NOOK

www.nookpod.com
hellousa@nookpod.com

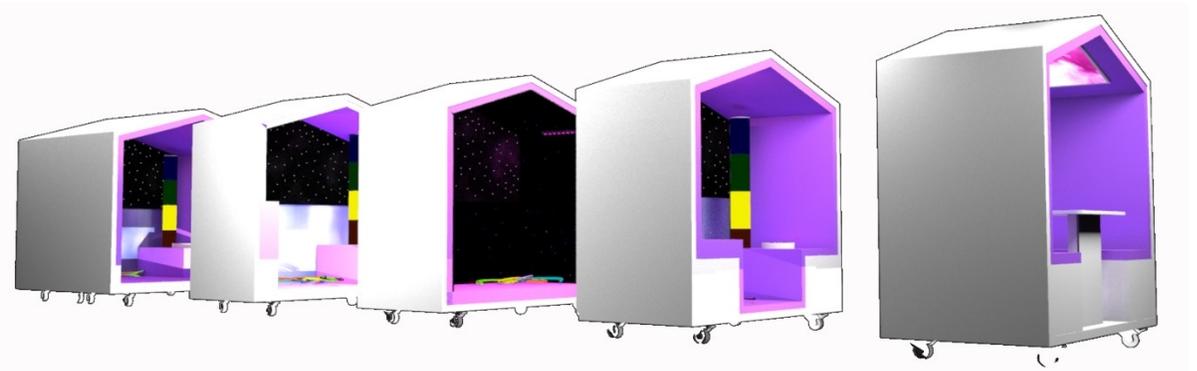

While the Nook is an emotionally intelligent workspace which provides support for the neurodiverse, Sensory enhancements take it a step further to create an encapsulated environment to positively influence mood, reduce challenging behaviour & lower anxiety levels.

Sensory Nook is a highly inclusive adaptable space particularly effective for neurodiversity including Autism, ADHD & Dyslexia. It provides a calming refuge for social & emotional challenges. It is a practical way to reduce exclusion in the workspace, classroom and in public.

Sensory Nook helps neurodiverse people cope with challenging environments and reduce anxiety levels before they reach meltdown. The result of this is less exclusion and much greater opportunity to access experiences most people take for granted.

It is often overlooked that when an individual with special needs is excluded from attending a place through fear of uncontrollable sensory overload their family and carers are excluded too.

Sensory Nook is fully customizable, but we have designed a range of Nook Pods to make it easy for individuals & organisations to find the most effective inclusive sensory space for their situation.

ESCAPE

A closed in space that gives a sense of security and calm.

Designed for a single occupant to lay down in temporary isolation to be soothed & passively calmed through the star like quality of gently twinkling fibre optic carpet, UV lighting, tactile UV treated twinkling fibre optic strands and bluetooth speaker for playing personal calming sound tracks.

Sensory Nook Escape can be turned towards a wall to create the isolation or be fitted with optional doors or a mobile screen for greater isolation and enclosure.

An oasis of calm in which to escape and reduce anxiety levels when they are close to crisis point. Ideal for SEND & healthcare providers.

MODULES

- Acoustically Quiet Nook Huddle Pod
- UV Lighting with user control
- Twinkling Fibre Optic Tactile Wall Carpet
- UV Enhanced Fibre Optic Tails
- Soothing Vibration Pad

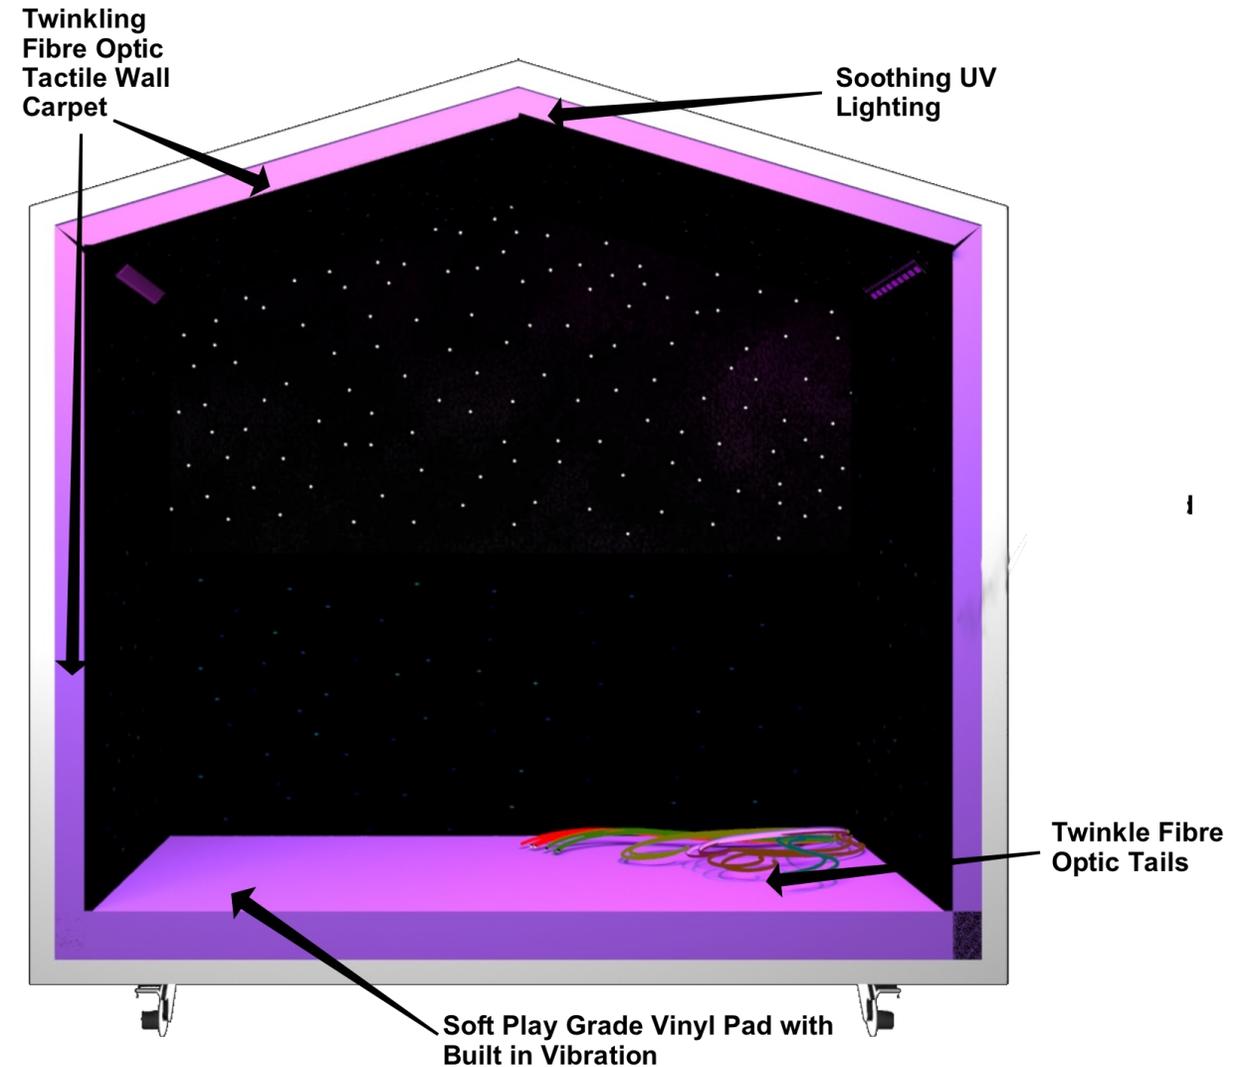

MATERIALS

Shell: Egger Premium White W1000 ST9

When you go to a music festival with three autistic children you do wonder if you will last more than ten minutes. Thanks to Sensory Nook being at Wonderfest we lasted two days! All three of my children visited their area, but my nearly seven year old daughter especially made them her safe place for the weekend. On day two she had a meltdown and started running... she kept running straight across the field and straight into one of the Sensory Nook's! She laid down for around twenty minutes amongst the lights, no talking and managed to re-regulate herself. Normally in that situation it would have been game over for us and home time - This allowed us to continue on for a while longer. All schools should have one of these and I'm going to grovel with both of the special needs schools that my children attend and see if we can fundraise for one, now having witnessed how instantly helpful they are! Thank you Sensory Nook!

David I was impressed by the Nook when we met but at that time was undiagnosed with ADHD. With that new insight, I realise what appeals to me most about the Nook is the solitude in crowd. People like me thrive in communities but we need retreat to allow our hyperfocus to blossom. The Nook is an oasis of calm and a safe place for ...see more

There absolutley amazing!

Saw them at wonderfest on isle of wight yesterday and i was blown away at how good they are!

All schools need these there fantastic

A real sanctuary for people with autism,aspergis and other sensory overloads 🥰

👍👍 Keith Langton, Andrew Fielding and David O'Coimin
