

Control & Design

DISCOVER THE EXPERIENCE OFFERED BY HIGHLY EFFICIENT TECHNOLOGY

Service and Product Quality

Manufacturer of HVAC control systems

With **20 years of experience**, Airzone has consolidated its position as a leading company for high quality products and the provision of services for the professional.

Our production center located in the Parque Tecnológico de Andalucía (Andalusia Technology Park) in Malaga (Spain) **exports 50% of our manufacturing**, and has a presence in more than 20 countries, with our own offices in Italy, France and the US.

Airzone is committed to giving **the most complete service to execute any project**. From prior advice depending on the needs of the client to the design and implement, we provide our own tools and software to successfully complete the project.

We offer **full support** that extends all the way to the ongoing follow-up of the project once completed.

Integrated Control Solutions

Integration in all types of buildings and technologies

Airzone systems allow the control of all elements of the installation **from a single thermostat**, including air conditioning, heating and underfloor heating and cooling. The **Airzone Cloud app** gives you **remote control, wherever and whenever you want**.

The control solutions can be applied in both residential and tertiary environments, and are compatible with home and building automation control systems.

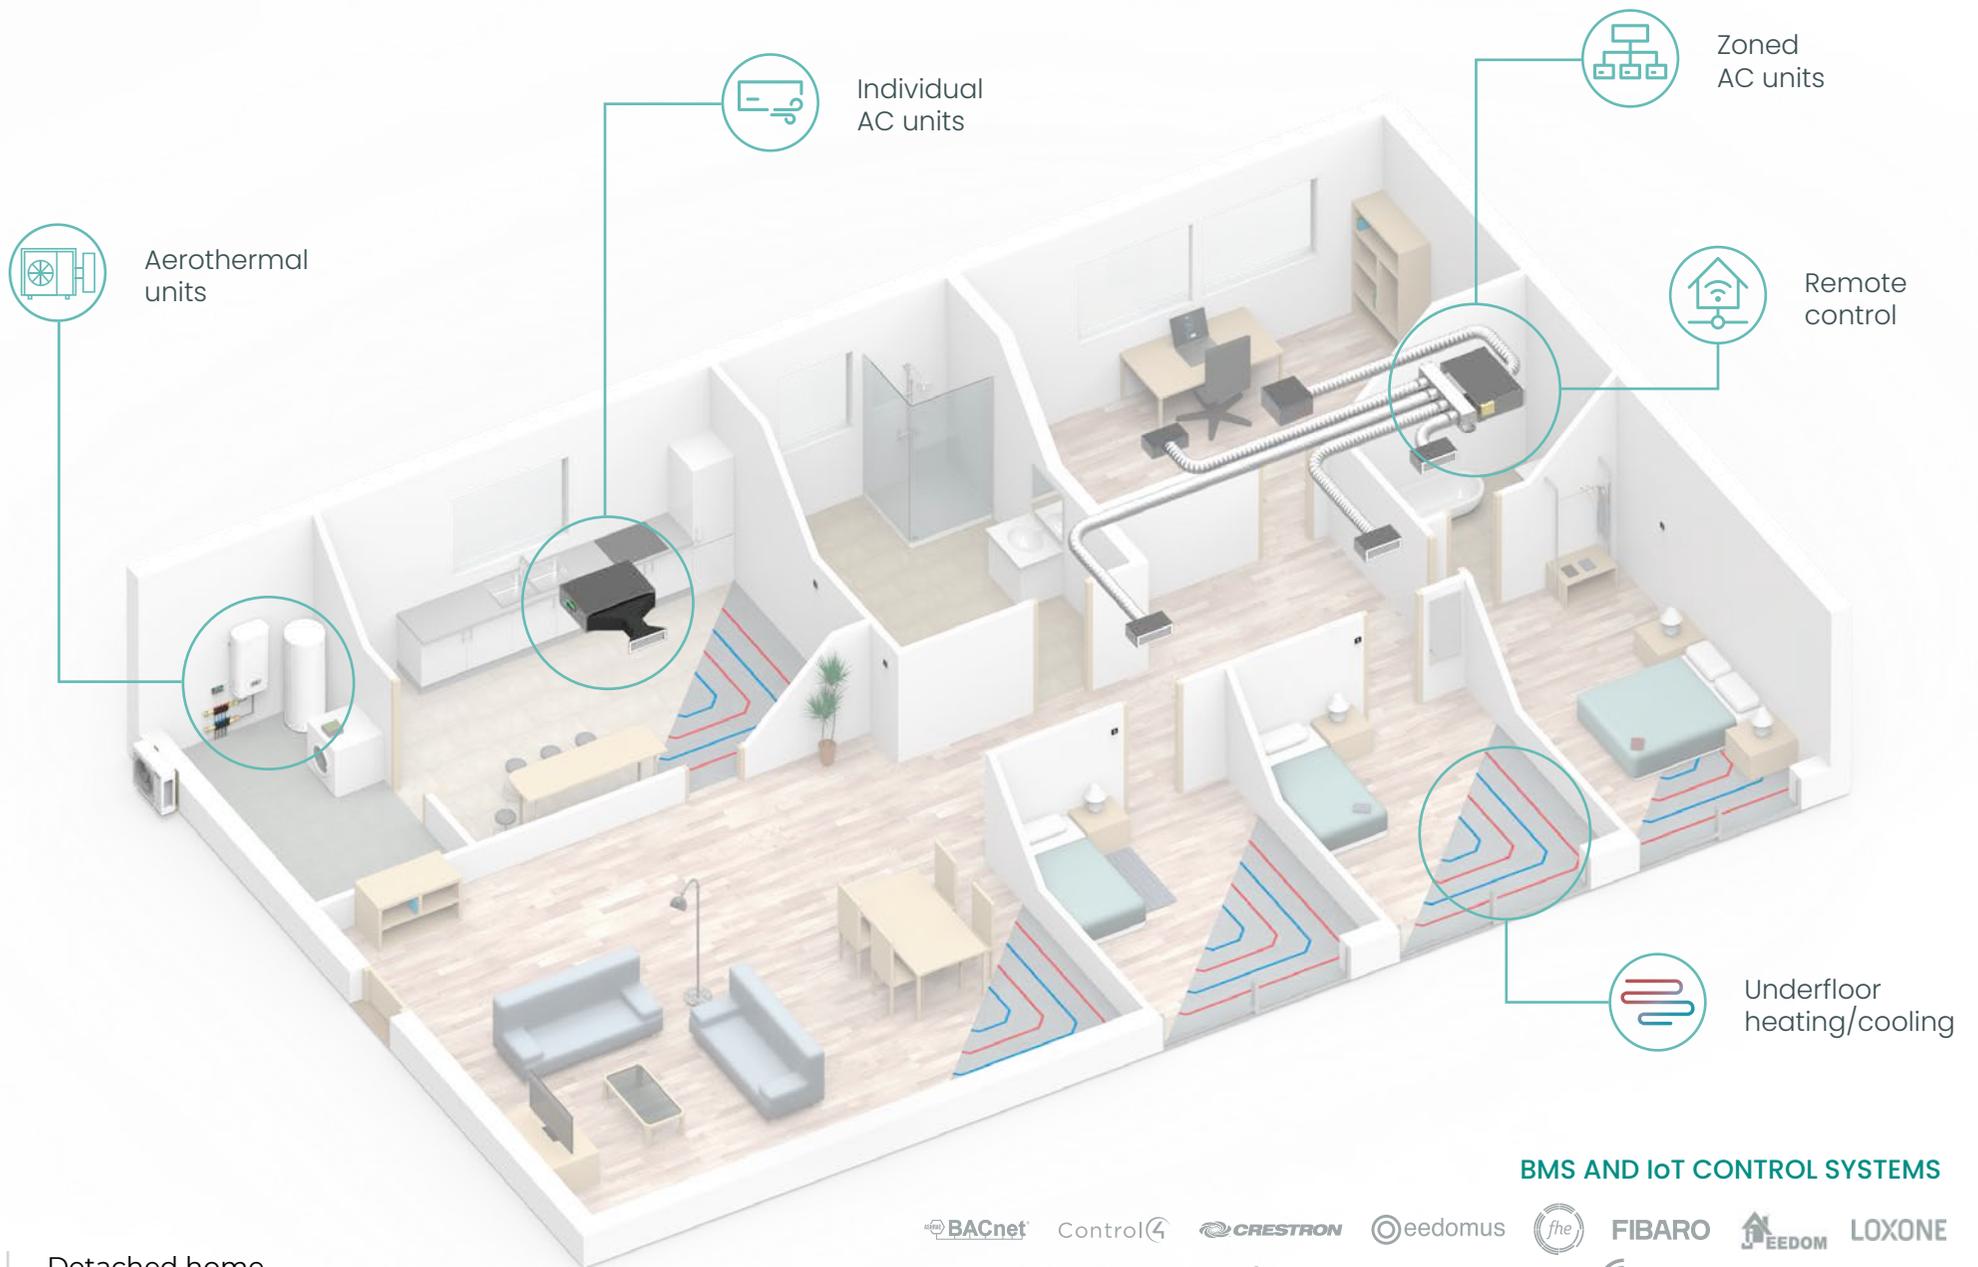

WE IMPROVE YOUR PROJECT

Our aim is always **to optimize the user's comfort and improve the energy efficiency** of the building. This improvement that Airzone brings to projects is recognized in **European certification systems** such as eu.bac, BREEAM, LEED and WELL.
