

# YOUR NEXT PROJECT STARTS WITH ZURN

You have your business covered. And so do we.

Running a business doesn't leave a lot of time to catch your breath. Let us ease your workload and worries with products that do the job as promised. Every water solution in our portfolio is engineered to satisfy your requirements and expectations for years to come. You also have options in specs and materials.

That way, you can spend time comparing models and features, not manufacturers. From behind-the-wall systems to front-of-the wall fixtures and even outside of the building, customize solutions around your operational demands without compromising on what matters to you.

## CONSERVATION & EFFICIENCY

Whether it's shared spaces or our most precious shared resource, you can optimize both to better serve your business. Our advanced products blend clean lines with smart technology. You'll see lower bills and maybe a few smiles for your sustainable efforts.

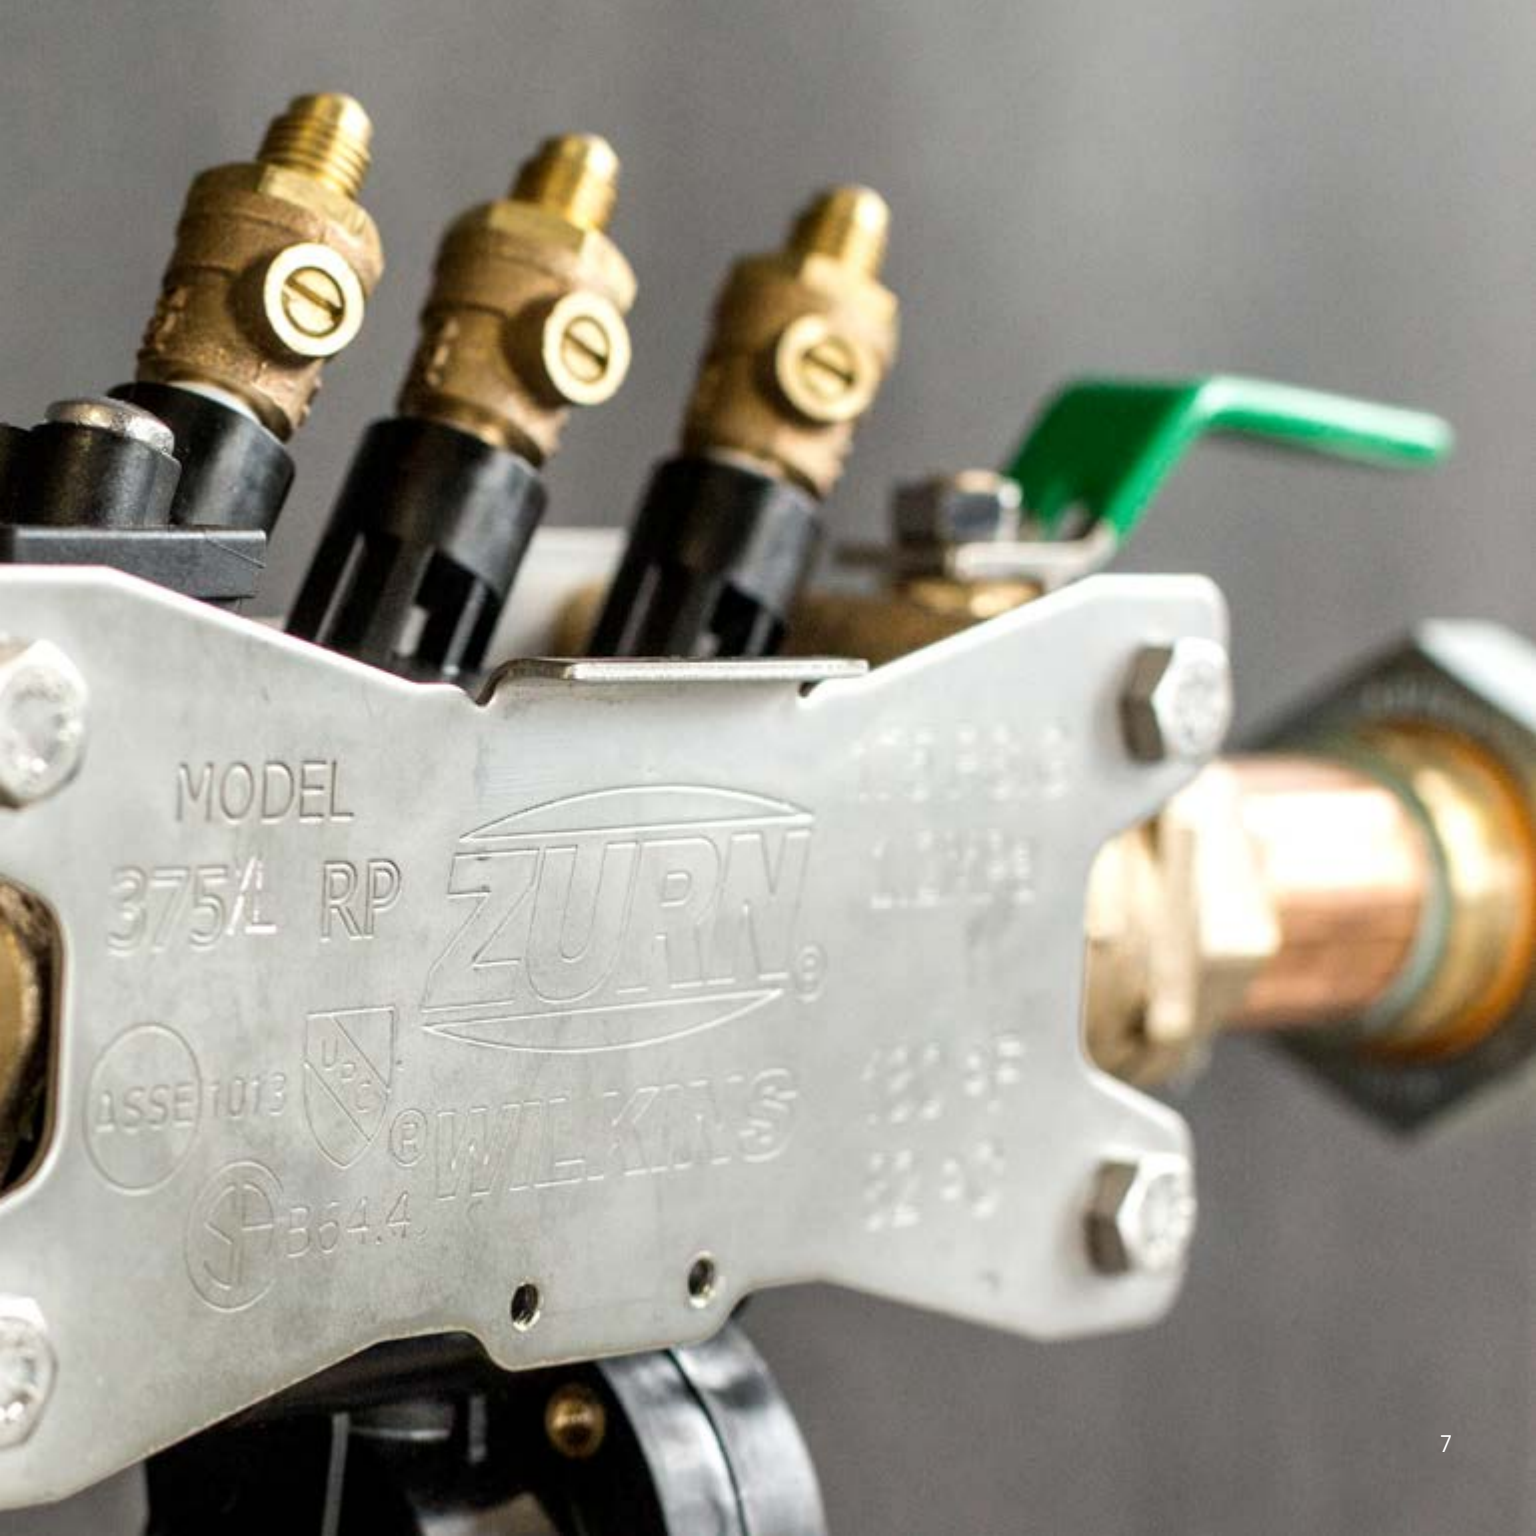

## SAFETY & CONTROL

Protect your buildings, investments, and most importantly, your personnel with products that put safety first in every feature. After all, peace of mind is more than just low maintenance and costs. It's staying compliant and out of the headlines.

# BACKFLOW PREVENTERS

Time tested, durable construction and patented designs, Zurn is the preferred manufacturer of backflow preventers. The compact dimensions allow for direct drop-in replacements for any application. The big picture is businesses can focus on their operations, not repairs or the unexpected.

# SUNDARA™ HANDWASHING SYSTEMS

Build a handwashing system around style and substance. Sundara comprises a curated selection of models, colors, faucets and soap dispensers, in alternate finishes. The solid surface won't absorb water or grime and the low flow faucets help towards LEED certification. Its individual stations, splash-free design, hands-free operation, and fluid lines leave a positive impression.

## ZURN ONE SYSTEMS

Turn to your single, trusted source for high efficiency flush valves, bowls, and carrier systems. These complementary products and accessories work seamlessly (and better) together. The hands-free sensors, low flow, yet powerful performance, and off-the-ground installation promote a sanitary environment. And staying in line with convenience, you'll receive your order organized, all at once.

## HAND DRYERS

Paper towels add up to more than just trees. They take a large footprint to produce. They require maintenance staff to stock and empty overflowing bins. And, let's face it, they mess up a neat environment. World Dryer hand dryers blow the alternative away with better cost savings, quiet operation, fast drying technology, and hygienic filters. Best of all, they're another option towards LEED certification.

## MANUAL FAUCETS

With AquaSpec® technology, commercial strength, and lifetime warrantied ceramic disc cartridges, you can expect these solutions to run smoothly (along with your business). The chrome-plated cast brass construction is easy to clean, the seamless designs are easy on the eyes and color coded handles make it easy to use. With so much ease, it's hard to compare. Make your selections to fit any environment.

# TRENCH DRAIN SYSTEMS

Rely on a system with the ideal balance of form and function. We factor in proper drainage depth, built-in molded slope, enhanced velocity and heel-proof grating. Meaning, your system will withstand it all – foot traffic, heavy loads, flow rate – without standing out or catching people off guard. Choose from a variety of grate styles, specs, materials and finishes to meet compliance, emerging codes, and your own preferences.

## FLOOR DRAINS

Saving your contractor hassle and labor pays off come invoice time. Choose from a wide range of drains that skip a step or two during installation and stand up against wear and tear years later. Our engineers thought of the before and afters, such as having the shim kit handy, protective drain covers prior to pouring, tilt correction, and post-pour adjustment. Long story short, Zurn's floor drains ensure contractors have what they need on the job and guarantee it will look good after it's installed.

## GREASE AND OIL SEPARATORS

Proceptor features a patented laminar flow pattern to filter pollutants without scouring, re-entering the stream, leaking or corroding the system. What's more, the flexible fiberglass works for applications others simply couldn't, including above-ground installs, parking garages, zero lot line conditions and confined spaces. Install a system guaranteed to last long after the job and decades past the competition.

# COMPLETE CONFIDENCE

Even when you know what you need, you may want assistance with customization and product connectivity. Let us help. Consult with an expert for design support or confirm specs online at [zurn.com/tools](https://zurn.com/tools).

Want to check out some drawings before you sign the dotted line?  
We can make that happen too.

Start your next project with Zurn.

**ZUJRN**®

A low-angle photograph of a modern building facade. The word "ZURN" is prominently displayed in large, dark blue, three-dimensional block letters with a lighter blue outline. A registered trademark symbol (®) is located to the right of the letters. Below the sign is a large window with a white grid pattern. The building's exterior is composed of light-colored panels and a blue horizontal band. The sky is clear and blue.
