

LIQUID & POWDER COATINGS

HIGH-PERFORMANCE SOLUTIONS FOR YOUR PROJECT

BUILT TO PERFORM. DESIGNED TO LAST.

CIN brand activation campaign,
mid-20th century

CIN

WHO WE ARE

CIN's history is strongly shaped by **innovation, quality and collaboration**, naturally assuming a **leadership** position in the **paints and varnishes** market.

Committed to excellence, for over **one hundred years** the CIN Group's mission has been simple and clear: to offer **the best solutions** with a team of **outstanding professionals**, capable of meeting customer needs and exceeding expectations.

Today, its activity focuses on four main market segments: **Architectural, Industry, Protective Coatings, and Yachting & Marine**.

With a focus on continuous improvement, both in knowledge and process efficiency, CIN takes pride in the results that reflect its track record of **success**.

CIN PERFORMANCE COATINGS

THE BRAND

CIN Performance Coatings is the CIN Group's **high-performance paints and varnishes brand**.

With aesthetic and/or functional purposes, CIN Performance Coatings provides **liquid and powder coatings** for structures and floors, parts, components and equipment, across different industries.

Developed for different materials, such as metals and alloys, concrete and cementitious mortars, wood, PVC and other plastics, ceramics and other composites, CIN Performance Coatings solutions ensure **protection** and/or **waterproofing**, even in the most demanding conditions, increasing substrate durability and giving them an **appearance of excellence**.

The brand is globally present in major landmark projects and works, with particular prominence in the **Architecture, Buildings and Infrastructure, ACE and Transport, Oil and Gas, Industrial and Extraction Facilities, Packaging** for the cosmetics, drums and gas cylinders sectors, **Energy, Water and Food Industry** markets.

Product **sustainability** is a core value at CIN Performance Coatings, which offers solutions aligned with the requirements of different environmental assessment and certification systems in the construction sector, such as BREEAM¹, LEED² and WELL³, promoting healthy and sustainable construction practices and ensuring continuous operations even after project completion.

¹ BREEAM – Building Research Establishment Environmental Assessment Method

² LEED – Leadership in Energy and Environmental Design

³ WELL – WELL Building Standard

CIN PERFORMANCE COATINGS

LIQUID COATINGS

Protection that lasts. Complete protection and finishing solutions, with performance and durability validated by international standards, such as ISO 12944 or ISO 9466, or with CE Marking, certifying quality and safety for a wide range of applications in construction and industry.

Colours that inspire. Solutions integrated into tinting systems, such as Colormix, ICS or Cromatic, ensuring precision, speed and flexibility in colour production.

Health and well-being for the user. Solutions that meet indoor air quality criteria set by the French regulation or the German AgBB certification, with low Volatile Organic Compound (VOC) emissions, contributing to healthier indoor environments.

Safety in critical environments. Solutions with Cleanroom® Suitable Materials certification, ideal for controlled environments where air quality and safety are essential.

POWDER COATINGS

Assured protection. Aesthetic and functional solutions for the protection of aluminium, steel and other metal alloys, with performance and durability validated by international industry bodies such as Qualicoat, Qualisteelcoat and GSB, for a wide range of applications in construction and industry.

Sustainable formulas. Innovative solutions, including eco-efficient versions, that reduce environmental impact without compromising product performance.

Efficient curing. Solutions featuring curing cycles at lower temperatures or over shorter periods than conventional ones, resulting in energy savings whilst maintaining the high quality and performance of the coating.

Unique metallic finishes. Solutions bearing the MEGABOND® seal, a quality guarantee that attests to the perfect dispersion of metallic particles, for a finish of outstanding excellence.
