21st CENTURY LEARNING

21st century learning refers to the changing approach to education that has emerged in response to the needs of the modern world.

The emphasis is on developing skills such as critical thinking, problem-solving, creativity, communication, and collaboration, which are essential in the rapidly changing and interconnected world. Technology is a key component, as students are expected to be proficient in using digital tools to access information, create content, and communicate with others.

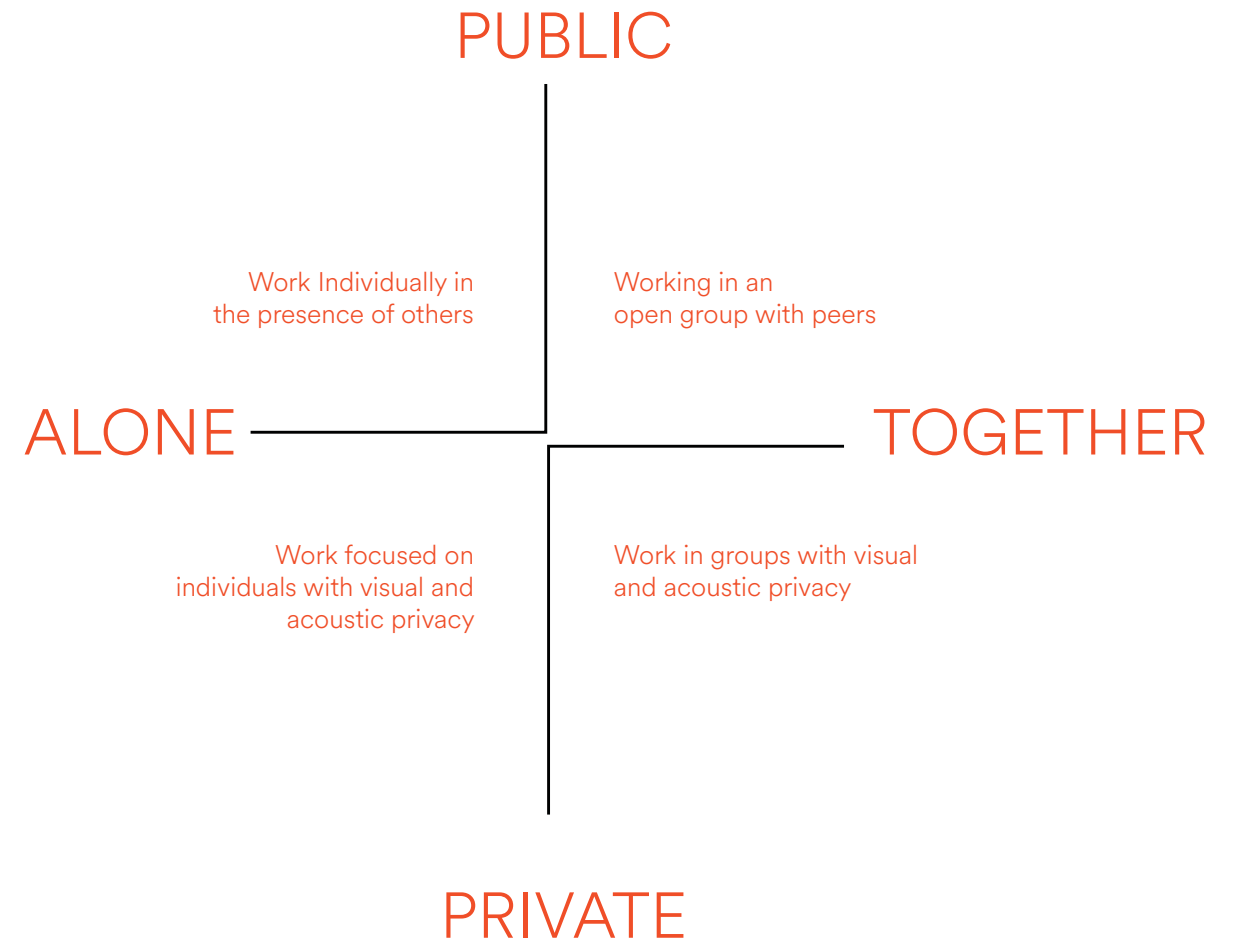

Another aspect of 21st century learning is a shift away from rote memorization and towards a more student-centered approach. This means that students are encouraged to take an active role in their own learning. In this model, teachers transform into facilitators, guiding students in their exploration of information and ideas, fostering a deeper understanding, and encouraging independent thinking. This shift represents a fundamental change in the way education is perceived and by others.

21st CENTURY LEARNING SPACE

Must support multiple ways of learning

Education is continuously evolving and adapting to meet the changing needs of students. The modern classroom is no longer limited to traditional settings and must be able to adapt to various locations. Furniture, therefore, plays a crucial role in inspiring and connecting both students and teachers in these dynamic learning environments.

OUR MISSION

*Education is a journey, and we're here to make that journey extraordinary.
By combining your educational vision with our furniture expertise,
we create spaces that nurture curiosity, foster collaboration, and ignite a passion for learning.*

ROCKWORTH FOR EDUCATION

YOUR PARTNER TRANSFORMATION

We're more than just a furniture provider
we're your partner in transforming learning spaces.

We understand the crucial role that the
environment plays in education, and we are committed
to helping you create inspiring, functional,
and innovative spaces that foster growth and learning.

We dedicated to delivering cutting-edge solutions for dynamic learning
environments through innovative and functional furniture

We are committed to quality, design,
and sustainability in everything we do.

We strive to provide products that are safe, durable,
and ergonomic, while also creating environments
that are aesthetically pleasing and conducive to learning.

OUR EXPERTISE

TAILORED SOLUTIONS

Every educational institution is unique, and so are its requirements. We work closely with you to understand your specific needs, preferences, and goals. Our team of experts collaborates with educators, administrators, and designers to create furniture solutions that align seamlessly with your vision.

INNOVATION DESIGNS

Our furniture isn't just functional; it's designed to inspire. We blend innovation and aesthetics to craft pieces that elevate the learning experience. Whether it's flexible seating, collaborative workstations, or ergonomic chairs, our designs enhance engagement and interaction.

HOLISTIC APPROACH

We don't just provide furniture; we deliver holistic solutions. Our expertise extends beyond seating and desks to encompass complete learning ecosystems. Our furniture solutions are designed to offer ergonomic comfort, smartstorage, and seamless technology integration, empowering educators to create dynamic and effective lessons. From classroom layouts to collaborative hubs, we curate environments that inspire growth.

ENHANCED LEARNING EXPERIENCE

We believe that the right environment enhances the learning journey. Our furniture supports diverse learning styles, encourages collaboration, and promotes focus. We create spaces that motivate students and educators alike to excel in their pursuits.

5 YEAR WARRANTY

Durability is at the heart of our creations. We craft furniture that can withstand the rigors of educational environments while maintaining its integrity and style. From robust materials to meticulous craftsmanship, our products are built to last.

ENVIRONMENTAL HEALTH AND SAFETY

Our entire product portfolio is certified to meet indoor air-quality standards for children and schools through SCS AND ISO standards.

CREATE GREAT *LEARNING* EXPERIENCES

7 DESIGN PRINCIPLES CREATING GREAT LEARNING EXPERIENCES

FLEXIBLE ENVIRONMENT

Education is no longer confined to a single room. Our furniture supports the creation of adaptable environments that cater to different learning styles and activities. Whether it's a quiet reading nook or a bustling group discussion area, our solutions transform spaces to fit the purpose.

ADAPTING TO DIVERSITY

Students today come from diverse backgrounds and possess unique learning needs. Our furniture is designed with inclusivity in mind, accommodating various physical abilities, learning styles, and cultural sensitivities. We create spaces that celebrate diversity.

COLLABORATIVE SPACES

Gone are the days of isolated desks and rigid rows. Our furniture designs are curated to encourage collaboration, fostering teamwork, critical thinking, and communication among students. From flexible seating arrangements to interactive workstations, we create spaces that mirror the collaborative nature of real-world scenarios that inspire growth.

SPACE FOR INNOVATION

In the 21st century, education is about fostering innovation. We provide furniture that encourages creativity, experimentation, and problem-solving. From maker spaces to innovation labs, our solutions create environments where students can explore and create.

COMFORT AND ERGONOMICS

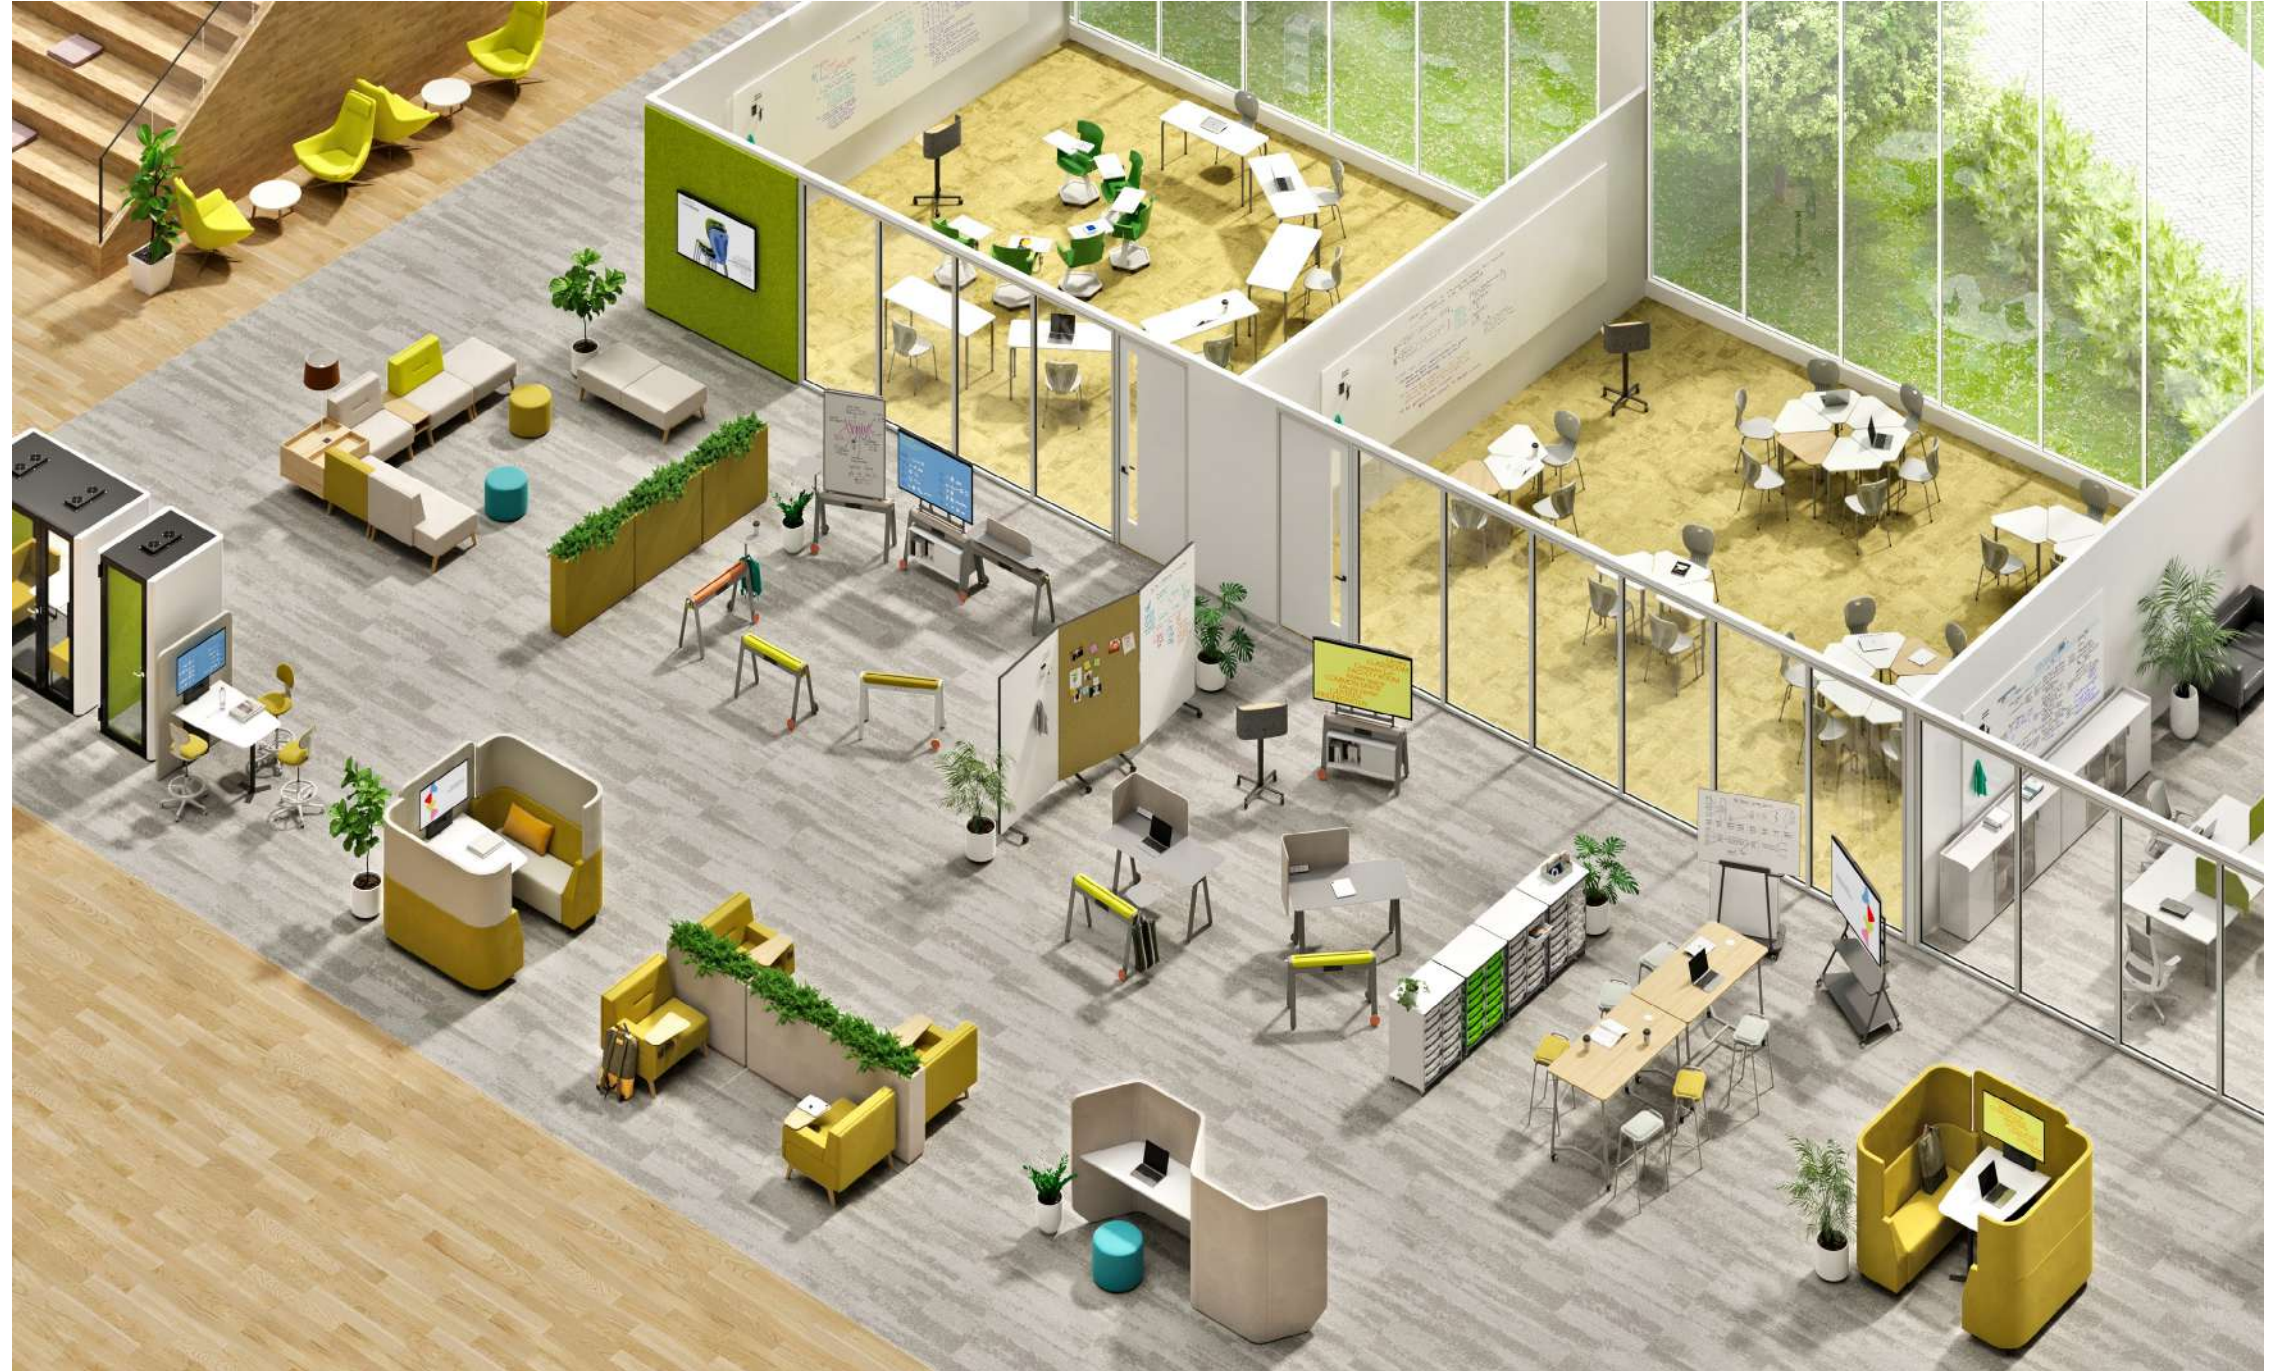

The comfort of learners directly impacts their engagement. Our furniture prioritizes ergonomic design, ensuring students and educators can focus without discomfort. Ergonomic chairs, adjustable desks, and supportive seating contribute to a conducive learning experience.

TECHNOLOGY INTEGRATION

In the digital age, technology is at the heart of learning. Our furniture seamlessly integrates technology, from charging stations to multimedia-friendly surfaces. We provide solutions that adapt to the digital tools educators use to enhance instruction, making learning interactive and engaging.

SUSTAINABILITY

As global citizens, we emphasize sustainability. Our furniture is crafted using eco-friendly materials and processes, instilling environmental consciousness in learners. We believe that fostering a sense of responsibility towards the planet is an essential part of modern education.

As students, technology, and pedagogies continue to evolve, it's crucial that our classrooms adapt to these changes and provide spaces that encourage dynamic learning. It's essential to design intentionally and create environments that support the changing needs of both students and instructors. Although the specific requirements may vary from one classroom to another, the focus should be on designing spaces that foster dynamic learning effectively. This approach will help ensure that our classroom solutions are equipped to inspire and support the next generation of learners.

**We're not just transforming learning spaces,
we are transforming educational experiences.**

CANTEEN

EARLY YEAR

CLASSROOM

The classroom is a vital place for learning and personal growth. It is where students receive education, develop critical thinking skills, and form meaningful connections with their peers and teachers. In this dynamic environment, classrooms prioritize adaptability and teamwork. These modern learning environments are interactive and captivating, offering students and teachers the chance to design their own educational spaces. The most effective solutions allow for the creation of diverse learning zones within the same classroom, accommodating a range of learners and teaching styles. Our classroom solutions help to create a welcoming, comfortable, and productive space that fosters collaboration, creativity, and success.

EARLY YEARS CLASSROOM

Create dynamic, future-ready environments with furniture tailored for young learners. The wooden series offers warmth, sustainability, sensory-friendly design, fostering creativity in natural, and eco-conscious spaces. Modern material furniture adds versatility, sleek design, easy adaptability, perfect for compact, flexible learning settings. Together, these styles combine durability, functionality, aesthetic appeal to support creativity, exploration, and collaboration key elements of 21st-century learning.

ELEMENTARY CLASSROOM

Elementary classrooms offer a diverse range of teaching styles and layouts. At this stage, the curriculum aims to keep learning and communication flowing smoothly while maintaining a lighter atmosphere. Play is still a crucial component of learning for students at this age, who need interactive and hands-on experiences to engage them in meaningful learning.

MIDDLE SCHOOL CLASSROOM

Middle school students are at a crucial stage of their physical, social, and emotional growth. During this time, they are exploring new subjects and ways of thinking, while also navigating social dynamics. Classroom furniture for this stage should support students in discovering their interests and developing critical thinking skills within a structured environment. Teachers need furniture that facilitates a dynamic and flexible learning environment, encouraging students to engage with their peers, work collaboratively, and engage in hands-on activities.

HIGH SCHOOL CLASSROOM

High school students are entering the final stages of their education and preparing for the challenges of adulthood. High school classroom solutions are designed to support hands-on learning, group collaboration and the development of critical thinking and problem-solving skills. By creating an environment that reflects the realities of the modern workplace, educators can better prepare students for their future careers.

LIBRARY

Self-Learning Center

The traditional library has transformed into a multi-purpose space, becoming a valuable supplement to traditional classrooms. Libraries or self-learning centers provide a relaxed and comfortable atmosphere with zones for research, communication, and collaboration. The layout includes various seating and table arrangements to facilitate both individual and group work. The library must cater to individual needs, offer an adaptable layout, and provide social spaces for intellectual and social exchange. Study carrels, cozy reading nooks, and spacious reading tables accommodate diverse study preferences, while ample shelving and display areas showcase a wide range of resources. Quiet zones and enclosed study rooms ensure a peaceful and private study environment, fostering a love for reading and exploration among students.

MAKERSPACE

Build Your Dream

The makerspace is an innovative and dynamic area that stimulates creativity and hands-on learning. Its design is flexible, accommodating various activities and projects. Workstations equipped with diverse tools, such as 3D printers, woodworking equipment, and crafting materials, inspire students to explore their interests and turn ideas into tangible creations. The ambiance should be vibrant and colorful, fostering an atmosphere of innovation and curiosity.

COMPUTER LAB

The incorporation of technology in the classroom has been shown to have a positive impact on student development. The media center is specifically designed to expand students' learning resources through the integration of innovative tools that make the learning process both effective and enjoyable. The modern media center serves as a hub for various activities, with designated areas for technology, social interaction, training, project work, and quiet study. By promoting collaboration and personalized learning, technology can greatly enhance the educational experience. Our media solutions are carefully selected to provide a mix of flexible table configurations, both standing and seated, as well as comfortable soft seating to facilitate group and individual learning in a relaxed setting.

LABORATORY

A cutting-edge facility designed to enhance students' learning experiences and foster innovative research within the academic community. Equipped with state-of-the-art instrumentation and modern amenities, this space is tailored to support a wide range of scientific disciplines and experimentation. From biology and chemistry to physics and engineering, our laboratory provides a dynamic environment where students can engage in hands-on learning, collaborate on projects, and explore the intricacies of their respective fields.

COMMON SPACE

In-between spaces in a school refer to versatile areas like corridors, hallways, and open atriums designed to promote informal learning, collaboration, and social interaction among students and educators. These spaces complement traditional classrooms and offer opportunities for interdisciplinary exploration and creative activities. Furnished with flexible seating and technology resources, they aim to foster curiosity and active learning while maximizing available space within the school. In-between spaces create dynamic environments that enrich the overall educational experience for students.

TRAINING ROOM

The training room is a space designed for professional development and specialized learning sessions. It should be equipped with state-of-the-art audiovisual tools, such as projectors, screens, and videoconferencing equipment, to enable seamless presentations and interactive discussions. Comfortable seating with writing surfaces supports note-taking and active participation. The layout should be flexible, allowing for rearrangement based on the training format or activity. Proper climate control ensures a comfortable learning environment, while neutral colors and professional aesthetics maintain a focused atmosphere.

CANTEEN

The canteen is not just a place to dine but also a space for socializing and rejuvenation. The design should incorporate a mix of seating options, from traditional dining tables to casual lounging areas, accommodating various group sizes and dining preferences. The furniture should be easy to clean and durable to withstand heavy use. A well-equipped kitchen and serving area ensure efficient food preparation and service. To promote healthy eating habits, the canteen should offer a variety of nutritious and tasty food options. Recycling stations encourage sustainability, while colorful decor adds vibrancy and cheerfulness to the space.

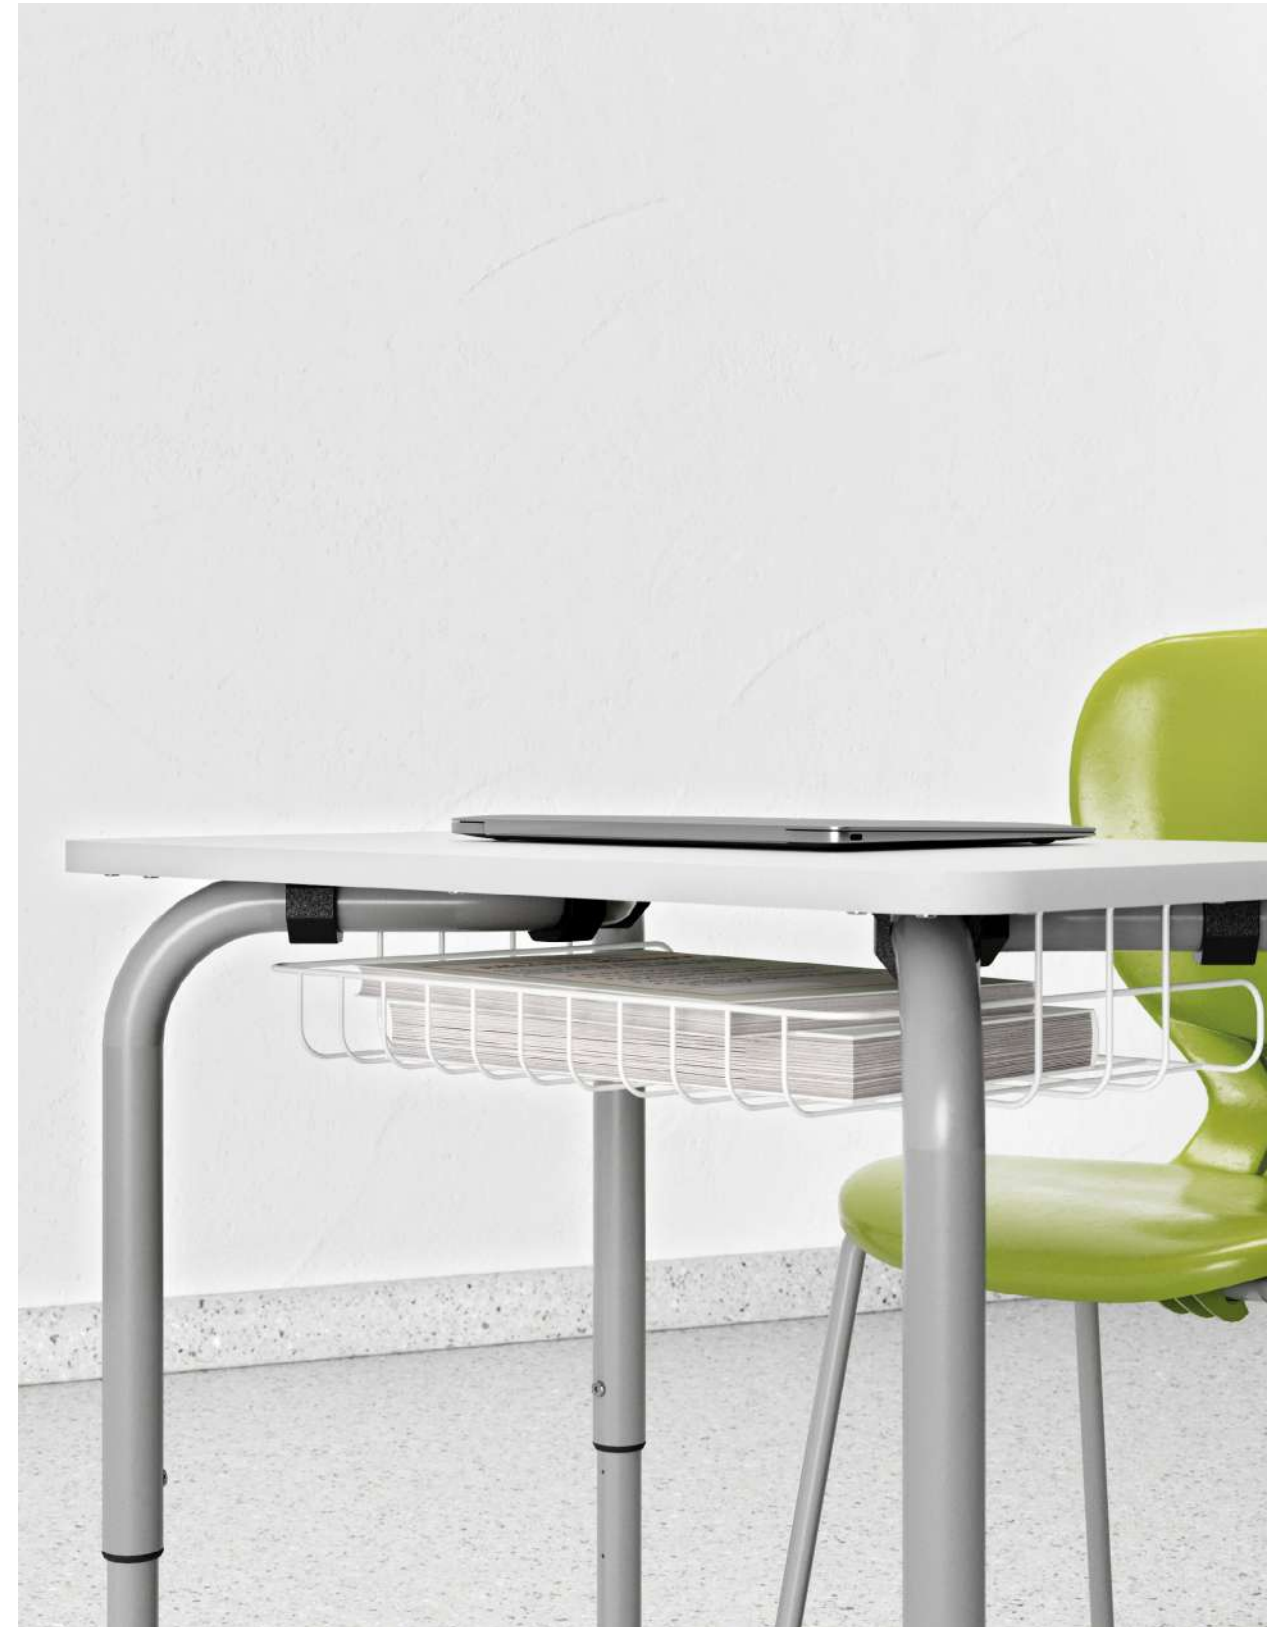

FACULTY ROOM

The faculty room and school admin area are the backbone of the educational institution, supporting the needs of educators and administrators. Private spaces for individual work, meetings, and confidential discussions ensure efficiency and confidentiality. Collaborative areas with roundtables or lounge-style seating foster teamwork and camaraderie among faculty members. Access to administrative resources, such as computers, printers, and filing cabinets, enhances productivity. The ambiance should be designed to promote relaxation and stress relief, with comfortable seating, soft lighting, and a calming color scheme. Overall, a functional and well-organized layout streamlines administrative tasks and helps create a harmonious work environment.

Total Innovative *And Functional* *LEARNING SPACE* Solutions

Our solution is a complete family of tools needed to encourage creativity, collaboration, and the confidence needed to navigate growth and change. Our goal is to provide you with a complete package that meets the diverse needs of modern educational settings. With our Total Modern Education Furniture Solution, you can create a cohesive and functional learning environment that supports student engagement, collaboration, and productivity.

NURSERY FURNITURE

Wooden series

Introducing our latest range of wooden products for early years. Our products feature a scratch-resistant, easy-to-clean high-pressure laminate finish. They are designed to look elegant and withstand the demands of everyday use. All products are height-appropriate for children aged six months to five years and older, seamlessly complementing our natural wooden storage range. Available in a variety of heights to suit ages six to five years plus.

SEATING

Wooden series

This toddler learning chair draws inspiration from simplicity and comfort, offering a cool and serene aesthetic that enhances the joy of everyday life. The light-colored finish exudes a clean and refreshing texture, while its smooth, polished surface adds an elegant charm, promoting a minimalist lifestyle free from unnecessary distractions. Crafted from pure solid wood, this learning chair is thoughtfully designed with ergonomics tailored to suit children. The curved high backrest, paired with smooth, chamfered edges, ensures exceptional comfort, providing an ideal seating experience for young learners.

FEATURES

- Adjustable Heights (26/28/30 cm)** - Tailored for various age groups to ensure ergonomic seating.
- Sturdy and Durable Materials** - Built to endure the rigors of everyday classroom use.
- Safe and Child-Friendly** - Smooth finishes and rounded edges for added safety.
- Lightweight and Portable** - Easy for educators and children to rearrange for dynamic learning activities.

Stackable Table

It efficiently provides individual space through a minimalist design, ensuring practical and streamlined spatial organization. Its versatility allows for quick and flexible arrangements across a variety of settings, including offices, educational environments, and lecture halls, where efficient space utilization is essential to accommodate varying group sizes.

FEATURES

- Rounded Edges** - Smoothly connected edges enhance safety and provide a refined, modern aesthetic.
- Two-Tone Cover Board** - Functional and stylish, the cover protects privacy while maintaining an open, clean look.
- Integrated Pen Tray** - Keeps writing tools and materials organized, reducing clutter for focused learning.
- Expandable Storage Drawers** - Flexible drawer system allows ample storage for books, supplies, personal belongings, and maximizing utility.
- Bag Hanger System** - Asymmetrical hook-type bag hangers securely store bags, combining organization with convenience.
- Face-to-Face Configuration** - Patent-protected design supports efficient layout changes for collaborative learning.
- Vertical Stacking** - Space-saving feature allows up to 5 tables to be stacked neatly for storage or transport.
- Durable Glides** - Equipped with noise-reducing glides to protect floors and ensure smooth mobility.

- 1. Rounded edge**
With the smoothly connecting rounding finish, it can be safely used, and by emphasizing a restrained feeling, a refined atmosphere is produced.
- 2. Cover board**
The lower-level front cover board is remarkable for its 2-tone color, and privacy is protected, and the open space is neatly organized.
- 3. Pen tray**
Pen tray composed with ample depth and width. Through the furrows on the sides, foreign materials can be neatly eliminated.
- 4. Face-to-face combinations *Patent**
Asymmetrical hoods to the left and right can be used, so that the table can in face-to-face style be easily.
- 5. Bag hanger straight-type Combination *Patent**
On the sides are installed the asymmetrical hook-type bag hanger, and the bag is stored. What's more, by combining with a table, the straight-type layout can be completed.
- 6. Expansion-type drawers *Patent**
The storage space can be flexibly expanded so that objects can be amply stored. After storage, the space is automatically reduced so that bodily contact is prevented.
- 7. Vertical stacking**
Up to 5 can be stacked vertically, saving space.
- 8. Glides**
The felt is attached in the plastic glides, and when moving, noise and floor scratches are prevented.

HAF

Multi-media Pod

In every open plan areas there is always the need to find your own private space. HAF Acoustic Pod is a range of acoustic work areas which were created to make public spaces private. The environment we work in has to facilitate both the privacy needed to concentrate and the space needed to collaborate. HAF is designed to provide users with a quiet and productive space for meetings, studying, or individual work, while also reducing noise distractions. HAF help to create private and focused areas in busy environments.

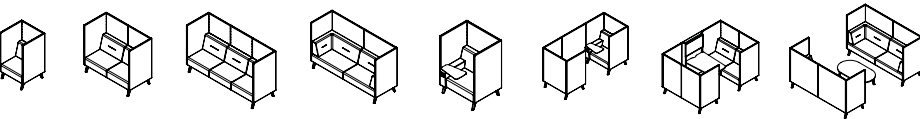

FEATURES

- Room Dividers and Acoustic Function** - Our acoustic pods are constructed with sound-absorbing materials, creating a secluded space that minimizes external noise and promotes concentration via high-back panels to create privacy space.
- Integrated power** -Equipped with integrated 3-socket power outlet (universal 3 pin socket) enabling seamless integration of multimedia devices such as laptops, tablets, and charging stations.
- Collaborative Space** - Spacious and comfortable seating arrangement encourages group discussions, brainstorming sessions, and project work, promoting teamwork and communication skills.

HAF family ranges from a contemporary one-seater sofa to a suite of pieces that can be configured successfully in both confined spaces and vast atriums. HAF's modular elements offer multiple product combinations, configurations and upholstery options. HAF ranges from standalone bench and booth units through multiple length contemporary sofas (both low and high back) to linked scenarios for either open collaborative working or – when partially enclosed – greater privacy.

WE+THINK

Panel System

WE+THINK privacy acoustic pods designed offering students a focused environment. We believe that focused learning requires an environment that promotes concentration, peace, and privacy. These innovative pods create personalized learning spaces that promote concentration, and a sense of privacy in any public space such as libraries, and study areas.

FEATURES

Enhanced Privacy - The enclosed design offers a sense of personal space to better concentration.

Acoustic Privacy - Equipped with sound-absorbing materials, minimizing external noise and creating a peaceful ambiance for studying and learning.

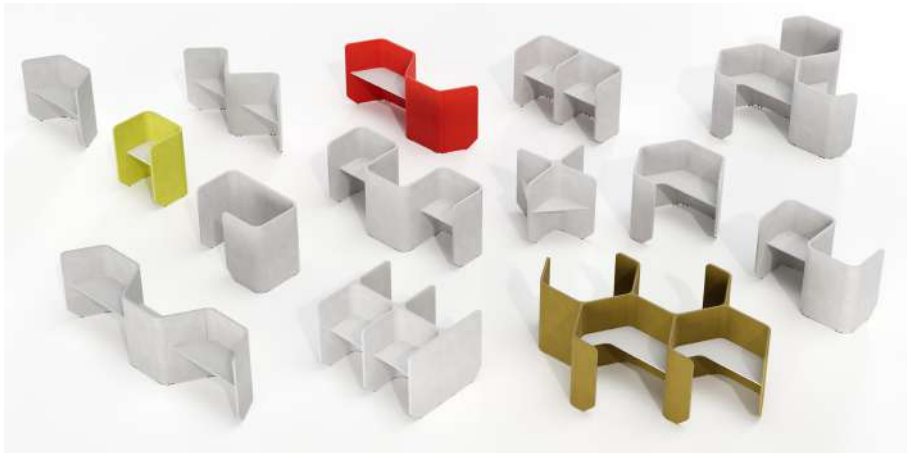

Versatile Applications - Whether used in classrooms, libraries, or study areas, our privacy panel pods offer a versatile solution for creating personalized and quiet learning spaces that enhance student focus and productivity.

The economical construction - Innovative junction design allows for efficient sharing of components, making the construction of these privacy pods both cost-effective and sustainable.

Customized finished - Our privacy pods come with panels made of two fabric pieces—an inner and an outer layer. This design allows for customization options, where customers can choose the same or different colors for the panels, creating a unique and visually appealing setup that complements the existing decor.

OPTIONS

AC Power Module - 3-socket power outlet (universal 3 pin socket)

BRIDGE

Canopy Sofa System

BRIDGE is all about bringing people together. Designed to function equally well in existing or new spaces, these open to semi-private meeting enclaves can be positioned anywhere and require no elaborate construction to create a custom built-in feel.

FEATURES

Collaborative Learning Environment - The meeting pod creates a collaborative and inclusive space where students can work together, share ideas, and collaborate on academic projects.

Semi-Private Setting - The meeting pod's semi-private design allows students to engage in discussions without distractions from the surrounding classroom, encouraging focused learning.

Acoustic Properties - Equipped with sound-absorbing materials, the meeting pod ensures that students' conversations remain confidential and minimize disturbances in the classroom.

Comfortable Seating - The meeting pod creates a welcoming and productive environment for student interactions and teamwork.

Energy management system

*State of the art
Manufacturing Facilities*

5 DECADES
of FURNITURE
EXPERIENCE

We operate manufacturing facilities in two countries,
covering an impressive total production area of 80,000 square meters.
These facilities are equipped with cutting-edge technology
and skilled workforce to ensure precision and efficiency
in our manufacturing processes.

Rockworth
