planter series

Your vision. Our planters.

COMMERCIAL GRADE PLANTERS

For indoor and outdoor spaces

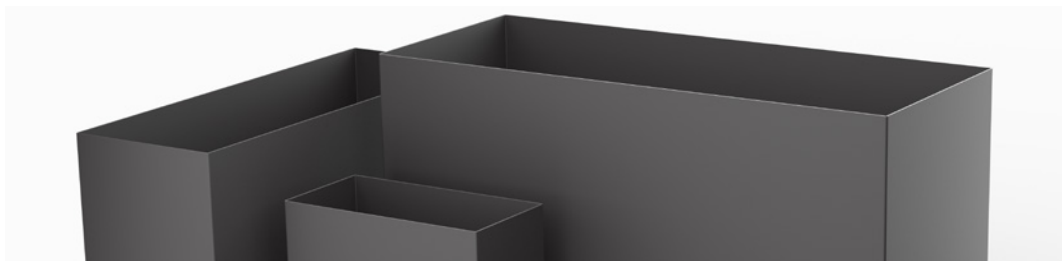

TABLE OF CONTENTS

Pages 4 - 7

FRESCO SERIES

Modern style planters that feature a rimless top and a flat bottom. Completely customizable to adapt to all projects. Ideal for both indoor and outdoor use.

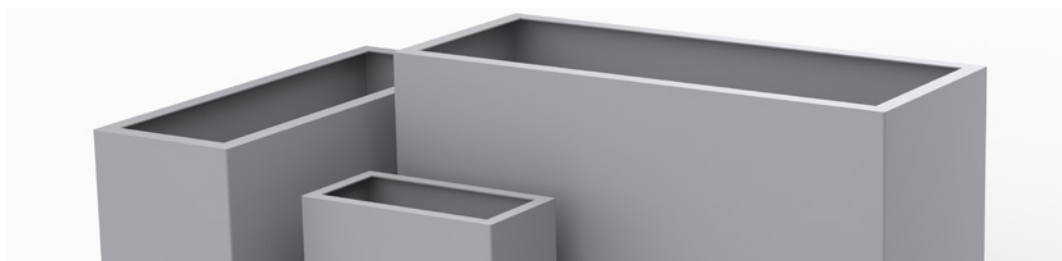

Finishes: Matte & Texture Only

Pages 8 - 10

TERRA SERIES

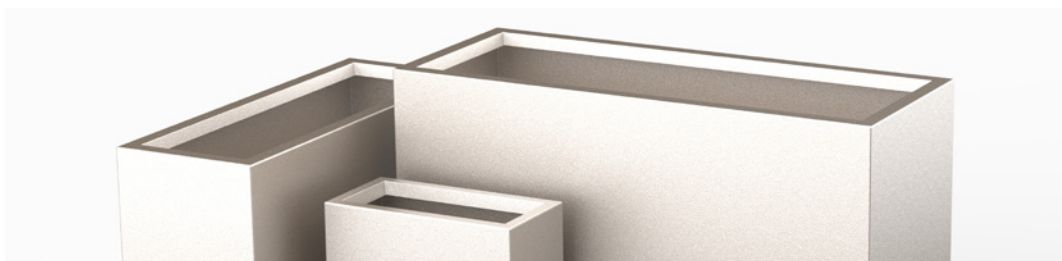

Contemporary style planters that feature an inward flanged rim and a flat bottom. Ideal for both indoor and outdoor use.

Pages 12 - 15

LOTUS SERIES

Bold style planter that features a return rim and a flat bottom. Durable, lightweight, and weather-proof. Ideal for both indoor and outdoor use.

Pages 16 - 19

COURTYARD SERIES

Classic style planter that features a return rim and a **recessed base**. Durable, lightweight, and weather-proof. Ideal for both indoor and outdoor use.

Pages 20 - 21

CLADD SERIES

Custom made commercial liners are manufactured to any dimension and shape to fit your specific project. Ideal for both indoor and outdoor use.

We believe in the power of design and its ability to influence and elevate the quality of public space. High-quality products and outstanding customer experience make us one of the nation's premier designers and manufacturers of outdoor and indoor commercial planters.

ABOUT CUSTOM COMPOSITE RESIN

Our custom composite resin planters utilize commercial-grade fiberglass manufactured and fabricated at our state-of-the-art facility in the USA. Their dent, rust, and leak-proof commercial-grade construction, along with vast color and texture options, make fiberglass planters an interior and exterior landscaping favorite.

Fiberglass planters can withstand extreme indoor and outdoor conditions, including freezing cold winters and blazing hot summers. A marine-grade gel-infused paint ensures that fiberglass planters are moisture and rot-resistant. In addition, the lighter weight of fiberglass planters compared to wood, stone, terracotta, and metal make them an ideal choice for rooftops, decks, and balconies where weight and durability issues are a concern.

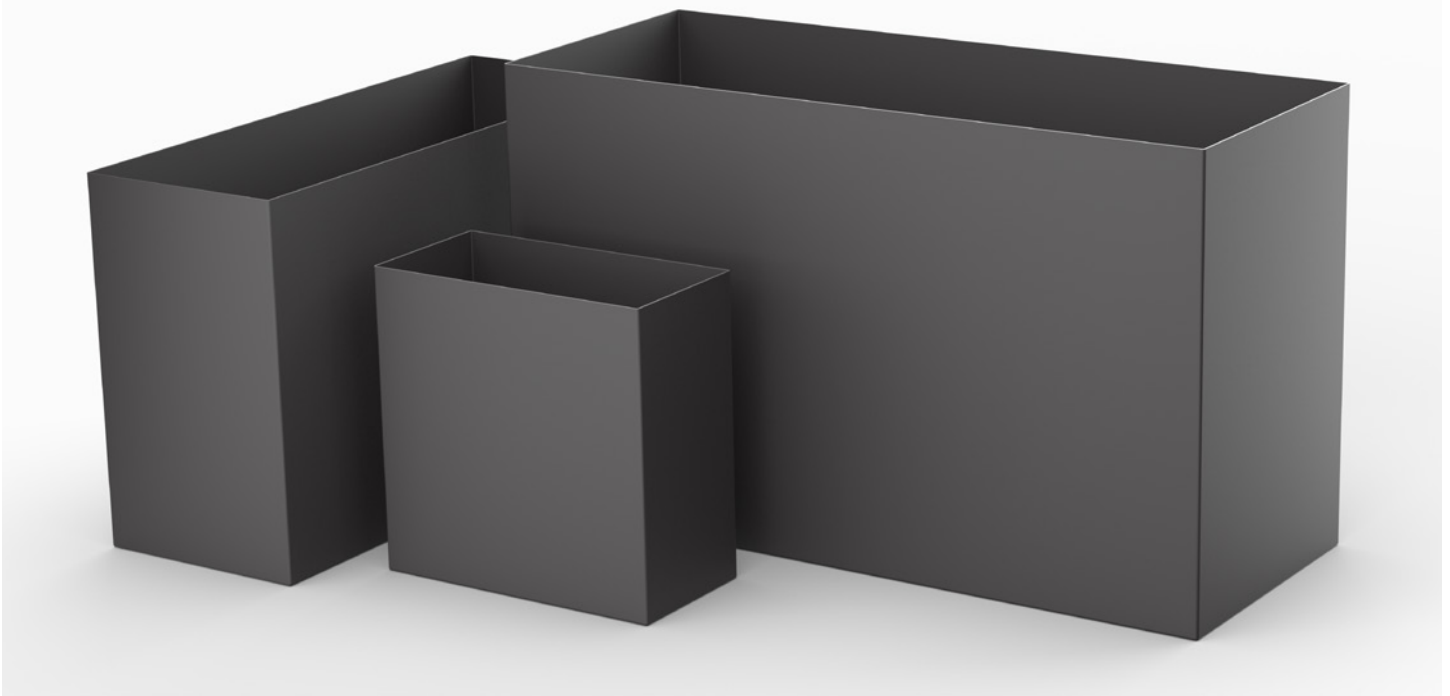

Our selection of modern shapes — including rectangular, round, and square — means designers can easily match planters to designs. Sizes range from extra-large and tall to small enough to fit on a table-top. Use planters to enhance your space, including rooftops, balconies, terraces, courtyards, multi-use areas, office buildings, hotels, airports, stadiums, and countless other commercial buildings.

Allé has over 40-years of experience manufacturing fiberglass-reinforced plastic products. Our reputation for reliability, quality, superior products, and competitive pricing is unmatched.

FRESCO SERIES

Modern style planters that feature a rimless top, a flat bottom with reinforced walls for larger planters to provide structural support. Fresco Series is entirely customizable to adapt to all projects. Available in over 60 finishes and textures. Our custom composite resin planters are made of formulated commercial-grade fiberglass created at our state-of-the-art manufacturing and fabrication facility in the USA. Their dent, rust, and leak-proof commercial-grade construction, along with vast color and texture options, make the Fresco Series planters an interior and exterior landscaping favorite.

Finishes: Matte & Texture Only

COURTYARD SERIES

Classic style planter that features a return rim and a recessed base. Durable, lightweight, and weatherproof. Ideal for both indoor and outdoor use. Our custom composite resin planters are made of formulated commercial-grade fiberglass and created at our state-of-the-art manufacturing and fabrication facility in the USA. Their dent, rust, and leak-proof commercial-grade construction, along with vast color and texture options, make fiberglass planters an interior and exterior landscaping favorite.

CLADD SERIES

Allé can produce custom-shaped commercial liners to any dimension and shape to fit your specific project. Each Cladd Series fiberglass liner is hand-built by our skilled artisans, creating a durable, lightweight, and easy-to-drop in liner. In addition, all liners are custom fabricated and tailored to size to meet your needs.

ADVANTAGES OF A FIBERGLASS LINER:

- Lightweight and versatile
- Seamless molded
- Unlimited shapes and sizes
- Will not rust or deteriorate
- Retains structural integrity and waterproofing in all weather conditions
- Last a lifetime

MATERIALS:

All CCR parts shall be constructed of reinforced thermosetting polyester resin using either the hand-layup and spray layup methods.

- Fibers shall be PPG or equivalent.
For hand layup fibers should be uniform chopped strand mat, minimum 3 oz. density. Planters must use minimum 3 layers (or spray equivalent).
- Polyester resin shall be compounded by a reputable manufacturer. All planters will be fabricated of 100% resin inorganic fillers will not be acceptable.
- Visual surface is of a solid UV-stabilized, colorfast non-fading, weather and stain resistant pigmented gel-coat, uniform in color and texture and permanently fused to the fiberglass laminate. All exposed surfaces shall have minimum 16 MIL layer of color incorporated into the resin.

CONSTRUCTION:

- Architectural parts shall be fabricated by hand-layup, spray laminate. The finished plastic material shall be not less than 5/32" thick and thicker in those areas requiring additional structural strength.
- Where ribs or stiffeners are to be fastened by spray laminating over molded forms, the stiffeners or ribs shall be located, and spray laminated into position so that the finished joint shall conform to performance specifications below.
- For vertical surface reinforcement, an inorganic honeycomb strengthening layer using double-veiled, bonded material shall be located and hand- or spray – laminated into position prior to the wall material setting. the entire honeycomb panel must be subject to pressure during curing to ensure proper bonding to wall. Honeycomb thickness will be a minimum 1/4", or thicker as required for larger spans. Marine-grade plywood may be substituted for additional wall support when required.

PERFORMANCE Characteristics & Capacities:

Finished product to yield the following minimum performances

- Hardness, Barcol. 50
- Tensile Strength 12,500 psi
- Elongation at Break 1.3%
- Modulus of Elasticity 1,020 ksi
- Flexural Modulus. 754 ksi
- Flexural Yield Strength 27,600 psi
- Compressive Yield Strength 21,800 psi
- Glass Content, Average 35%

Vertical wall panels will not deform more than L/200 when loaded with 50 lbs./cu. ft. soil mass.

Indoor and outdoor custom composite resin planters and receptacles need to be cleaned regularly to remove dirt and dust accumulation.

MATTE FINISHES: Polyester Gel Coats are very resistant to water and other chemicals. You may want to avoid any strong solvents or highly acidic cleaners. It is best to use mild detergents such as hand washing soaps, which will work for a majority of stains, smudges, hand prints and dirt accumulations.

Ammonia based cleaners, such as Windex (streak free), Lysol Tub and Tile, Lysol Disinfectant Wipes or any type of Rubbing Alcohol may also be used. Try in an inconspicuous area, if it discolors or dulls the area do not use.

Stubborn stains can be removed using a Scotch Brite Scour Pad and one of the cleaners listed above. This type of cleaning is more effective on an entire panel verses spot cleaning. Matte finishes have a flattening agent that gives it a natural aged look. The flattening agent helps in making a uniform dull flat finish. Some chalking will occur as it is part of the natural aging process. It may be necessary to apply a post planting wipe down of the unit, as there can be some disturbance of the surface area between normal shipping and the handling of units. Again once exposed to the weather/elements the entire exterior surface will age in a uniform manner.

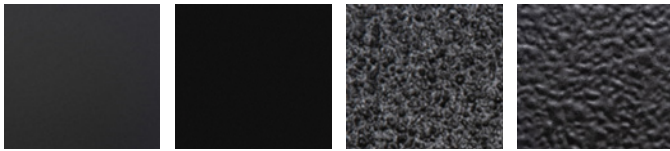

GLOSS FINISHES: Use a good quality cleaner or mild detergent with water for cleaning dirt or oil. Do not use harsh abrasive cleaners, which will scratch the surface. Stubborn stains may be removed with fingernail polish remover.

To restore and/or maintain a higher luster finish, use a high quality automotive polish or wax made especially for use on fiberglass products, such as Meguiar's MGH #9, Gel Gloss One Step Cleaner and Polish which can be purchased from hardware, automobile parts supply or marine products stores. Whether cleaning or polishing, always use a clean, soft absorbent cloth.

TEXTURED FINISHES: Polyester Gel Coats are very resistant to water and other chemicals. You may want to avoid any strong alkaline or highly acidic cleaners. It is best to use mild detergents such as hand washing soaps, which will work for a majority of stains, smudges, hand prints and dirt accumulations. You may also use any ammonia based cleaners such as Tub and Tile or any Glass Cleaner. Try in an inconspicuous area, if it discolors or dulls the area do not use. Stubborn stains may be removed using a plastic scrub brush and one of the cleaners listed above. This type of cleaning is more effective on the entire panel verses spot cleaning.

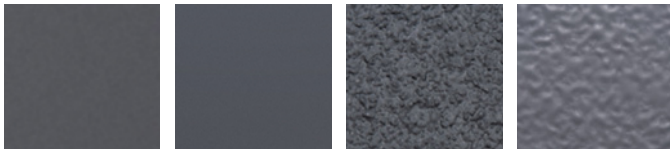

All applied finishes have a flattening agent that gives it a natural aged appearance. Some chalking will occur as it is part of the natural aging process. On Orange Peel and Applied Textured Finishes you can use a stiff bristle brush or stiff plastic broom with any of the cleaners listed above.
