

Framery Smart Pods

Workdays that flow with ease

Framery smart pods has been purposefully designed to make your workdays flow better. Find and book the pod in advance or on-the-fly from the Framery app. Or step inside and the pod automatically creates a reservation for you. Extend your reservation directly from the pod's touchscreen, or adjust your booking through the app.

Privacy you can trust

The fine-tuned acoustic structure provides A-Class soundproofing that allows the pod to be placed next to workstations without causing noise distractions to the user or to those outside of the pod. And echo-free interior acoustics make the pod a private, comfortable place for work and video calls.

Airflow that keeps you fresh

The pod recognizes when it's occupied, senses the temperature and humidity of the surroundings, and triggers adjustments to the airflow accordingly. Enhanced ventilation fully refreshes the air every minute, and ventilation can be easily adjusted through the pod's touchscreen display.

Lighting that makes you feel good

The automated light sources offer preset lighting modes for video calls or focused work, with adjustments easily made through the touchscreen.

A-CLASS SOUNDPROOFING

30dB

Guaranteed privacy with fine-tuned Class A speech level reduction of 30dB – and the industry's top ISO 23351-1 rating for office phone booths.

MEDIAN AUTOMATED AIRFLOW

60 sec

Air inside the pod is fully renewed every 60 seconds

MATERIAL RECYCLABILITY

100%

Smart pods have 100%* end of life recyclability

*Framery One 95%
