PHP® SYSTEMS/DESIGN

BUILD IT RIGHT.

WHO WE ARE

PHP Systems/Design is America's leading source for rooftop pipe and equipment support systems. PHP designs, manufactures and delivers innovative and sustainable rooftop solutions for architects, engineers and building managers who understand what it means to "Build It Right." We pioneered the original *Zero Penetrations* support system—allowing our customers limitless support options without jeopardizing their existing roof warranties. Our design team is committed to delivering professional, high-integrity, code-compliant designs and engineering that solves every type of rooftop challenge.

We provide a viable alternative to more creative solutions such as wooden sleepers, curbs and other varieties of inadequate methods. Imitations are simply not backed by our expertise, research, development, scientific knowledge and commitment to customer satisfaction.

Our product lines and services we offer are used by industry leaders in both rooftop and land support applications:

- Target
- Tyson Foods
- Disney
- Lockheed Martin
- Kraft Foods
- Pfizer Pharmaceutical

- Whole Foods
- General Motors
- Ford Motor Co.
- Wal-mart
- Macy's
- Shell Development

- AT&T
- National Semiconductor
- Intel
- Amazon
- Exxon Mobile
- PepsiCo

We offer quality assurance backed by our warranty and superior engineering and design. Putting extensive research, development and testing experience into our systems insures the delivery of exceptional, customized solutions.

We are the solutions providers.
We are PHP Systems/Design—Solutions Here!

WHO WE SERVE

- Architects
- Design Professionals
- Mechanical Engineers
- Consultants
- Contractors
- Facilities Managers
- Building Owners

PHP Systems/Design
is a company
dedicated to
building a product
for the people that
surpasses excellence
in ingenious design
for sustainability

WHAT WE OFFER

ROOFTOP SUPPORT SYSTEMS

PHP Systems/Design can recommend a wide range of rooftop support systems. Each designed for installation without roof penetrations, flashings or damage to the roofing material. As part of our services, PHP provides professional seismic and high wind applications for all of our product support systems.

Pipe Supports

PHP Pipe Supports are designed to support single or multiple pipes at any specified height or width, with outstanding performance and sustainability, backed by our warranty coverage. The proper selection of supports is critical to the overall performance of the roofing system.

Duct Supports

The PHP Duct Supports provide both open and closed support design options with an unsurpassed advantage in sustainability, offering both seismic and high wind applications for safety and reliability.

Cable Tray Supports

PHP Cable Tray Supports are available in a variety of tray sizes, are eco-friendly with any roofing system, and can be used on an array of commercial and industrial projects at any specified height or width.

Equipment Supports

The RTU-20 Equipment Supports are designed to support air handlers, blowers and exhaust fans. Our engineers are able to provide design assistance on many different types of equipment supports.

Walkways & Crossovers

The PHP Walkways and Crossovers are used to prevent and direct traffic on the roofing system, providing access to areas that may be obstructed by piping, ducting or equipment—creating safety and convenience.

Stairs & Ramps

The PHP Stairs and Ramps are designed to access different levels of roofs and equipment that may be out of reach. Each and every component plays an important role in the design process.

Platforms

The PHP Platform is available in designs ranging from rooftop media, service and smoking areas, to platforms for AHU and small chillers. The impact of using PHP Platforms ensures the long-term durability of the roofing system.

Solar Panel Supports

PHP provides a variety of Solar Panel solutions to meet any unique design and installation specification. Solar Panel Supports affect roof system performance, in regard to increased heat and moisture impact.

Industrial Grade Pipe Supports

PHP offers custom engineered land supports, modular in design, allowing for supports to be ordered in bulk and delivered pre-assembled. Other services range from stress analysis of piping, to site supervision, regular plant inspections, surveys of existing installations, and refurbishment of supports.

OUR SERVICES

- On-Line Accredited Courses
- Architectural Lunch-and-Learns
- Engineering Design and Layout
- Specification Writing Assistance
- Code Compliance Research and Verification
- Technical Support
- Installation
- Modifications
- Evaluations

PHP's accomplished expertise and resources can address the spectrum of your design and performance criteria associated with rooftop support systems selection, code compliance, extreme seismic and high-wind conditions and sustainability. Our creative solutions allow the highest level of flexibility and proven structural integrity. We will take your plans, and your vision, to develop a sustainable approach that will last well beyond industry standards.
