[A] ALLVIA

Allvia is a versatile storage system for flexible space design. With a wide range of freestanding, wall-oriented, or space-dividing cabinet configurations, the Allvia furniture series offers a suitable furnishing solution for every requirement.

Learn more
ass.al/2i3wps5

More than just organization

Whether for important work documents or personal belongings, everything finds its place in the Allvia storage system. Optionally, the acoustically effective Viteco partition wall systems can be integrated on top of the Allvia cabinets for sound absorption.

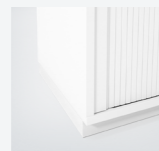

For different areas of application

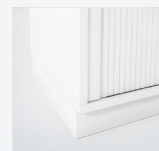

With a wide range of individual combination options, Allvia offers extensive storage solutions – whether at the office workstation, in the meeting room, or in the home office.

Wide variety

The Allvia storage system offers a wide range of base options.

High-quality materials: Writable crystal fronts

Locker cabinets: For an attractive room design

Eye-catcher in every office

In addition to individual storage solutions, our Allvia and Cubas series also offer matching, stylish planters and planter tops. The planters not only serve as functional privacy screens but are also a real eye-catcher that creates a special feel-good atmosphere.

For different areas of application

For particularly low-maintenance office greenery, various artificial plants are available. The planters can be equipped with a plastic insert or as a complete set with pine bark and artificial plants.

Individual variety

The Allvia planters offer a variety of base types.

- Acoustic surfaces**
- ⑭ All fronts are available with acoustically effective surfaces

- Fabric back panel**
- ⑮ For freestanding sliding or horizontal roller shutter cabinets, an absorbent fabric back panel is available in various colors.

Clever design

The additional locker cabinets with digital technology complement the Allvia series and stand out as multi-functional storage solutions. Various compartment configurations and five different compartment sizes not only offer great flexibility in design but also provide ample storage space for all important personal items.

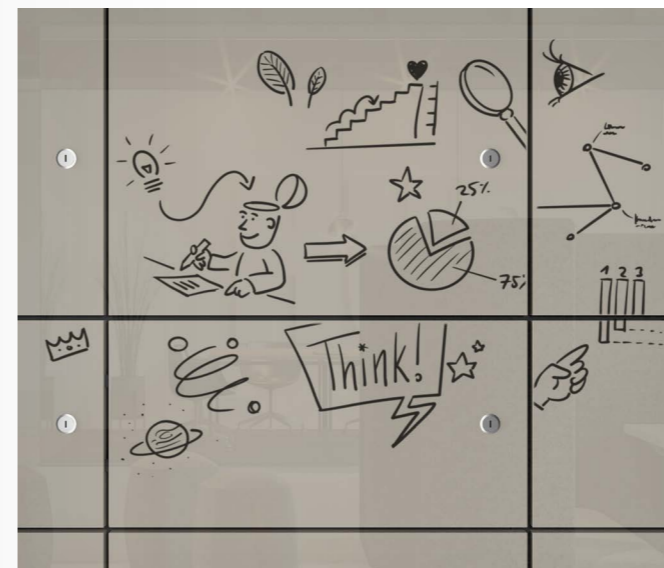

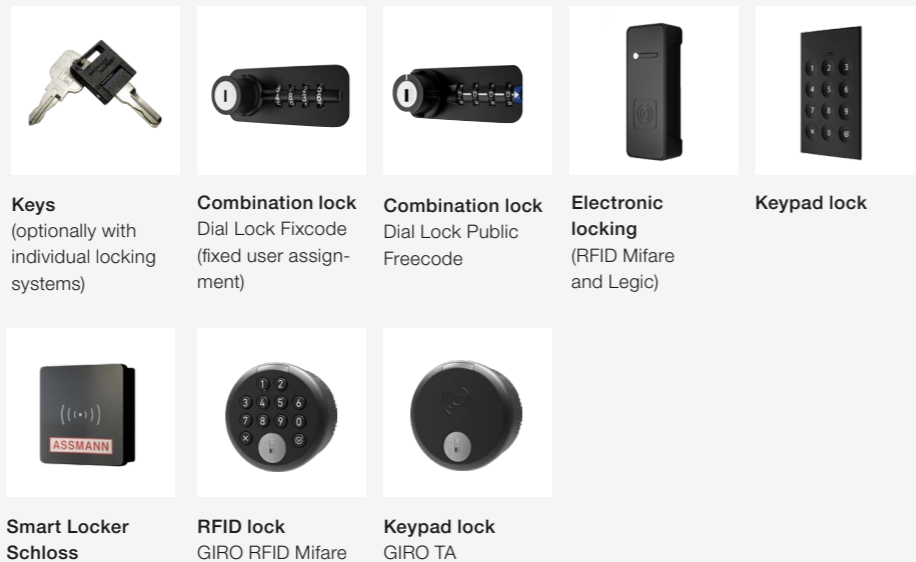

Start with creativity and power

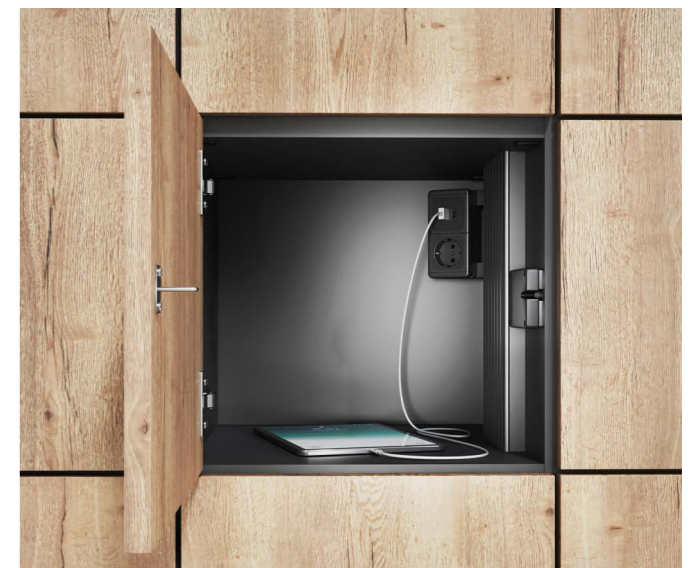

Our locker cabinets do more than just provide storage: with writable surfaces, the locker fronts can be used flexibly for collaborative brainstorming and creative exchange. Thanks to the integrated power outlet, electronic devices can be easily and safely charged inside the compartment.

Locks

Whether the compartment is used by a fixed user or temporarily by different groups of people – our locking systems provide the right solution for every requirement.

Creative work tool thanks to writable surfaces

Charge your battery via the integrated power outlet

Versatile and individual

Thanks to the clear design and color scheme as well as the various accessories, the locker cabinets perfectly blend into their surroundings and provide space for the individual realization of modern learning and working environments.

Work environments of the future

With the adoption of new organizational forms and work models, the need for sufficient storage options to securely store personal belongings and work materials is increasing. Depending on the need, the locker cabinets can therefore be individually customized with business card holders and numbering.

Remote Work?

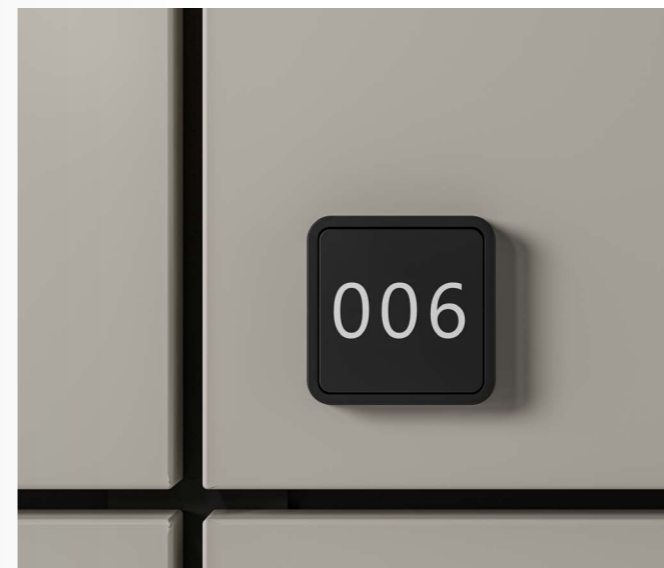

To ensure colleagues receive analog information despite changing work locations, the locker cabinets can be equipped with mail slots and optional mail trays.

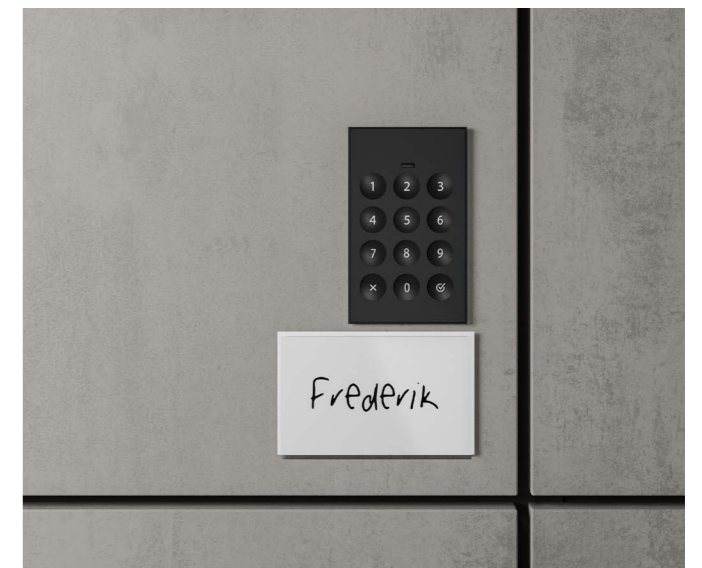

Mail slot: Cut-down door

Mail slot: Plastic mail chute

Numbering

Business card holder

New Work Now

The locker cabinets enable quick and comfortable adaptation to the respective work area and the associated tasks. With the optional Smart Process function, the organization and optimization of processes and workflows in various areas are achieved. Thanks to the use of innovative software systems, the usage possibilities are virtually unlimited.

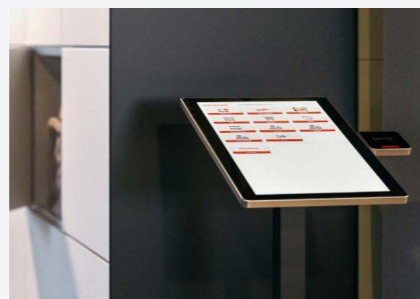

Intelligent locker systems

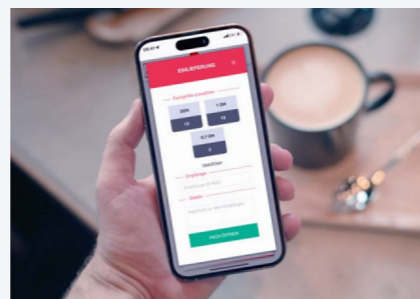

With software-controlled electronic locker systems, the transfer of items or documents is possible independently of fixed times and personal meetings. The smart system can be used in many ways: as individual personal storage, for temporary use by project groups, for intelligent goods distribution, for handovers between employees and departments, or for documented lending of technical equipment.

Easy management

Internal processes can be conveniently and remotely organized via a recessed tablet in the door front or stand display, as well as through the Smart App.

[A] CUBAS

The space-dividing Cubas shelving and storage system combines innovative design with high functionality. Whether as flexible storage at the workplace, an individual room divider and hanging shelf, or an aesthetically pleasing furnishing solution in the home office.

Learn more
ass.al/4lmo0af

Cleverly designed

Cubas features a unique and innovative rotating mechanism. The movable modules can be rotated 360° by hand, completely tool-free, to adapt to changing user requirements and individual needs.

Eye-catcher

The multiple award-winning Cubas is the ideal furnishing solution for open and modern work environments as well as waiting areas and home offices. The storage system impresses with its high functionality and modern design, which can be customized in shape and color.

Working from home: Cubas as a room divider in a cozy atmosphere

Eye-catcher: Cubas brings color to the waiting room

Design variety

The minimalist design combining a metal frame and solid elements offers a wide range of design and usage options – whether as a room divider, hanging shelf, or sideboard. The metal frame is available in black or white.

Make a statement

Cubas offers the greatest variety of applications and can be combined with the Intavis and Allvia storage systems. It is versatile, impresses with its high functionality, and, thanks to its appealing appearance, is also a perfect furnishing solution for the home office.

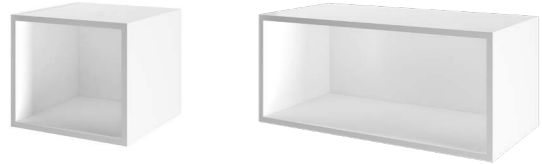

Combinable: The Intavis and Cubas storage systems

Versatile: Stylish hanging shelf for the home office

Wide range of design options

The flexible Cubas furniture system can be individually designed from the body to the functional shelf and the rotating modules. It can be combined with other storage systems and optionally complemented with Allvia planter tops.

[A] CUBAS FLEX

The Cubas Flex series offers the perfect solution for those who desire a dynamic and flexible office design. The multifunctional furniture allows for individual arrangement of seating and tiered elements, project and meeting tables, providing maximum flexibility.

Learn more
ass.al/y6u7j7b

One element, endless possibilities

The individual multifunctional modules can be combined in any way and open up new design possibilities – whether as a stool, table, bench, tiered seating, or all in one.

Maximum flexibility

Thanks to the patented fitting system, the furniture can be quickly reconfigured without tools and combined in numerous ways. For unlimited flexibility, the Cubas Flex series can also be equipped with casters, making the furniture mobile and easy to use throughout the room.

Versatile configurable storage solutions

Individually configurable seating modules

A stage for New Work

The Cubas Flex series is suitable for all areas where communication and people themselves are at the center. As an alternative to conference tables in agile meeting rooms, for designing central and communication zones in open spaces, as a lounge area at events, or in reception areas.

Innovative solutions for more flexibility and creativity

Cubas Flex offers an innovative solution that not only improves functionality but also provides a high level of flexibility. Furthermore, such a dynamically designed work environment promotes employees concentration and creativity, enabling them to work productively and develop new ideas.

Diverse usage and combination options

Perfect for agile meetings

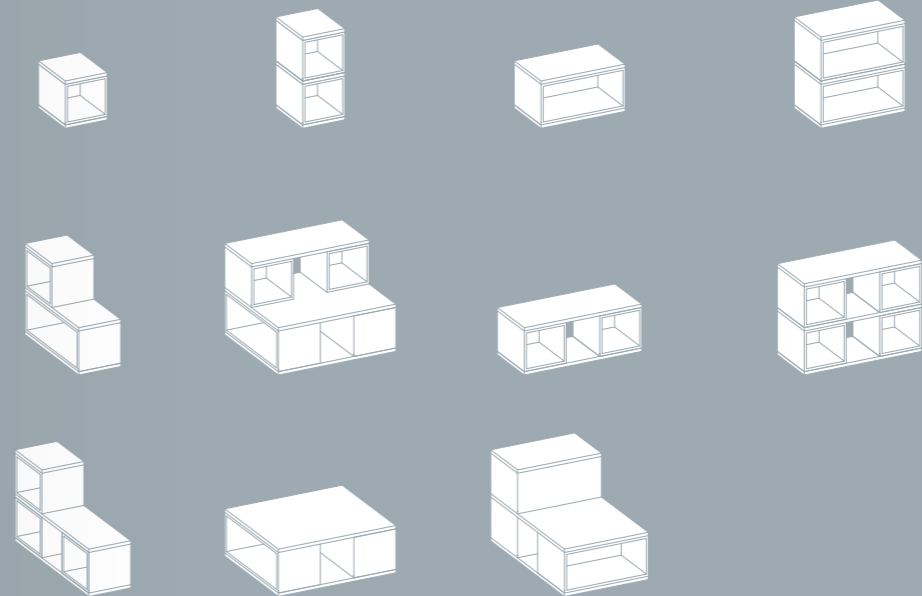

Maximum flexibility with practical stools

The Cubas Flex series is complemented by matching Consento Bocca stools, which can be conveniently stored in the Cubas Flex shelves when not in use. Thanks to their compact size and practical leather carrying strap, handling is especially easy. Experience flexibility at the highest level!

[A] PONTIS

The practical and multifunctional furniture of the Pontis series ensures tidy and optimally equipped workspaces. As an individual addition, the storage solutions can be used either as extra work surfaces or for structuring the space.

Learn more
ass.al/fs5ux9o

Ample space

The versatile Pontis pedestal and mobile drawer units can be individually configured with various interior fittings and in different heights and depths.

With the Pontis pedestals, all daily essentials and materials are always within easy reach.

A perfect addition to any workspace

The lockable Open Space containers offer practical storage for work materials and personal belongings. At the same time, the container provides privacy for undisturbed and focused work.

Mobile storage solutions offer greater flexibility

The Pontis mobile pedestals are equipped with castors, making them highly flexible and ideal for office workspaces with desk-sharing setups. These movable storage units help maintain a tidy workstation and can be parked in designated container garages after use.

More organization at the workplace

With the Pontis technology container, technical equipment and everyday work materials can be stored directly at the workstation. The containers can be individually configured in terms of function and design. Whether with shelves or special pull-out elements, fronts with or without handles – Pontis offers the right solution for every requirement.
