STAINLESS STEEL DRAINAGE SYSTEMS

BLÜCHER® Drain

Most reliable connections

BLÜCHER® offers the most complete product range of stainless steel drains and accessories in the market. Every detail of the BLÜCHER® Drain range is the result of careful design and extensive development work, based on technical know-how and 40 years' experience within drainage systems. In particular through three basic characteristics:

HYGIENIC

NON-COMBUSTIBLE

RECYCLABLE

Stainless steel lasts for ever

Because of its corrosion and fire resistant properties, as well as its hygienic and environmental advantages, stainless steel is the material of choice for BLÜCHER® Drain.

Stainless steel is 100% recyclable, non-toxic, and its smooth surface guarantees maximum flow capacity and the best hygiene.

Standard and customised products

The BLÜCHER® Drain program includes a complete range of drains suitable for all applications from light to heavy duty. Available in acid-resistant AISI 316L or regular AISI 304 stainless steel.

All accessories like gratings, filter baskets and water traps are also part of the standard program.

The BLÜCHER® Drain range is a modular system providing numerous possible combinations and a solution for any drainage requirement.

On our website you will find the complete BLÜCHER® Drain product program as well as selected references and applications.

Customised drains and accessories are available on request.

Freedom of choice

The floor drain range with more than 1000 possible combinations provides a solution for any floor drainage project.

BLÜCHER® Drain Domestic

The drains for domestic use is a comprehensive range of light- to medium-duty floor drains suitable for tiled or vinyl floors:

- Multi-adjustable
- Two flange options
- Side inlets

BLÜCHER® Drain Industrial

The industrial floor drain program is suitable for today's building materials and methods:

- Removable water trap
- 20 mm frame for all types of floors
- Hygienic backfilled frame edge
- Filter basket and sand bucket for easy cleaning
- No burrs or sharp edges
- No corners or cavities inside
- Gratings for any load class

BLÜCHER® Drain Marine

The floor drains for maritime use exceed the strictest user and statutory requirements:

- A solution for any deck finish
- Welding into stainless steel or aluminium
- International approvals
- Multi-adjustable
- Removable water trap
- Modular system
- Protective cover on all lower parts

For all indoor drainage

The BLÜCHER® Drain range fulfills any indoor drainage requirement.

Housing

Within the housing area BLÜCHER® Drain is suitable for new building and renovation projects. BLÜCHER® Drain provides the right flow in bathrooms, kitchens and basements in single and multi-storey housing.

Commercial

The excellent hygienic properties with smooth surfaces preventing bacterial growth and blockages combined with the easy maintenance and non-smelling solutions make BLÜCHER® Drain the preferred drain in projects around the world. Hospitals, schools, airports and other commercial customers are among our loyal clients.

Industrial

The food, beverage and pharmaceutical industries value in particular the hygienic and sustainable BLÜCHER® Drain solution. The stainless steel provides a solution which requires a minimum of maintenance and offers maximum longevity. The long product life expectancy ensures a cost-effective installation, and in AISI 316L steel the drains also provide a durable solution for the chemical industry.

Marine

A special BLÜCHER® Drain product range is available for maritime use. Shipyards and owners all over the world depend on longevity, low weight and the fire-resistant, hygienic and reliable solution for their sanitary discharge system.
