LIGHT

Premium bicycle shelter in Scandinavian design for secure, covered bicycle parking

Ver.1 / 2026.08.02

LIGHT

LIGHT is a premium bicycle shelter designed to combine Scandinavian architecture with outstanding durability and functionality. Its elegant steel structure and solid polycarbonate roof create a bright, weather-protected bicycle parking environment for public spaces, workplaces, schools, residential developments and transport hubs. The column-free design provides excellent accessibility while maintaining maximum protection for parked bicycles.

Design and functionality

LIGHT features a modern steel structure with a solid 8 mm UV-resistant polycarbonate roof in smoked grey, creating the appearance of glass with exceptional durability.

The design eliminates outer columns, improving accessibility and allowing cyclists to move freely around the shelter. Engineered for demanding weather conditions, LIGHT is suitable for all snow load zones.

The shelter can also be used to protect EV charging stations, waiting areas and outdoor seating.

Flexibility

Available in two heights and in both single-sided and double-sided configurations.

The higher version is designed for use with the VENTURA two-tier bicycle parking system, while both versions are ideally suited for the DELTA bicycle rack.

The modular design makes LIGHT suitable for projects of virtually any size.

Materials

Option 1 – Hot-dip galvanised.

Option 2 – Powder coated. Standard colour: Black RAL 9005. Available in any standard RAL colour.

Option 3 – Hot-dip galvanised and powder coated. Standard colour: Black RAL 9005. Available in any standard RAL colour.

Steel columns and roof structure.

Roof in 8 mm UV-resistant solid polycarbonate (smoked grey) with stainless steel roof trims.

Available modules

Type	Section	Roof C/C	Suitable rack C/C	No of Bikes
Single level	First section	4.0 m	500 mm	8/16
Single level	Extension	4.0 m	500 mm	8/16
Single level	First section	3.0m	500 mm, 600 mm	6/12, 5/10
Single level	Extension	3.0m	500 mm, 600 mm	6/12, 5/10
Two-tier	First section	3.0m	375*/400/500 mm	12/24, 12/24, 8/16
Two-tier	Extension	3.0m	375*/400/500 mm	12/24, 12/24, 8/16

*375 mm applies to OPTIMA only.

Compatible with DELTA, OPTIMA and VENTURA bicycle parking systems.

Optional features
