# NEW WORK,

Founded in 2022, Berlin Acoustics (BA) is a dynamic pioneer in the field of modern office solutions. Headquartered in Berlin, BA offers sound-insulated phone and meeting booths that seamlessly combine design, functionality, and sustainability.

INTRODUCTION

We help companies shape the future of work—with their people in mind. Together, we transform open-plan offices into productivity hubs. It is our vision, to create work environments where people enjoy working and are empowered to reach their full potential, every day.

# EFFECTIVELY DESIGNED

INTRODUCTION

With the development of our booths, we aim to create spaces that not only provide peace and focus, but also enhance mental well-being and concentration in today's fast-paced office environments.

# OUR DESIGN PHILOSOPHY

We believe in simple, intelligent design. Berlin Acoustics products embody timeless elegance through their minimalist design, seamlessly integrating into modern office landscapes while supporting architectural visions. The company specifically develops solutions for interior designers, planners, and architects who value functional excellence combined with understated aesthetics.

Using our guiding principle 'Beauty lies in Simplicity', we create products of lasting value. The minimalist design philosophy is reflected in the carefully curated color palette—cabins are available in classic black or elegant white.

DESIGN

Our design clarity allows us to manufacture high-quality booths in Germany while maintaining consistent, premium standards—without the premium price tag. The result: outstanding quality at a fair price. Because silence, focus, and undisturbed work should never be a luxury.

DESIGN

Quality and sustainability go hand in hand at our 3 German production sites. Over 90% of our materials are sourced locally - this ensures not only top standards and short supply chains, improving our CO2 balance, but also independence from global disruptions.

Sustainability is a core value of our company. A standardized product design and consistent waste reduction are key priorities. Reducing material waste to less than 7%, is a significant step towards a more sustainable future.

Each product is designed for longevity, using resource-efficient materials combined with advanced acoustic technology to ensure optimal effectiveness. The modular design also enables easy assembly and disassembly, providing flexibility in modern office layouts while reinforcing our commitment to sustainable development.

# SUSTAINABILITY

In order to contribute to climate protection, we have launched the campaign “One Booth - One Tree” where we plant a tree for every booth sold. Not in Brazil or Indonesia, but here in Germany, where we produce our booths. To make sure that for each box a tree is planted, we put on the rubber boots, pick up the shovel and plant the trees ourselves.

ONE BOOTH - ONE TREE

# REFERENCE CASE

With its co-working spaces, Clockwise offers everything one can expect of a modern workplace. As a proud partner of JPA-Workspaces, we were able to contribute to the success of the project at the new Bremen location. Our phone booths fit seamlessly into the great design of the 5 floors at the Bremen location.

# REFERENCE CASE

As a fast-growing tech company, BankID was looking for flexible office space for its Oslo site. It was important that added phone and meeting booths would fit seamlessly into the existing office design. With the excellent advice of our partner Euklides, the choice fell very quickly on our phone booths.

# REFERENCE CASE

We have successfully supported our trusted partner Schumacher New Work to transform BLG Logistics' office in Bremen. The redesigned workspace features inviting zones for focus and retreat. As part of a carefully curated brand selection, our meeting booths were seamlessly integrated—enhanced with moss cladding to blend into the design and add a natural, calming touch to the environment.
