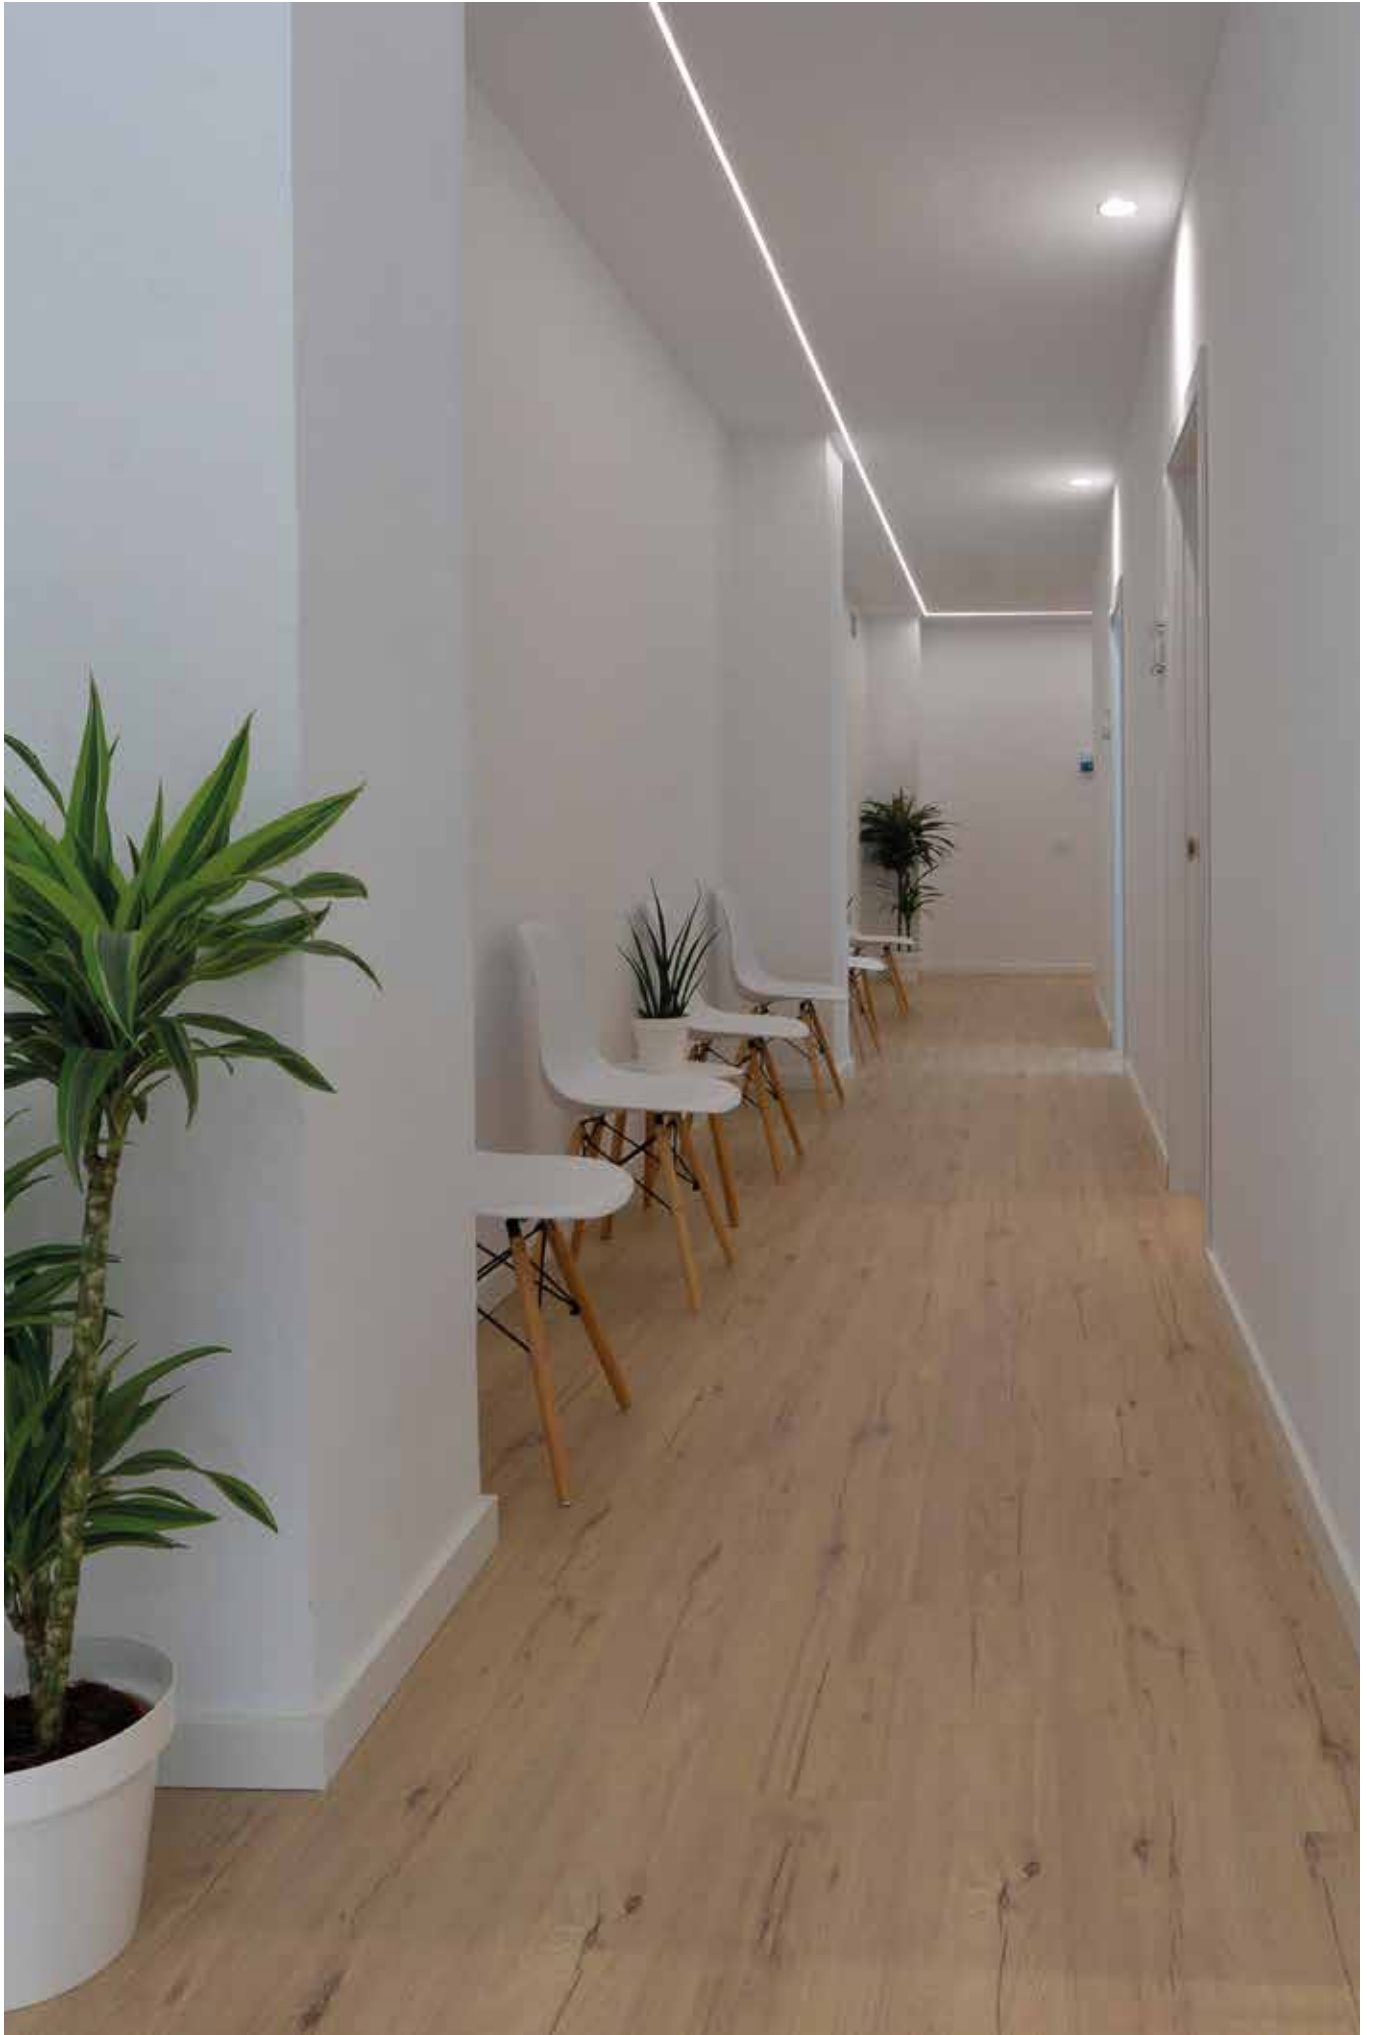

RECEPTION AND TRANSIT AREAS

Simon Arch integrates into the space exactly as you would want it to: flush-mounted or surface-mounted. It also allows the light to be directed in any direction without the need to move the light.

Warm lighting envelops you in those areas that are quieter and more isolated from the rest, where peace and tranquillity dominate.

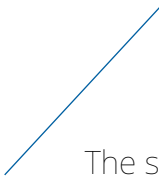

RECEPTION AND TRANSIT AREAS

Downlights that act as points of light, in a small and compact design.

Simon has a wide range of mechanisms that can match the different colours, textures and shapes of the environment.

The size of the workplace, as well as the location, determines the type of outdoor space on which it is built, which influences its design and type of equipment. The lighting of façades, driveways or garden areas should be well planned, providing both the necessary functionality and aesthetic criteria. Car parks where there is no lack of charging points for electric vehicles and the lighting ensures safety and guidance.

Outdoor and parking

OUTDOOR AND PARKING

OUTDOOR AND PARKING

Simon Aqua is ideal for outdoor use, with a high level of protection against the accumulation of dust and dirt, the switches are also protected against water and adverse weather conditions.

OUTDOOR AND PARKING

Simon is committed to sustainability with its electric vehicle charging points, focusing on electric mobility to contribute to the goal of achieving a cleaner future. Simon SM20 Business is the ideal solution for charging electric vehicles in hotels, commercial areas, company car parks and offices.

Outdoor lighting such as Iraya to promote the safety, sustainability and functionality required in every environment in both public and private spaces.

OUTDOOR AND PARKING

Range of highly resistant watertight lighting suitable for the general lighting of car parks, subways, storage areas...

Simon lighting provides high quality light, reducing light pollution and energy consumption.

OUTDOOR AND PARKING

Simon urban lighting provides the necessary lighting in urban and private environments with maximum energy efficiency.

Floor boxes with a high degree of protection against water and dust designed to ensure that your mechanisms work correctly and are long-lasting, especially when installed outdoors.
