

Hospital in East Anglia

The project in detail:

This is a case study of a drop-down ceiling area in a large hospital. This area was sprayed with Passive Purple along all the ceiling joints and 1 and half meters around the opening of the building on all external facades. This project was actually a retrofit with an original air test score of 7. After the application of Passive Purple the score was down to 0.6.

Drop down ceiling.

Service space.

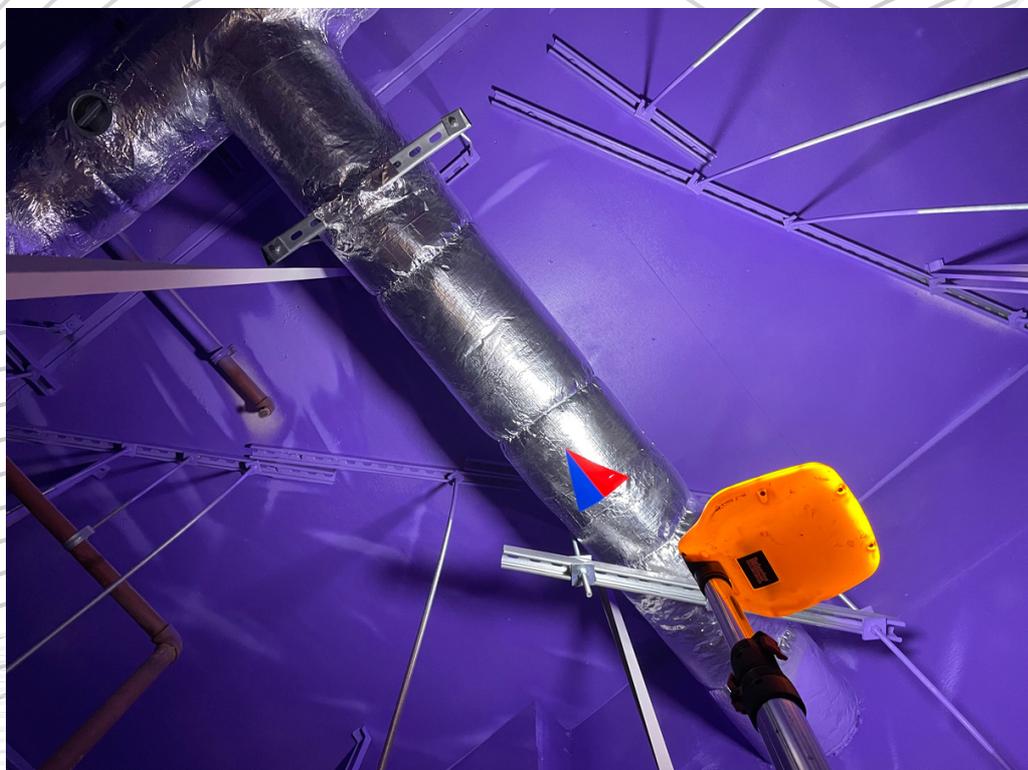

Passive Purple-Fire class
A-ASTM

After the application of Passive Purple Internal Vapour Control, a seamless airtight barrier is guaranteed.
