SAFEROAD

We create safe places where people want to be.

For more than 65 years, Saferoad Citylife has developed quality products that invite people to enjoy safe and comfortable public spaces. We bring people together - and that goes for our projects, too. In every assignment, we take on an advisory expert role, keeping the bigger picture in focus and staying by your side from start to finish. To help you make smart decisions in your project, we've grouped our product range into three levels - GOOD, BETTER, and BEST. That is how we, together, can create sustainable urban environments that truly work - today and for generations to come.

Good

Better

Best

GOOD, BETTER OR BEST?

We have established a clear product structure to make it easy to see that we can support projects of all kinds - large or small, with different conditions and goals. Sometimes function matters more than aesthetics; other times budget outweighs design. Our approach helps you quickly understand what trade-offs, if any, your project may require - all based on its needs and boundaries.

YOUR ADVISORY EXPERT PARTNER

Our sustainably produced, Swedish-made products are only half of what we offer. The other half is our experience. When you work with Saferoad Citylife, you gain an advisory partner who walks with you from idea and planning to delivery and final installation. We're here to make your project smoother along the way - and to ensure the place becomes better once it's finished. Always with focus on the people who will meet and live there, today and tomorrow

Good

Sometimes “good” is the smartest choice.

Our products in the Good category offer a baseline quality that's higher than most of what's available on the market today. Every product is produced in-house, made in Sweden, and built from hot-dip galvanized steel with the option of powder coating — resulting in a product that will last for generations. As standard, we also work with a modular approach that enables easy installation and service, along with a 50-year corrosion warranty included in all Saferoad Citylife products.

This product level is designed for those who primarily prioritize functionality and cost-efficiency — but still want solid quality. Here, simplicity becomes the luxury. Value becomes the smart choice. We offer robust constructions and design focused on fast installation and low total cost of ownership. These products are ideal for environments where function and price outweigh a high degree of design and aesthetics.

Park Furniture

VB	Swing Barrier L 3,5 - 5,2 m / 4,7 - 6,6 m / 6,1 - 8 m
PS	Collision protection W/Wo Sign plate
PR	Parking Rail
RB	Planter Rail

Better

Products that improve every public space.

Our Better category is defined by a high level of quality. Like all our offerings, these products are produced in-house, made in Sweden, and built from hot-dip galvanized steel with optional powder coating and a 50-year corrosion warranty, ensuring long-lasting durability. The entire range includes our modular design approach, making installation and service both simple and efficient.

The difference compared to the Good level lies in flexibility. Here, you get more options in color, form, and add-ons — combined with a design that is more refined and visually integrated into its surroundings. These are products that not only deliver on function but also help create cohesive, attractive environments where people feel welcome. This makes the Better range ideal for public spaces and projects where quality, expression, and overall impression matter.

Park Furniture

Best

When a place deserves nothing but the best.

The Best category represents our highest level of ambition, where function, aesthetics, and innovation come together. Here, we offer maximum design freedom, customized solutions, and integrated features such as lighting, signage, or sensors, creating a beautiful, inviting, and safe overall experience. As with all our levels, these products are produced in-house, made in Sweden, and built from hot-dip galvanized steel with a 50-year corrosion warranty. Additionally, this category offers the option of dual surface treatments as powder coating and anti-graffiti coating — for even longer lifespan and a true premium appearance.

This is a range built for prestige environments, projects with high architectural ambition, and places where both function and form must meet the highest standards so people can thrive. This product range is ideal for public spaces and for projects where quality, expression and overall impression truly matter.

citylife®

Shaping the sustainable cities of tomorrow for generations to come.

We work with a holistic approach and offer a broad portfolio of products for public spaces. From railing and barrier solutions that make streets and squares safer, to furniture that enhances urban outdoor environments.

With Scandinavian design, quality, and high functionality - combined with our expertise throughout every stage of a project - we create long-lasting solutions built to endure for generations.

Saferoad Group is one of Europe's leading companies in road safety, with more than 75 years of industry experience. The Group offers a wide range of high-quality products designed to shape infrastructure and contribute to a safer everyday life.
