Premium bicycle parking garage for secure, weather-protected bicycle parking

Ver.1 / 2026.08.03

LINK

LINK is a premium bicycle parking garage designed for modern urban infrastructure. Combining Scandinavian design with outstanding accessibility, security and durability, LINK creates an attractive, weather-protected bicycle parking environment that encourages more people to choose cycling for everyday travel.

Ideal for transport hubs, city centres, workplaces, residential developments and other public environments where secure bicycle parking is essential.

Design and functionality

LINK features a clean architectural design with large safety-glass façades, a distinctive roof profile and integrated LED lighting that create a bright, safe and welcoming bicycle parking environment. The column-free interior provides maximum accessibility and allows the layout to be adapted as future bicycle parking needs change.

The fully sealed construction prevents leaves and debris from entering the garage, reducing maintenance requirements throughout the year.

Accessibility and security

Automatic sliding doors are supplied as standard and prepared for digital access control.

LINK can be integrated with RFID systems, public transport cards and the Thinktrain Locked Bicycle Garage platform, providing secure access while minimising administration and user management. Powerful integrated LED lighting and transparent safety-glass walls maximise visibility and create a safe environment for cyclists day and night.

Flexibility

Available in 6.2 m and 8.0 m widths, with lengths starting from 6 metres and extendable in 2-metre modules.

The 2.8 m internal height is designed for two-tier bicycle parking systems such as VENTURA, while DELTA bicycle racks are recommended for single-level parking.

LINK can also be equipped with:

- Cargo bike parking (CARGO)
- CARE4BIKES bicycle service station
- WAVE AIR bicycle pump
- ECOCHARGE battery charging cabinet
- Interior ceiling
- Power outlets for e-bikes
- Solar panels
- Green roof or solid polycarbonate roof

Materials

Option 1 – Hot-dip galvanised steel.

Option 2 – Hot-dip galvanised and powder coated. Standard colour: Black RAL 9005.

Available in any standard RAL colour.

Steel columns and roof structure.

Safety-glass façades with high durability and low maintenance.

Roof available in solid polycarbonate (PC) or prepared for an extensive green roof.

Certifications

All Cyklos bicycle shelters and bicycle parking garages are CE marked in accordance with EN 1090.

Approved by Bygghuset Bygghuset®.
