WHERE FUNCTION MEETS FASHION

ORTECH's bathroom fan grilles are the perfect accessory for upgrading your ventilation system. Designed to complement both AC and DC motor bathroom fans, these grilles blend functionality with style, ensuring that your bathroom stays fresh and inviting. With a sleek design, they effortlessly fit into any décor while providing optimal airflow to eliminate odors and moisture.

Crafted from high-quality materials, **ORTECH's** grilles are built to last. They feature a durable finish that resists corrosion and wear, ensuring long-term performance in the humid bathroom environment. Installation is a breeze, allowing you to quickly upgrade your existing setup or complete a new installation with ease.

Beyond just aesthetics, these grilles play a vital role in improving indoor air quality. By effectively directing airflow, they help reduce humidity levels and prevent the buildup of mold and mildew.

ENHANCED COMFORT AND EFFICIENCY

The **ORTECH ODDIN** Universal Series Inline Fans are designed to provide efficient and continuous ventilation with unmatched convenience. Featuring a built-in low-speed controller, these fans are engineered to run 24/7, ensuring that local building code requirements for continuous air circulation are easily met. This makes them ideal for both residential and commercial environments where constant airflow is essential.

One of the standout features is the built-in time delay, allowing the fan to keep running for an additional minutes after being turned off. This delay ensures complete ventilation, further enhancing air quality and energy efficiency. Whether you're managing moisture or odors, this feature offers customized control for any space.

Capable of ceiling or wall mounting, these inline fans are designed for quiet, discreet operation.

STAY COOL, STAY QUIET

The **ORTECH OIF Series** Inline Fans are designed for both commercial and residential applications, offering speed controllable functionality to meet varying airflow needs. Featuring a robust construction with painted cold-rolled steel housing, these fans are built for durability and performance. They excel in high static pressure applications, ensuring effective air circulation in challenging environments.

MAXIMIZE AIRFLOW, MINIMIZE ENERGY

The **ORTECH ODDMF Series** Inline Fans feature advanced mixed flow technology, offering a combination of inline fans and mixed flow silencers designed for optimal air movement. These fans utilize cutting-edge brushless EC motors equipped with Hall IC technology, ensuring reliable performance and precision control.

One of the standout features of the ODDMF Series is its remarkable energy efficiency. These fans operate at significantly lower power consumption levels compared to average fans, making them an environmentally friendly choice while reducing operational costs. The innovative design promotes quiet operation, enhancing comfort in both residential and commercial spaces.

Constructed with durable aluminum housing and a jet-engine design that incorporates double impellers, the ODDMF fans provide stable performance that is free from vibrations.

INFUSE NATURE INTO YOUR SPACE

ORTECH's Energy Recovery Ventilators (ERVs) are designed to enhance indoor air quality by exchanging stale indoor air with fresh outdoor air while recovering energy from the exhaust air. The ERVs capture both heat and moisture, making them ideal for balancing humidity levels and maintaining a comfortable, healthy living environment. This technology is especially beneficial in energy-efficient homes that are tightly sealed, where proper ventilation is crucial for preventing air quality issues.

A standout feature of ORTECH's ERVs is their energy-saving capability. By recovering up to 87% of the energy from the exhaust air, these ventilators reduce the heating and cooling load on HVAC systems, leading to lower energy consumption and cost savings. They work effectively in different climates, helping to control excess moisture in humid regions and preventing indoor air from becoming too dry in colder areas. The units are versatile and can be installed in residential or light commercial settings.

OD-ERV 150AC

Energy Recovery Ventilator With Efficient Cross-flow Core & Pressure Ports for air balancing

- Has 6" duct connections and 6 ft power cord
- MERV 6 filters standard with MERV 13 option for OA stream
- 30-100% speed control built-in for OA and RA air-streams for balancing and reducing airflow per requirement
- Efficient cross-flow core and pressure ports for airflow balancing
- Temperature sensor to limit operation during very low temperatures
- Run time per hour at low speed setting, 0-60 min per hour (ASHRAE 62.2)
- Auto-reset thermal overload protection on motors and no drain pan or hose required
- CSA standard C439-18 compliant

OPTIONAL

Manual override switch (MOS) can be used in conjunction with a powered wall mounted delay timer, using a plug-in relay (not included), to boost the unit into high-speed operation for specified time.

INVISIBLE OUTSIDE, INCREDIBLE INSIDE!

The innovative heat pump **SOLO** without an outdoor unit offers a game-changing solution for ultimate climate control. Designed with a compact and sleek profile, it eliminates the need for bulky external components, making it perfect for urban spaces, apartments, and homes with limited outdoor areas. This smart design not only enhances the aesthetic appeal of your home but also simplifies installation and maintenance, providing a hassle-free experience.

Despite its compact size, this heat pump packs a powerful punch when it comes to heating and cooling. Advanced technology ensures efficient performance, delivering cozy warmth in the winter and refreshing coolness in the summer—all while keeping energy consumption in check. With its whisper-quiet operation and precise temperature control, you can enjoy a comfortable indoor environment without disruptions.

INVERTED COMPRESSOR

SOLO (1 TON)

All-in-One Heat Pump Providing Compact Power For Ultimate Climate Control

- **Sleek, All-in-One Design:** Revolutionary heat pump system with no outdoor unit.
- **Energy Efficient & Quiet:** Advanced inverter compressor and variable-speed motor ensure high efficiency and whisper-quiet performance.
- **Effortless Installation & Operation.**
- **Venting Through Two Wall Ducts:** Efficiently expels and intakes air through just two small wall ducts, reducing structural impact.
- **Dual Functionality (Heating & Cooling):** Enjoy year-round comfort with seamless heating and cooling in a single, energy-efficient unit.
- **Drain pan heater:** Helps evaporate water in drain pan to reduce chance of freezing.

CONTROL THE AIR, MASTER THE COMFORT

With advanced sensors, speed controllers, and timers, these controls allow for seamless adjustments, ensuring that the temperature, airflow, and energy usage are optimized at all times. Whether it's for residential or commercial spaces, **ORTECH HVAC controls** help maintain a balanced indoor climate with minimal effort.

The inclusion of smart sensors enables real-time feedback, automatically adjusting system performance based on environmental conditions. Speed controllers offer flexible options for adjusting fan speeds, providing the ideal balance between airflow and energy consumption, while the timers ensure the system runs efficiently only when needed, avoiding unnecessary energy use.

Built for convenience and reliability, ORTECH HVAC controls provide a smarter way to manage your indoor comfort.

WM-DWHS

Humidity And Fan Control Sensor For Reducing Bathroom Condensation

- Voltage: 120V/60Hz
- Max. Fan Load: 3A
- Max. Fan Time: 30 mins
- Delay:
- Humidity Range: 45% ~ 80% RH

- Saves energy
- Reduces bathroom condensation
- Combines humidity and bath fan control functions

WM-DHOS

Single Pole/PIR Motion Sensor With Interchangeable Face Cover

- Voltage: 120V/60Hz
- Time Delay: 15 sec & 5, 15, 30 mins
- Fan Load: 1/4HP (3A)
- Humidity Range: 45% - 80% RH

- Easily replaces existing standard switch
- Neutral wire required
- Compatible with incandescent, fluorescent, halogen, and LED Lighting

SDS-10

Air Pressure Sensing Switch With Electric Cycle Timing Board

- SPDT/SPS Electric Load: 1/10 HP at 120-277V AC
- 28VA Pilot Duty: at 24V AC
- 125VA Pilot Duty: at 120V AC

- For mounting between ducts
- Available in 4", 5", 6", 8", 10", 12" sizes
- Can function in both horizontal and vertical positions

DRYER BOXES

ODB-100

Residential Grade Wall
Recessed Metal Dryer Box

- With a round hose hole
- Places dryer flush to wall without crushing exhaust hose or restricting airflow
- Fits 2x6 stud size

ODB4-100

Residential Grade Wall
Recessed Metal Dryer Box

- With an oval hose hole
- Places dryer flush to wall without crushing exhaust hose or restricting airflow
- Fits 2x4 stud size

VB-6-S

Commercial/Residential Grade
Vapour Barrier For Fans

- Helps control moisture
- Applicable for most building codes
- Made of heavy duty polyethylene

VENT SMARTER, LIVE HEALTHIER!

TIPS FOR HAVING PROPER HVAC VENTILATION

- 1. Regular Filter Changes:** Replace HVAC filters every 1-3 months to maintain optimal airflow and improve indoor air quality.
- 2. Clean Air Ducts:** Schedule professional air duct cleaning every 3-5 years to remove dust, allergens, and debris that can obstruct airflow and reduce system efficiency.
- 3. Check Vent Locations:** Ensure vents are not blocked by furniture or curtains to allow for proper air circulation throughout your home.
- 4. Use Exhaust Fans:** Utilize exhaust fans in kitchens and bathrooms to remove excess moisture and pollutants, reducing the strain on your HVAC system.
- 5. Seal Duct Leaks:** Inspect and seal any leaks in your ductwork to prevent air loss and improve the efficiency of your HVAC system.
