

## Seating Inspiration

Adaptable. Durable. Elegant.

## Making Space Work

Create an exceptional seating unit that matches the form, function, and style of your project. With cross braces or side panels for support, the GRID modules transform into an endless array of seating possibilities.

With the GRID system's flexible modularity, you can create a design that is completely unique. Sit back and let our seating catalogue inspire your next interior project.

# 1

More than a space for waiting, your seating unit can bring new life into your reception area. The shape of this eye-catching unit encourages exploration from all angles. Soft upholstered seats surround the unit and creative spacing makes the experience more comfortable for individuals and small groups. Built-in magazine displays on the front and back showcase materials and provide entertainment, and oak plant boxes add greenery and a warm colour balance.

## SPACE BETWEEN SEATS

# 2

The flexibility of the unit makes it easy to kick back, relax – even take a short nap. Cross braces at the base not only strengthen the modules, they also give the unit a lighter and more open look. This two-level square structure uses white GRID with elegant grey upholstered seats and unpadded white top panels. While unpadded top panels can be used as seats, they are also foot rests for unusual seating positions, side tables for a cup of coffee and steps to access the upper level.

## SOFT & SQUARE

# 3

Are you planning an outdoor pop-up event or a more permanent urban seating installation? GRID modules, cross braces and specialised plywood top panels are durable, weather resistant and suitable for outdoor use. This four-level seating unit features a tiered design so you can sit close to the ground or climb to the top for a more interesting view. Whether you are eating lunch, watching a concert or taking a break, this seating unit lets you see the city from a new perspective.

### GRID components

## POP-UP VIEW

# 4

This informal structure transforms your space into a lush meeting ground. A calm and natural balance of oak, grey and earth tones set the scene for this oasis of social activity. While the two units face one another, portable single seats are scattered around the units for more seating flexibility. Small or large groups can explore its three-tier structure and take refuge in its corners as they gather for discussions, lunch breaks and hangouts.

### GROUP 1 - GRID components

## SOCIAL OASIS

# 5

Make your display multifunctional. First, cover the wall with GRID modules. Remove single modules to accommodate pipes, beams and angular wall shapes. Lastly, add an open-storage bench at the base. This minimalist combination contrasts white GRID with black seating panels for a bold visual effect. While the display offers comprehensive product overview, bench seating provides space for customers to sit down, browse merchandise and try on shoes.

NOTE: Wall-mounting is necessary.

## OPEN TO BROWSE

# 6

Room divider, seating, display – this simple design optimises space and enhances functionality. Ideal for a café or restaurant, the structure acts as a room-in-room divider that separates space with seating on both sides. The black base is solid and upholstered black seats and backrests are added for more comfortable seating. The top frame uses black GRID modules with oak panels, plant boxes and open shelving for a lighter and more open aesthetic.

### GRID components

## BACK TO BACK

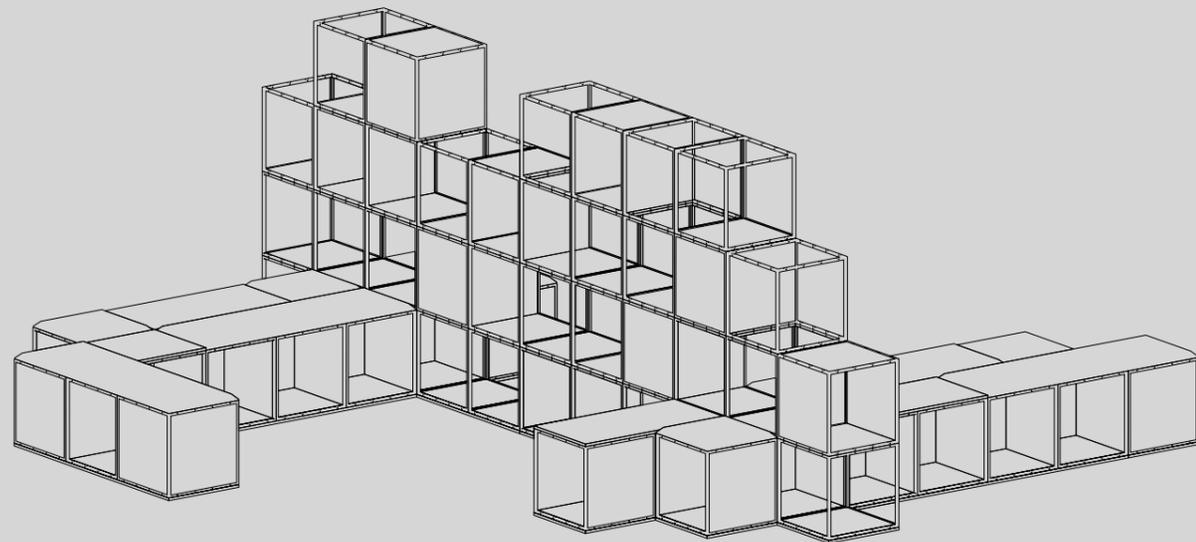

# 7

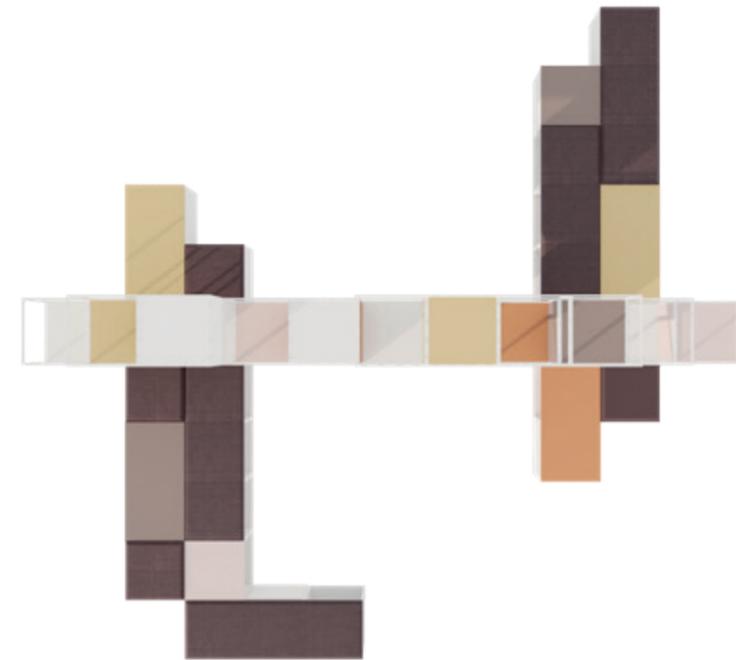

Break with the standards and expand your palette with components outside our standard colour range. Framed by GRID modules, you can mix, match and combine fabrics and lacquered surfaces. Brighten up your space with a stunning balance of warm and soft berry tones – or let us guide you to create a style that is all your own.

## COLOUR POP

# 8

Find a corner or reach for the top as you relax, chat and take in your surroundings. This multi-level landscape is a striking design piece that attracts large and small groups from all angles. Scattered between white and grey upholstered seats, the black unpadding top panels act as steps, foot rests and side tables. It may look like a sculpture, but every component is made for climbing, sitting and exploring.

### GRID components

## SCULPTURAL ISLAND

# 9

Contrast is key. With four separated seating areas, this H-shaped structure uses displays with asymmetrical seating to balance both space and privacy. Black upholstered seats are contrasted with closed white benches. Open white shelving is softened with green plant accents. The result is an elegant and inviting spot for reading, relaxing or drawing new inspiration.

## BALANCING SPACE

# 10

Relax, sit back and listen. This amphitheatre structure integrates seamlessly into the room as it welcomes an audience for discussions, lectures and performances. The mix of textiles and oak top panels makes the space come alive, and the white modulars with black and grey panels provide various seating and side table options. Placed flush across the room, it creates a spacious viewing area for an immersive audience environment.

## FULLY INTEGRATED

# 11

Reach new heights with a showcase column. Both delicate and lively, this seating shape enhances its surroundings with an additional design accent. While the row of seats extends around the unit, the vertical column invites you to look closer and grab a magazine or flyer. The black upholstered seats are surrounded by open white structures and clean white displays for an elegant contrast.

## CLIMBING UP THE WALL

# 12

Sink into the deep blue seating to chill out and have a chat while your device is charging. This unit creatively combines seating with backrests, shelving and table space in a single row. The seats stand out from the white frame with striking deep blue upholstery, and oak top panels are used for a soft warmth that supports elegant products and design pieces.

## RELAX & RECHARGE

# 13

This seating unit fits into any interior. This lightweight bench is sleek, compact and easy to move. The cross braces for stability create open space for light, colours and artistic backdrops to shine through. With a minimalist design that is only three modules wide, this unit provides both comfortable seating and top panel space for your book, bag or cup of coffee.

## SMALL & HANDY

# 14

Think big and be creative. Build in height, width and depth. This structure uses the modularity of GRID to the fullest with its five-story mountain terrain. From any entry point, you can explore its asymmetrical shape, find your favourite spot and enjoy its playful dimensions. At the base and the summit, you will find a chess-like pattern of grey, black and luminescent blue.
