

Brivo AEC Program

Build smart, secure, and resilient spaces with the Brivo Architectural, Engineering, and Construction program

A man in a blue shirt is shown from the side, looking down at a detailed architectural model of a city skyline. He is adjusting a small piece on the model. The background is a blurred office setting with a desk lamp.

Brivo experts partner with you to integrate advanced, cloud-based security and equipment while protecting your design aesthetic.

BENEFITS:

- Security design support at any phase of the project
- Expert bid response recommendations from security modeling professionals
- Specification drafting and analysis to ensure security plans are future-proofed
- Guidance to ensure equipment, wiring, and technology align with building design and aesthetics
- Code compliance support to ensure your security plans adhere to local ordinances and best practices

Brivo delivers excellence to the initial design phase or retrofit project by partnering early on with you.

Elevate your design with the power of access control.

The **Brivo AEC team** combines the rich expertise of our professionals in **building design, and secure access technologies** to help champion your success

Access Security consultations for new construction or retrofits in the commercial and residential markets

Cloud-based access control, video surveillance, and space management for building resiliency

Mobile access tools via smartphones or watches to create positive end-user experiences for the long term

BIM and 3-D modeling solutions to drive work, design, and cost efficiencies

Data Analysis: access to real-time and historical data to make more informed decisions on safety, efficiency, usage patterns and design effectiveness
